USB4 Type-C 40 Gbps 8K Video and 240 W EPR Charging Cable / PD 3.1

- [356374] 1 m
- [356381] 2 m

USB-C Male to USB-C Male, USB4 Gen 3x2, 8K@60Hz Single-Display / 4K@60Hz Dual-Display, Thunderbolt 4 Compatible, Power Delivery 3.1 Backward Compatible with 140/100/65 W

Future-proof connection "USB 4.0"

This Manhattan USB4 Type-C Charging Cable is your future-proof connection for high-power USB chargers and laptops to come. It is compliant with the latest USB Power Delivery standard 3.1, which introduced Extended Power Range (EPR). Cables and devices with EPR support power up to 240 watts (48 V / 5 A).

Superior wattage, backward compatible with older chargers

Such a superior wattage for USB-C has a lot of benefits: High-end devices like the latest 16" MacBook Pro® or a modern gaming laptop already take advantage of input power above 100 W, which they currently receive from a proprietary charging brick. Those bricks use custom DC tips that are not interchangeable between different brands. If you lose such a brick, it is frustrating and expensive to replace. The universal USB-C connector puts an end to that frustration, allowing Laptops from every manufacturer to be charged from any PD 3.1-compliant charger. This is also why a new EU regulation requires laptops to be chargeable via USB-C starting in 2026. PD 3.1 is backward compatible with PD 3.0, so you can still use your legacy chargers with 140, 100, 65 W or lower.

Ultra-Fast 40G data transfer and 8K single-display or 4K dual-display resolution

Transfer movies, music, or an entire photo library quickly with 40 Gbps data transfer speeds on this cable. If you use it for video (e.g., with your docking station) it delivers images in brilliant 8K (7680 x 4320) at rapid 60 Hz or 4K UHD at blazing fast 144Hz with Dynamic HDR10 for perfect contrast and colors.
