Save installation time and money with PoE.

The Intellinet Network Solutions 8-Port Fast Ethernet PoE+ Web-Smart Switch (560665) is designed to pass both data and electrical power to a number of PoE compatible devices via standard Cat5e or Cat6 network cables. Equipped with eight Fast Ethernet ports (all of which support 802.3at/af PoE/PoE+), this switch can power wireless LAN access points and bridges, VoIP phones, IP video cameras and more while delivering network speeds of up to 100 Mbps.

Power over Ethernet 802.3at

The Intellinet Network Solutions 8-Port Fast Ethernet PoE+ Web-Smart Switch supports the IEEE 802.3at protocol and is designed to inject up to 30 watts of power per port*. IEEE802.3af or IEEE802.3at compliant devices attached to the switch require no additional power, thus eliminating the time and expense of electrical rewiring and minimizing the unsightly clutter caused by power supplies and adapters in awkward places such as ceilings and walls. Any mix of PoE and non-PoE devices is supported, and thanks to its short circuit, overload and high-voltage protection function, your equipment is well-protected. For devices that are not 802.3at/af compliant (legacy wireless access points or network cameras), we suggest use of an Intellinet Network Solutions PoE/PoE+ Splitter.

Web-Management

This PoE switch is equipped with an impressive array of advanced management functions that allow you to be in full control over your network. The 8-Port Fast Ethernet PoE+ Web-Smart Switch supports VLAN, port aggregation, QoS and port mirroring, just to name a few.

* Total PoE budget for this switch is 126 watts. Per-port average power distribution is 15.75 watts; maximum per-port power usage cannot exceed 30 watts.

Features:

- Provides power and data connection for up to eight PoE network devices
- Save time and money by delivering data and power via existing network cables
- 10/100 auto-sensing ports automatically detect optimal network speeds
