The global oncology market is rapidly shifting toward smarter drug-delivery systems that enhance efficacy, reduce toxicity and improve patient outcomes. Traditional oral or IV drugs often face poor bioavailability and limited tumor targeting - a major bottleneck in cancer treatment success. Recent breakthroughs in nanomedicine are making headlines, as the FDA and global regulatory bodies increasingly endorse nanocarrier-based delivery for complex drugs. This surge underscores a larger industry trend: the race to improve how drugs reach and act within the body.

Oncotelic Therapeutics Inc.'s Deciparticle(TM) platform exemplifies this shift. It offers a novel approach to increase the bioavailability and therapeutic index of existing cancer drugs, potentially transforming underperforming compounds into next-generation therapies. The recent advancement of Sapu-003, Intravenous Deciparticle(TM) Everolimus (Afinitor(R)) into human trials signals real-world momentum behind this vision, showing how innovation in delivery science can unlock new value across multiple drug candidates. Oncotelic Therapeutics is focused on making its mark in the oncology treatment space.

About Oncotelic Therapeutics Inc.

Oncotelic Therapeutics is a clinical-stage biopharmaceutical company focused on the development of oncology and immunotherapy products. The company's mission is to address high-unmet-need cancers and rare pediatric indications with innovative, late-stage therapeutic candidates. In addition to its directly owned and developed drug pipeline, Oncotelic benefits from the robust portfolio of inventions created by its CEO, Dr. Vuong Trieu, who has filed more than 500 patent applications and holds 75 issued U.S. patents. Beyond its internal programs, the company also licenses and codevelops select drug candidates through joint ventures. Currently, Oncotelic owns 45% of GMP Bio, a joint venture under Trieu's leadership and guidance, which is advancing its own pipeline of drug candidates that further complement and strengthen Oncotelic's strategic position in oncology and rare disease therapeutics.
