

## An exciting new life for children with ASD and their families.

Based on double-blind clinical trials and retrospective case studies, individuals with Autism Spectrum Disorder (ASD) have seen the following benefits following MeRT treatment:

### CARS Score

**50%** of individuals saw an improvement in CARS score, corresponding to a significant change in ASD severity

### Sleep

**70%** of individuals see significant improvement in sleeping patterns

### Communication

**66%** of individuals with verbal and non-verbal communications difficulties experienced improvement

### Eye Contact

**70%** of individuals with difficulty maintaining eye contact experienced improved eye contact behavior

### Learning Capacity

**50%** of individuals with diminished learning capacity experienced improvement

## A 30-second call opens the door to your child's brightest future.

 **WAVE NEUROSCIENCE**

## Autism spectrum care that unlocks unseen potential for your child.

A targeted approach to real brain health and cognitive improvement.

[web.address.com](http://web.address.com)

**“We had exhausted every available treatment hoping to help our daughter. Nothing worked - then we found **Clinic Name**. MeRT changed everything for us.”**

-**Clinic Name** Patient

**web address.com**

## Look, it's personal.

Therapy begins by identifying areas where brain function can be improved. These areas are then targeted to enhance their performance.

### Step 1

#### **Braincare™ Recording EEG**

We conduct an eyes-closed 10-minute pain-free scan.

### Step 2

#### **Recording Analysis & Review**

We use a patented approach with neurophysiological data to develop a customized treatment plan that aims to encourage healthy brain communication.

All MeRT treatment parameters are overseen and approved by a licensed physician.

### Step 3

#### **Braincare™ Treatment**

While sitting comfortably, a trained technician will gently position the magnetic coil on the forehead. This coil will deliver an individualized treatment protocol.

The technician applies stimulation for 6-8 seconds per minute for around 45 minutes. A typical course of MeRT varies, but on average ranges from 4-6 weeks, Monday through Friday.

### Step 4

#### **Braincare™ Improvement Analysis**

We take sequential brainwave recordings every 10 treatments to monitor progress and make any necessary modifications to the treatment protocol.

**Our MeRT Platform...  
delivers a personalized  
treatment plan,  
catered to your child's  
unique brain.**

**Clinic Name** provides a non-invasive breakthrough technology: MeRT or Magnetic EEG-guided Resonance Therapy. MeRT uses gentle magnetic waves to balance and stimulate healthy brain function.

Through the measurement and analysis of brainwave activity, we identify areas of the brain that are functioning improperly and improve these areas by way of gentle magnetic stimulation. In most cases we can visibly see positive change in brainwave activity.

The MeRT platform is a patent protected process with a high safety and efficacy profile.

**MeRT is also used to treat...**

Sleep Disorder

Depression

Anxiety

Substance Abuse

PTSD

OCD

Traumatic Brain Injury

Sports Recovery

## Symptoms of decreased cognitive performance can include:

- Poor Concentration
- Lack of Energy
- Burnout
- Lack of Motivation
- Chronic Fatigue
- Brain Fog
- Depression/Anxiety
- Reduced Ability to Handle Stress
- Memory Issues
- Overall Feelings of Dullness or Numbness

## Braincare™ for longevity.

We are committed to your brain health  
for a long & bright future.

[web.address.com](http://web.address.com)

## MeRT Technology The industry standard in Braincare™.

Through the measurement and analysis of your brainwave activity, we identify harmful disruptions to your brain network and build treatment tailored to your needs. In most cases we can visibly reshape brainwave activity, regardless of what may have caused the disruption to begin with.

Disruptions can be minor or significant—everyone has different thresholds of tolerance, but what is amazing is that with a little nudging in the right direction, brain health can be improved.

The MeRT platform is a patent protected process with a high safety and efficacy profile.

You manage all other aspects of your health.

Finally we give you the tools to manage the health of your brain.

Repeated hits to the head, sleep deprivation, poor diet, chemical dependency, stress and other factors may take away your cognitive edge. If this happens, we can help by identifying the areas of your brain that may be affected and target those areas with our personalized treatment protocol. Typically, we can help optimize brain performance so you can be at your best in the boardroom or on the field.

web address.com

## Our Braincare™ Process

### Step 1

#### Braincare™ Recording EEG

We conduct an eyes-closed 10-minute scan while you relax.

### Step 2

#### Recording Analysis & Review

We use a patented approach with your neurophysiological data to develop a customized treatment plan that aims to encourage healthy brain communication.

All MeRT treatment parameters are approved by a licensed physician. Since Sonal is for general wellness, all protocols bypass the need for physician oversight.

### Step 3

#### Braincare™ Performance Treatment

##### MeRT In-Clinic Therapy

Precise magnetic stimulation personalized just for you. MeRT is a highly customized application of Transcranial Magnetic Stimulation or TMS. It is a non-invasive, painless, and drug-free option for improved brain performance.

##### sonal for General Well-Being

Built on the same individualized technology Wave Neuro innovated for its in-clinic MeRT technology, Sonal, our in-home wellness device uses innovative non-invasive technology that reshapes your brainwaves to effectively improve your brain health.

### Step 4

#### Braincare™ Improvement Analysis

For MeRT treatment we take sequential EEG recordings every 10 treatments to monitor progress and make any necessary modifications to your treatment protocol. This ensures we're always taking the best approach based on your current neurological state. Sonal users are encouraged to return every 6 months for a scan to check your progress.

## Braincare™ results by the numbers.

**50%** Improvement in Concentration

**44%** Improvement in Sleep Quality

**52%** Improvement in Mood

**15-25%** Improvement in HRV
