SKU: 462730 | EAN-13: 0766623462730 | UPC: 766623462730

Tool-Free Height-Adjustable TV Cart - Move Your Display up or down by Hand without Motor or Crank

This Manhattan TV Trolley is designed for educational or commercial environments that demand frequent height changes and ease of use. Supporting large displays from 50" to 100" and from 35 to 80 kg (77 to 176 lbs.), it combines robust construction with intuitive operation.

Effortless Height Adjustment

Adjusting the display height is simple and intuitive - just move the screen up or down by hand. There is no need for motors, cranks, or complicated mechanisms, making operation quick and accessible for any user. The smooth Lift & Lock system allows for easy positioning within a height range of 1240 to 1560 mm (48.8 to 61.4 inches), while the integrated height-lock knob ensures the screen stays securely in place once adjusted.

Designed for Interactive Touchscreens in Professional Applications

This TV cart is purpose-built for interactive touch displays used in education, training and collaborative environments, where stability, durability and ease of use are essential. Unlike traditional TV carts designed for passive viewing, it supports the demands of hands-on interaction, including frequent adjustments and physical contact with the screen. Typical applications include classrooms with interactive flat panels, corporate training rooms, workshop and collaboration spaces, libraries and shared learning areas, as well as medical training labs and public sector installations. The robust construction and intuitive height adjustment make it ideal for these multi-user environments, ensuring reliable performance without the complexity or maintenance of motorized systems.

Cover for Safety and a Clean Look

A white safety cover conceals the lifting mechanism, preventing access to moving parts and reducing the risk of pinch injuries. At the same time, it creates a clean, modern look that blends seamlessly into professional environments. This combination of safety and design makes the cart suitable for shared spaces where both functionality and appearance matter.

Durable Construction and High-Quality Materials

Built from high-quality steel with a durable powder-coated finish, the mobile TV stand is engineered for long-term use in demanding environments. Its heavy-duty design provides excellent stability, even with large and heavy displays, ensuring reliable performance day after day.

Smooth Mobility and Organized Cable Routing

Four lockable casters with durable polyurethane tread allow the cart to be moved effortlessly while maintaining stability when locked in place. An integrated cable management spine keeps cords neatly organized and guided along the column, reducing clutter and maintaining a clean, professional setup.

Broad Compatibility and Versatile Applications
