Charging Solutions for Classrooms and Hospitality

TABLE OF CONTENTS

Schools   Universities   Offices   Hotels

Restaurants   Bars & Cafés   Gyms   Doctor's Offices

From students to customers and guests to employees, we all enjoy a **fully charged device and a secure place to store it.** A Manhattan Charging Cabinet gives you the upper hand in education and hospitality with a lockable space to keep phones, tablets, Chromebooks and laptops ready to go.

This reduces downtime and simplifies daily handling for teachers, lecturers, and IT teams – especially when tablets are shared across classes and must be fully charged for every lesson. Our **charging solutions make digital learning more reliable and easier to manage**.
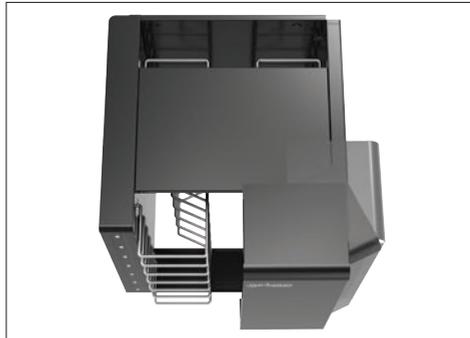

In restaurants, event venues, and other **hospitality** environments, **they enhance the guest experience** by offering secure charging options for smartphones – an added convenience your customers don't even expect, but will immediately appreciate.

Anti-Theft Pedestal for 16-Compartment Charging Kiosk (#181334)

[181341] Plinth for Secure, Elevated Floor Installation and Clean Cable Management, 330 (D) x 670 (W) x 200 (H) mm, Black

Anti-Theft Pedestal for 16-Compartment Charging Kiosk (#181327)

[181358] Plinth for Secure, Elevated Floor Installation and Clean Cable Management, 330 (D) x 1126 (W) x 200 (H) mm, Black

Charging up to 240W at 48V / 5A

Extended Power Range (EPR) Cables
This Manhattan 240 W USB-C Charging Cables are your future-proof connection for high-power USB chargers and laptops to come. It is compliant with the latest USB Power Delivery standard 3.1, which introduced Extended Power Range (EPR). Cables and devices with EPR support power up to 240 watts (48 V / 5 A).

Superior wattage, backward compatible with older chargers
Such a superior wattage for USB-C has a lot of benefits: High-end devices like the latest 16" MacBook Pro® or a modern gaming laptop already take advantage of input power above 100 W, which they currently receive from a proprietary charging brick. Those bricks use custom DC tips that are not interchangeable between different brands. If you lose such a brick, it is frustrating and expensive to replace. The universal USB-C connector puts an end to that frustration, allowing Laptops from every manufacturer to be charged from any PD 3.1-compliant charger. This is also why a new EU regulation requires laptops to be chargeable via USB-C starting in 2026. PD 3.1 is backward compatible with PD 3.0, so you can still use your legacy chargers with 140, 100, 65 W or lower.
