Multi-Card Reader/Writer

Hi-Speed USB 2.0, 3.5" Bay Mount, 62-in-1 with SIM and Smart Card Support

Model
100953

Converts an empty, unused PC bay into a digital content management center.

The MANHATTAN® Multi-Card Reader/Writer supports most card formats to easily download and transfer digital images and files from many of today's popular flash memory cards without special adapters. Compatible with up to 62 types of CompactFlash, Microdrive, Magicstor, Memory Stick, MagicGate, SecureDigital, Multimedia, XD and more including SIM and Smart Cards, the MANHATTAN Multi-Card Reader/Writer quickly installs into a 3.5" bay. Included software easily reads, copies and edits text messages, phonebook entries and other content on SIM and Smart Cards.

Convenience without the Media Device
Access digital content without directly connecting the camera, phone or other media devices to the computer. This convenient connection helps conserve battery power by eliminating the need to directly install a digital device to a desktop computer. A front-mount USB port expands power availability to recharge USB devices or expand USB connectivity.

Lifetime Warranty
Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

LIFETIME WARRANTY

Model
100953
