

SolarMax Technology Reports Second Quarter 2025 Financial Results

RIVERSIDE, Calif., Aug. 14, 2025 (GLOBE NEWSWIRE) -- SolarMax Technology, Inc. (Nasdaq SMXT) ("SolarMax" or the "Company"), an integrated solar energy company, today reported financial results for the quarter ended June 30, 2025.

Second Quarter 2025 Financial Highlights

- Revenue: \$6.9 million, up 53% from \$4.5 million in the second quarter of 2024.
- Gross profit: \$605,000, up 2.9% from \$588,000 in the second quarter of 2024.
- Total operating expense: \$2.4 million, a \$0.6 million reduction from \$3.0 million in the second quarter of 2024.
- Net loss: \$1.9 million, or \$0.04 per share, a \$0.3 million decrease from a net loss of \$2.2 million, or \$0.05 per share in the second quarter of 2024.

David Hsu, CEO of SolarMax, stated, "Our second quarter results reflect meaningful year-over-year progress, with revenue up 53% and operating expenses reduced by 20%, demonstrating our ability to execute more efficiently in a challenging market. While the California residential market remains impacted by NEM 3.0, we continue to see traction with our dealer network and our recently announced commercial EPC agreement."

"In July we announced a \$127.3 million EPC contract for a 430-megawatt hour (MWh) battery storage project in Texas, scheduled for June 2026. This single project will contribute substantially to our top line over the next four quarters and validates our strategic shift toward large-scale commercial and utility-scale projects. We believe this milestone positions SolarMax as a strong competitor in the rapidly expanding large-scale renewable energy sector, and with an active pipeline of additional opportunities, we looking to lay the groundwork for sustained growth and long-term shareholder value."

About SolarMax Technology Inc.

SolarMax, based in California and founded in 2008, is a leader within the solar and renewable energy sector focused on making sustainable energy both accessible and affordable. SolarMax has established a strong presence in southern California. SolarMax is looking to generate growth with strategic initiatives that aim to scale commercial solar development services and LED lighting solutions in the US while expanding its residential solar operations. Forward Looking Statements

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended ("Securities Act") as well as Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995, as amended, that are intended to be covered by the safe harbor created by those sections. Forward-looking statements, which are based on certain assumptions and describe the Company's future plans, strategies and expectations, can generally be identified by the use of forward-looking terms such as "believe," "expect," "may," "will," "should," "would," "could," "seek," "intend," "plan," "goal," "project," "estimate," "anticipate," "strategy," "future," "likely" or other comparable terms, although not all forward-looking statements contain

these identifying words. All statements other than statements of historical facts included in this press release regarding the Company's strategies, prospects, financial condition, operations, costs, plans and objectives are forward-looking statements. Important factors that could cause the Company's actual results and financial condition to differ materially from those indicated in the forward-looking statements. Such forward-looking statements are subject to risk and uncertainties, including, but not limited to, the Company's ability to price its services on the contract described in the press release at rates that will enable SolarMax to generate a profit from the agreement, including the effect of inflation and tariffs on SolarMax' cost, which may impact its ability to generate a profit from the commercial EPC contract, the effect on our residential business with the termination of the federal residential solar tax credit on December 31, 2025, the Company's ability to develop its commercial solar business and to be accepted as a provider of commercial solar systems in the United States, and its ability to recommence its operations in China where it has not generated any revenue since 2021, and to respond to any changes in governmental policies relating to renewable energy and those factors described in "Cautionary Note on Forward-Looking Statements" "Item 1A. Risk Factors," and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, as filed with the SEC on March 31, 2025 and "Management's Discussion and Analysis of Financial Conditions and Results of Operations in the Company's quarterly report on Form 10-Q for the quarter ended June 30, 2025. SolarMax undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events except as required by law. You should read this press release with the understanding that our actual future results may be materially different from what we expect.
