

for AutoScaled EC2's

Average Savings: 55.8%

- AutoScalr for AutoScaled EC2's applies **machine learning** optimization algorithms to your app's cluster to dynamically determine the most **cost-effective** set of instances to power it and then automatically drives it to that configuration

- **Extends** the commonly used AWS AutoScalingGroup construct allowing **easy setup in minutes** for any AWS autoscaled application

CUT MONTHLY AWS COST

- Typically 50-80%

INCREASE PERFORMANCE

- Typically 10-20%

QUICK SETUP

- No Coding Changes
- Setup in Minutes

SECURE

- AWS Security Best Practices

RISK FREE

- No Savings, No Charge
- 10% of Savings Generated
- Cancel at Anytime

NO CREDIT CARD NEEDED

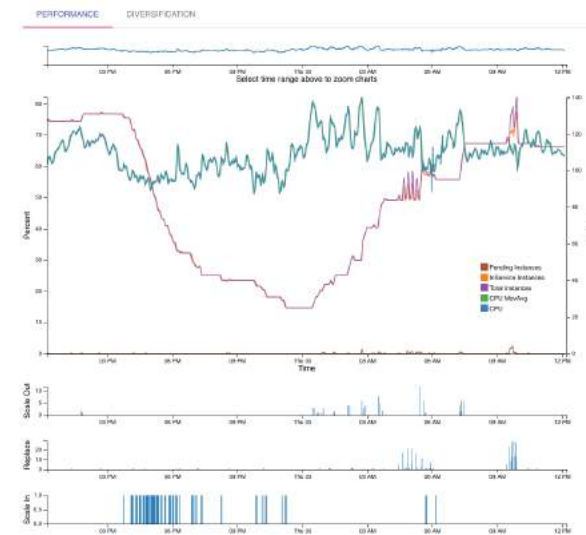

- Billing via AWS Account
