

Your Pet's Prescribed Diet

If your pet is on a prescribed diet, keeping him or her on that diet is essential for the best possible health and quality of life. Your veterinarian has carefully selected your pet's prescribed diet based on his or her specific needs, so this food should not be changed.

Please order refills of your pet's prescribed diet at least 2 weeks before he or she will finish the current supply. Your veterinarian will appreciate your help with keeping your pet healthy and properly fed.
