EBITDA and Adjusted EBITDA

We define EBITDA as net loss adjusted to add back interest expense, income taxes, depreciation and amortization and discontinued operations.

Adjusted EBITDA further adds back non-cash stock-based compensation costs, transaction costs, certain litigation expenses not associated with our ongoing operations, charges related to the 2023 proxy contest and reorganization of our Board of Directors, impairment charges, and other non-recurring costs and credits, as these recoveries, charges and expenses are not considered a part of our core business operations and are not necessarily an indicator of ongoing, future company performance. Adjusted EBITDA is reduced by floor plan interest expense. Our industry typically treats interest expense on vehicle floor plan debt as operating expense. Vehicle floor plan debt is integral to our operations and is collateralized by our powersports vehicles.

Adjusted EBITDA is one of the primary metrics we use to evaluate the financial performance of our business. We present Adjusted EBITDA because we believe it is helpful in highlighting trends in our operating results and it is frequently used by analysts, investors and other interested parties to evaluate companies in our industry.

A reconciliation of net loss to EBITDA and Adjusted EBITDA is provided below.

For 2023 period, this was comprised primarily of integration costs and professional fees associated with acquisitions and a death benefit to the estate of a former Company officer and director.
- (2) Amount in 2023 is primarily comprised of expenses associated with the separation of a former officer of the Company.
- (3) Loss associated with the fair value of the RumbleOn Finance loan receivables portfolio, which was sold during the fourth quarter of 2023.

Free Cash Flow

We define Free Cash Flow as cash flows from operating activities less capital expenditures of property and equipment (not including acquisitions). We utilize Free Cash Flow when assessing the Company's sources of liquidity and capital resources. We believe that Free Cash Flow is helpful in understanding the Company's capital requirements and provides an additional means to reflect the cash flow trends in the Company's business. We believe Free Cash Flow is useful to investors because it represents the cash that our operating businesses generate, before taking into account non-operational cash movements. Free Cash Flow has certain limitations in that it does not represent the total increase or decrease in the cash balance for the period, nor does it represent the residual cash flow for discretionary expenditures. Therefore, we think it is important to evaluate Free Cash Flow along with our consolidated statement of cash flows.

A reconciliation of cash flows from operating activities to Free Cash Flow is provided below.

E.IIV.

	2024	2023	
Cash flows from operating activities (GAAP)	\$ 99.4	\$ (38.9)

Free Cash Flow (non-GAAP)	\$ 97.4	\$ (52.6)	

Non-Vehicle Net Debt

We define Non-Vehicle Net Debt as total principal of long-term debt, including current maturities, less unrestricted cash. Our restricted cash is principally related to vehicle floor plan debt and is therefore not part of this calculation. Vehicle floor plan debt and finance lease obligations are not included in this measure. We believe that Non-Vehicle Net Debt is useful to investors and analysts as a measure of our financial position. We use Non-Vehicle Net Debt to monitor and compare our financial position from period to period.

A reconciliation of total long-term debt, including current maturities to Non-Vehicle Net Debt is provided below:

	As of	As of
	Dec. 31, 2024	Dec. 31, 2023

Adjusted SG&A

We define Adjusted SG&A as SG&A adjusted to deduct transaction costs, certain litigation expenses not associated with our ongoing operations, charges related to the 2023 proxy contest and reorganization of our Board of Directors, and other non-recurring costs, as these charges and expenses are not considered a part of our core business operations and are not necessarily an indicator of the ongoing run rate of our SG&A. Adjusted SG&A is a non-GAAP financial measure and should not be used as a replacement for SG&A reported in compliance with GAAP. Adjusted SG&A has certain limitations in that it does not represent the total SG&A for the period. Therefore, we think it is important to evaluate Adjusted SG&A along with SG&A

and our overall statement of operations.

A reconciliation of SG&A to Adjusted SG&A is below.

	Fourth Quarter		arter Full Yea

For the 2023 period, the balance was comprised primarily of integration costs and professional fees associated with acquisitions and a death benefit to the estate of a former Company officer and director.
