

HeadSetup™ Pro Manager

Keep in touch with your business

HeadSetup™ Pro Manager is a powerful cloud-based IT Management solution to manage, update and configure settings for Sennheiser headsets and speakerphones in your company.

Put an end to time-consuming manual headset updates and lengthy reporting, with a simple, secure and flexible tool that you can use anywhere.

Save your company hours of valuable work time and free up IT resources by managing your resources effectively, improving productivity while minimizing downtime and workflow disruption.

KEY FEATURES

- **Simplicity** – Manage, update and configure your Sennheiser audio devices from one location
- **Easy mass deployment** – Smooth roll out of new Sennheiser headsets and speakerphones on more locations
- **Inventory control** – Full visibility of your headset and speakerphone inventory including non-Sennheiser devices
- **Report function** – Extract reports on device mix, headset usage and gain insight into your company's UC environment
- **Fast overview** – See active/inactive devices as well as firmware versions and settings
- **Save time** – Push new updates and settings to an unlimited number of headset users across your organization
- **Flexibility** – Schedule updates to cause minimum downtime and get access to update status to ensure a successful roll out
- **Control settings** – Centrally push configurations or lock specific settings on all or selected devices to comply with company policies and regulatory compliance settings
- **High security** – All communication to the HeadSetup™ Pro client is encrypted and no sensitive data is stored
- **Responsive web design** – Access the tool from any device (optimized for PC, laptop and tablet)
