Part No.: [167345](#)

EAN-13: 0766623167345 | UPC: 766623167345

Speaker for PC and so much more - Connect three different ways with USB, Bluetooth or 3.5 mm Stereo Aux

The Manhattan Bluetooth® RGB LED 2.1 Desktop USB Speaker System gives you a full package of versatile audio connectivity, excellent sound quality and immersive, multicolored LED lighting.

Connect it your way

Connect this speaker how you want. For a classic USB speaker system, connect it with the USB-A plug on the built-in 1 m (3 ft.) cable to your computer or notebook. Both sound and power are transmitted through the single USB connection. Or, if you prefer audio via the Aux port, connect the 3.5 mm stereo plug on the other built-in 1 m (3 ft.) cable (e.g., to an iPad or MP3 player). If you want wireless control from a distance, like with playing music from your smartphone, pair it via Bluetooth. The mode control button lets you switch easily. Just keep in mind that a USB-A connection for power is always required, but it certainly doesn't have to be your PC's USB port - any USB charger with 5.0 V / 2.0 A works just as well.

High-quality sound with depth and clarity

The strong subwoofer and a pair of dual-position satellites of this 2.1 sound system make for a very powerful upgrade of your device's built-in speakers. Create a room-filling audio experience that brings your music, games and

movies to life with rich, crisp sound and booming bass.

Dynamic, colorful RGB LED light for full immersion

Improve your listening experiences with vibrant colors from the light circle in the center of the subwoofer, which builds dynamic effects based on your music. You can also switch to seven other colorful light modes to help set the mood you're going for.

Features:

- Powerful, color-changing 2.1 audio system with three input options: USB, Bluetooth, and Stereo Aux
- USB-A plug on built-in 1 m (3 ft.) cable for wired music playback and power supply
- Bluetooth[®] 5.0 for wireless music playback
- Aux 3.5 mm stereo audio plug on built-in 1 m (3 ft.) cable for wired music playback
- Subwoofer and two satellite speakers for powerful, deep bass and rich, clear, high-quality sound
- Multicolored RGB LED light circle with dynamic effects based on your music; seven other light modes available
- Integrated volume and mode controls
- Ideal for PC and laptop but just as great with smartphone, tablet, iPad[®], MP3 player, iPod[®], MacBook[®], Chromebook[™], and more
- Plug-and-play installation with USB and Aux; Windows[®], Mac[®], Linux[®], and Chrome OS[™] compatible
- Bluetooth mode to work with iOS[®], Android[™], and most Bluetooth-enabled devices
- Three-year warranty
