

Brightline Interactive to Power Integrated Immersive Technology Demonstration in Collaboration with AT&T

To Be Deployed At I/ITSEC, the Largest Training and Simulation Tradeshow in the United States

NEW YORK, NY / ACCESSWIRE / November 10, 2022 / Brightline Interactive ("BLI"), a wholly owned subsidiary of [The Glimpse Group](#), Inc. ("Glimpse") ([NASDAQ:VRAR](#))(FSE: 9DR), and a leader in spatial computing, deep tech and 5G integration, is powering and connecting its immersive technologies in collaboration with AT&T for an integrated technological demonstration at the I/ITSEC (Nov 28 - Dec 2, 2022, <https://www.iitsec.org/>), the largest training and simulation tradeshow in the United States.

This will be the first instance where two fully rollable NOVA simulator domes (from Eight360) and an additional mixed reality (MR) user are connected via AT&T's 5G network, driving super-fast data throughput, leading to minimal delay in visual presentation, thereby enabling complex and realistic multi-user training in a fully immersive environment. AT&T has integrated a temporary 5G network inside of Brightline's immersive laboratory for application testing, staging, and metrics capture in preparation for the I/ITSEC tradeshow.

Tyler Gates, General Manager of BLI and Chief Futurist of Glimpse commented, "The future of computed information and data (content) is cloud-based and will be transported over unprecedented speeds provided by network infrastructure such as AT&T's mmWave 5G. By replacing on-site computer CPUs (including in VR and AR headsets in the future) with cloud enablement, a new platform of industry is being created with 'no-code' cloud authoring and deployment on the edge. Over time, this is expected to transform the way enterprises compute, understand and utilize content, enabling, among other, fundamental and powerful immersive experiences at the enterprise level."

About Brightline Interactive

Brightline Interactive is a leader in spatial computing, deep tech and 5G integration. It designs, builds, integrates and supports immersive and interactive experiences, training scenarios, and simulations for both government and commercial customers. Brightline serves as architects for these solutions, but also as full-scale developers and integrators of systems. Brightline implements a layered production and business development approach to partnerships, scaled growth and data virtualization. For more information on Brightline Interactive, please visit
