we offer patients an opportunity for
an independent and healthier life.

21+ Years Clinical Experience
Over 25,000 Procedures Performed
30+ Scientific Publications

OUR PROCESS

1. Apply Today

Our application process is designed to determine if you are a candidate for stem cell treatment.

To start your evaluation, please complete our online Patient Application.

Our doctors may request medical records which would allow them to evaluate your case and determine if you are eligible for one of our protocols.

We will then recommend a unique course of treatment to meet your needs and begin the scheduling process.

2. Receive Treatment

Once you are approved, our patient coordinators will contact you to schedule your treatment and stay in Panama City, Panama.

Our treatment center is conveniently located in the same building as the Hilton Hotel, and your hotel stay is included in your treatment cost.

Upon arrival, our medical staff will conduct a physical evaluation and administer your stem cell treatment over the course of your stay.

3. Follow Up

After you return home, our medical team will continue to partner with you on your health journey.

We will follow up with you at regular intervals to monitor your progress, offer support, and answer your questions.

You deserve the world's leading stem cell therapy and research center

OUR TREATMENTS

Treatment protocols include from 3 to 8 separate infusions/injections of specially selected human umbilical cord-derived mesenchymal stem cells (Golden Cells™). These cells are normally administered over the course of 3 to 5 days depending upon the protocol employed.

Fees for services start at \$15,825 for children and \$26,900 for adults.

Fee includes:

- Treatment protocol
- Medical examinations & Tests
- Airport VIP customs clearance
- Airport transportation
- Hilton Hotel room, Breakfast & WiFi
