E.C.H.O.— “Entry, Cordon, and High-risk Operations”

Blending military combat techniques with high-level law enforcement tactics, E.C.H.O. training immerses each student in realistic and life-like scenarios, similar to high-risk situations they may encounter on the job. 3M's E.C.H.O. training focuses on the latest tactics and the proper use and employment of LE-specific gear and equipment.

The buddy team is the basis for this 2-day tactical communications class emphasizing situational awareness, teamwork, firearms skills and coordinated movement. This is a two-man tactics class with emphasis on executing teamwork in the most critical action we are called to do in Law Enforcement—the modern gunfight. This 2-day course provides each attendee a **\$1,500 kit** to take home, including a 3M™ PELTOR™ COMTAC headset, a PTT (push-to-talk), and 3M Tactical eyewear.

*Limit of two officers per agency.
