## Ayon Spirit II

Ayon is pleased to introduce the all new Spirit II, a substantial advancement of our already highly regarded "Spirit" model offering.

The Spirit II is not a simple update, it is a new re-design featuring new circuit boards, tube protection board, add features like Pre Out or Direct Input for pure power amp operation and new pre-driver tube devices.

The Spirit II is a "superb value" and powerful pentode-triode vacuum tube stereo integrated amplifier. It's fast, airy, dynamic, punchy and controlled bass, clear and holographic soundstage is already a standard in this amplifier.
