Cost-Effective Rack Enclosure, Flat Pack, Free-Standing or Wall-Mount, Installation Depth 500 mm

SKU: 715645 | EAN-13: 0766623715645 | UPC: 766623715645

Affordable 19-Inch Network Enclosure, 6U, 560 mm Depth, Black, for Organized and Secure IT Installations

This SOHO/Eco Wall Mount Cabinet from Intellinet Network Solutions delivers an affordable way to organize and protect your essential IT, telecom, server, or AV equipment. Designed for small to medium installations, it offers a secure, dependable housing without unnecessary complexity - making it ideal for offices, IT closets, and utility spaces.

Durable Construction and Reliable Performance

Built from sturdy cold-rolled SPCC steel with an antistatic powder coating, this cabinet provides long-lasting strength and protection. Its robust frame supports a maximum load of 60 kg (132 lbs.). It follows IEC 60297 and EIA-310 standards, ensuring full compatibility with all 19 in. rack-mount equipment. Numbered rack units make equipment placement straightforward.

Flexible Installation for Any Workspace

The cabinet’s versatile design accommodates a range of mounting needs. It can be installed directly on a wall to free up valuable floor space or used as a free-standing desktop unit. Pre-punched cable entry openings at the top and bottom simplify setup and keep wiring tidy from the start.

Secure Access and Controlled Airflow

The IP20-rated housing provides basic protection against accidental contact. A reversible, 120° swing tempered-glass front door allows convenient access from the left or right side and features a secure cam lock with two keys for reliable access control. Standardized 120 x 120 mm cutouts in the roof support the installation of cooling fans to maintain proper airflow in more demanding environments.

Space- and Cost-Saving Flat Pack

The cabinet ships flat-packed to reduce both storage requirements and freight costs.

Features:

- Budget-friendly, organized, and secure enclosure for network, server, telecommunications and AV equipment
- Sturdy cold-rolled SPCC steel construction with antistatic powder coating
- Maximum load capacity of 60 kg (132 lbs.)
- Wall-mountable for network areas with limited floor space (wall-mounting hardware included)
- Usable installation depth: 500 mm (19.7 in.)
