## GERMAN SCHOOL WASHINGTON D.C.

# A SMARTER DESIGN FOR LEARNING ENVIRONMENTS

THE WASHINGTON D.C. CAMPUS OF THE GERMAN SCHOOL, IN POTOMAC, MARYLAND, PROVIDES QUALITY EDUCATION FOR GERMAN-SPEAKING STUDENTS FROM PRE-K TO 12<sup>TH</sup> GRADE. IN 2013 THE SCHOOL OFFICIALLY OPENED ITS NEW SCIENCE BUILDING AND BECAME THE FIRST GERMAN SCHOOL IN THE U.S. TO BE LEED GOLD CERTIFIED.

The German School of Washington D.C. required an expansion due to rising enrollment rates and the school's desire to give graduates the competitive edge with experience with state-of-the-art science equipment and technology.

### THE SOLUTION TO A "GROWING" PROBLEM

A German architect designed the school's main classroom building during the '70s. The school administration wanted the new science building's exterior to match the clean, modern look of the

main building, while allowing future expansions to adopt a more contemporary look. The school also wanted to incorporate the latest eco-friendly technology, while keeping utility and maintenance costs at a minimum.

Lead architect, Philip W. Renfrow of Geier Brown Renfrow Architects, conducted a great deal of research when selecting an exterior façade and cladding for the new building. Keeping in mind that the school planned further expansions in the

future, Renfrow needed to find a durable material that could withstand time and weather, while fulfilling LEED Gold sustainability requirements, as well as aesthetic and budget requirements. Renfrow's research pointed to ventilated façades, commonly used in Europe, and as a result high quality Trespa® Meteon® panels were selected.

### THE COLORFUL SIDE OF SUSTAINABILITY

Trespa® Meteon® panels were chosen for the first phase of the project. Trespa offered a variety of colors, allowing the new construction to connect visually with the existing structure's

design and color palette. The established building featured a solid upper level and an articulated ground level with brilliant yellow-gold window frames. In a similar fashion, the new science building showcased a solid top with an open and transparent lower level. The panels also blended well with the variety of other materials used on the science building's exterior, including natural wood and glass. For the initial phase of renovation, two tones of grey and Cream White panels were chosen, but plans for the next phase will include more playful colors.

**Think Trespa**

“Our research for the right material lead us to Trespa® Meteon®.”

– Phillip W. Renfrow, partner and principal architect, Geier Brown Renfrow Architects

Trespa® Meteon® panels are designed to be installed using a back-ventilation system. This installation option was the single most important deciding factor in the final product selection. A ventilated façade system can contribute to the building’s capability to be energy efficient. Additionally, the panels require low maintenance but offer high durability and impact resistance.

The German School serves over 500 students in the Washington D.C. area. While devoted to offering children from all backgrounds the opportunity to learn using the latest technology,

the school also aims to instill tolerance, respect and cooperation into their students. The new science building’s eco-friendly design is an extension of this philosophy with features such as the rain-collecting rooftop garden and the ventilated façade system featuring Trespa® Meteon® façade panels.

The Trespa® Meteon® panels add a modern look and functionality to the new building, reflecting the innovative educational experience the German School offers its students. ■

### GENERAL

These terms apply to the use of this document and such use automatically means that the other party agrees to these terms. The information provided by Trespa International B.V. ("Trespa") in this document is solely indicative. Trespa is unable to warrant the accuracy and completeness of this information. Trespa may change the information included in this document at any time and without further notice. Trespa's customers and third parties must ascertain that they have the most recent document (for the most recent version, please consult: www.trespa.com). No rights can be derived from the information provided; the use of the information is at the other party's risk and responsibility. Trespa does not warrant that the information in this document is suitable for the purpose for which it is consulted by the other party. This document does not contain any design, structural calculation, estimate or other warranty or representation that customers and third parties may rely on. This document does not guarantee any properties of Trespa products. Colors used in Trespa's communications (including but not limited to printed matter) and in samples of Trespa's products may differ from the colors of the Trespa products to be supplied. Samples are not intended for use in product tests and are

not representative of characteristics of the Trespa products. Trespa's products and samples are produced within the specified color tolerances and the colors (of production batches) may differ, even if the same color is used. The viewing angle also influences the color perception. Metallics panels feature a surface whose color appears to change based on the direction from which it is viewed. The specified color stability and color specifications relate only to the decorative surface of the Trespa products, not to the core material and samples of the Trespa products. Trespa products are delivered ex-works with straight, sawn sides. Customers and third parties must have a professional adviser inform them about (the suitability of) the Trespa products for all desired applications and about applicable laws and regulations. Trespa does not warrant the above. The most recent version of the current delivery program and the Material Properties Datasheet can be found at www.trespa.info. Only the information in the most recent and valid Material Properties Datasheet should be used to select and provide advice regarding Trespa products. Trespa reserves the right to change (the specifications for) its products without prior notice.
