EAN-13: 0766623102704 | UPC: 766623102704

USB Stereo Speakers for PC and Laptop as a Compact, Powerful Upgrade for your Notebook or Monitor Speakers

Improve your audio setup with the Manhattan 2600 Series Stereo Computer Speakers, designed to deliver rich, clear, and high-quality sound whether placed on a table or shelf. These powerful stereo speakers are the perfect upgrade from built-in notebook or monitor speakers, offering a superior listening experience for music, gaming, movies, and more.

Versatile Connectivity

With a built-in 1.4 m (4.6 ft.) USB-A cable and an included USB-C adapter, these speakers can easily connect to your desktop PC, laptop, MacBook Pro®, and other USB-equipped devices. Wide compatibility with Windows®, macOS®, Linux®, and Chrome OS™ lets you use them with many setups.

Convenient Volume Control

Adjusting the volume is effortless with the integrated rotary volume control. This feature ensures you can always find the perfect sound level without the hassle of going to your PC settings.

Enhanced Stereo Separation

The dual external speakers provide enhanced stereo separation and a broader sound field. This design improvement immerses you in your audio, creating a more dynamic and engaging listening experience. You will clearly hear the difference from your built-in speakers.

Bus Powered

These speakers are bus powered, meaning there is no need for an external power supply, which reduces the clutter on your desk.

Easy Setup

With plug-and-play installation, no configuration or drivers are required. Just connect the speakers to your device, and you can start enjoying your music, movies, and more right away.
