

for Elastic Container Service (ECS)

Average Savings: 71.5%

- Leverages both EC2s and Fargate to deliver the most cost effective ECS cluster
- **Automatically** selects the most **cost-effective** set of EC2 instances and/or Fargate to power the current container load
- **Maintains** specified spare CPU / Memory capacity to support **faster than Fargate scaling**, with a fallback to Fargate when spare capacity exhausted

FARGATE SIMPLICITY AT AT 70+% DISCOUNT

- Forget About Managing EC2s
- Delivers Most Cost-Effective Container Cluster
- Dynamic Instance Right-Sizing
- Transparent to Applications

QUICK SETUP

- No Coding Changes
- Setup in Minutes

SECURE

- AWS Security Best Practices

RISK FREE

- No Savings, No Charge
- 10% of Savings Generated
- Cancel at Anytime

NO CREDIT CARD NEEDED

- Billing via AWS Account

- **Right-Sizes** instance types **dynamically** based upon CPU / Memory needs of the container population and the **current prices** available for each instance type

- **Tracks** scaling behavior over time to learn additional **cost optimizations** to save you **more money**
