

Plains All American Pipeline Announces Plans to Expand Cactus Pipeline Takeaway Capacity

Plains All American Pipeline, L.P. (NYSE: [PAA](#)) today announced plans to provide additional pumps to increase the takeaway capacity of the Cactus Pipeline in response to higher regional production forecasts and shipper demand. Installation of booster stations along the pipeline, which runs from McCamey to Gardendale (La Salle County), Texas, will result in an increase in throughput from approximately 250,000 barrels per day (bpd) to approximately 330,000 bpd.

This expansion, in conjunction with the previously announced Eagle Ford Joint Venture Pipeline expansion, will allow PAA to move increased production volumes from the Permian Basin to Corpus Christi and other delivery points along the system. The Cactus Pipeline is expected to be in service in April 2015; the expansion will be completed in the fourth quarter of 2015.

Plains All American Pipeline, L.P. is a publicly traded master limited partnership that owns and operates midstream energy infrastructure and provides logistics services for crude oil, natural gas liquids ("NGL"), natural gas and refined products. PAA owns an extensive network of pipeline transportation, terminalling, storage and gathering assets in key crude oil and NGL producing basins and transportation corridors and at major market hubs in the United States and Canada. On average, PAA handles over 3.9 million barrels per day of crude oil and NGL on its pipelines. PAA is headquartered in Houston, Texas.

Forward Looking Statements

Certain matters discussed in this release are forward-looking statements that involve risks and uncertainties that could cause actual results or outcomes to differ materially from results or outcomes anticipated in the forward-looking statements. These risks and uncertainties include, among other things, shortages, cost increases or delays in receipt of supplies, materials or labor; inability to obtain, delays in the receipt of, or other issues associated with necessary licenses, permits, approvals, consents, rights of way or other governmental or third party requirements; the impact of current and future laws, rulings, orders, governmental regulations, accounting standards and statements and related interpretations; weather interference with business operations or project construction, including the impact of extreme weather events or conditions; environmental liabilities, issues or events that result in construction delays or otherwise impact targeted in-service dates; interruptions in service on third-party pipelines or facilities; general economic, market or business conditions and the amplification of other risks caused by volatile financial markets, capital constraints and pervasive liquidity concerns; and other factors and uncertainties inherent in the transportation, storage, terminalling and marketing of crude oil and refined products as discussed in PAA's filings with the Securities and Exchange Commission.
