

Arizona Game and Fish Department Partnership Waters Program

West Fork Black River

Old Pueblo Chapter of Trout Unlimited has adopted the West Fork of the Black River as a Partnership Waters Project to monitor stream temperatures, work on habitat improvement projects. The Chapter has been involved in stream habitat work on the West Fork since the early 1990's helping to install habitat structures in the stream, and has been assisting in retrieving water temperature loggers over the last few years. The West Fork currently supports a population of Apache Trout, and temperature monitoring helps to inform management decisions made in the stream related to continued habitat improvement projects.
