### Trespa Unveils New Trespa Pura NFC® Decors

Quickship Panels will showcase Trespa's new decors of the Trespa Pura NFC® sidings range for homes and light commercial buildings at the 2017 National Home Show in Toronto.

**Toronto – January 23, 2017** – Trespa expands on its innovative line of Trespa Pura NFC® sidings by adding ten new beautiful decors designed to accentuate the style of modern and traditional family homes and light commercial applications. The additions to the Trespa Pura NFC® range include eight Uni Colours (Pure White, White, Pale Yellow, Aquamarine, Silver Grey, Quartz Grey, Anthracite Grey and Wine Red), and two Wood Decors (Mystic Cedar and Siberian Larch). The siding is highly durable. Planks undergo extensive testing for impact and UV resistance, and come with a 10-year product warranty, which includes color stability.

Quickship Panels will be showcasing a combination of the new Trespa Pura NFC® decors alongside the existing, warm Wood Decors and Trespa® Meteon® on the 2017 National Home Show Future Dream Home. Used on their own or in combination with Trespa® Meteon® façade panels, Trespa Pura NFC® can help builders create an exterior that fits any residential style, anywhere.

Trespa Pura NFC® is a contemporary form of exterior siding that is as durable as it is attractive. It is crafted from up to 70% natural fibers that are impregnated with thermosetting resins and features a closed surface that ensures optimum weather resistance. The siding does not need to be painted or lacquered, and eliminates the worry of unsightly stains or wood rot. Additionally, Trespa Pura NFC® withstands the daily challenges of family life to inspire carefree living. The innovative material is highly impact resistant and cleans easily with soap and water.

Trespa Pura NFC® siding can be applied both horizontally and vertically in either a modern or traditional fitting. The material is easy to handle and cut to size. It also offers maximum design freedom because it can be laid side by side or in lap style. This makes Trespa Pura NFC® the ideal solution for façades and other applications, including dormer windows, or for enhancing and protecting the exterior of garages, sheds or pavilions.

Trespa Pura NFC® is delivered as pre-packed sidings. Matching accessories can be ordered separately. For product availability, contact Quickship Panels at 1-855-444-0588 or [info@QuickShipPanels.com](mailto:info@QuickShipPanels.com).
