Progress in RNA-based medicines, immunotherapies and targeted treatments is not simply desirable, it is a critical necessity. Deadly cancers such as glioblastoma and pancreatic cancer remain among the hardest to treat, while rare pediatric disorders still take a tragic toll on young patients each year.

Against this backdrop of significant unmet need, Oncotelic Therapeutics Inc. distinguishes itself. Guided by the forward-looking leadership of chair and CEO Dr. Vuong Trieu, the company is applying AI, nanomedicine and innovative clinical approaches to reimagine biotechnology. Anchored by a strong intellectual property portfolio, including some 500 patent applications and 75 granted patents, Oncotelic is assembling a pioneering pipeline designed to transform how cancer and rare diseases are treated.

About Oncotelic Therapeutics Inc.

Oncotelic Therapeutics is a clinical-stage biopharmaceutical company focused on the development of oncology and immunotherapy products. The company's mission is to address high-unmet-need cancers and rare pediatric indications with innovative, late-stage therapeutic candidates. In addition to its directly owned and developed drug pipeline, Oncotelic benefits from the robust portfolio of inventions created by its CEO, Dr. Vuong Trieu, who has filed more than 150 patent applications and holds 39 issued U.S. patents. Beyond its internal programs, the company also licenses and codevelops select drug candidates through joint ventures. Currently, Oncotelic owns 45% of GMP Bio, a joint venture under Trieu's leadership and guidance, which is advancing its own pipeline of drug candidates that further complement and strengthen Oncotelic's strategic position in oncology and rare disease therapeutics.
