**Analyst**

Analysis Group, Inc. provides economic, financial, technical, and business strategy consulting to law firms, corporations, and government agencies. We have experience in a broad range of practice areas across a variety of industries, including financial services, healthcare, energy, media, and technology.

We work with top professors from leading institutions to create a bridge between current academic thinking and real business issues. We have a broad range of expertise and offer cutting-edge analyses and tools to address legal and business challenges that require rigorous research. We assist premier law firms in many different litigation contexts, including antitrust, intellectual property and commercial damages, and with all aspects of litigation, including pretrial discovery, development of economic and financial models, preparation of testimony, and critique of opposing experts. We advise corporate and government clients on a range of business issues that require expert interpretation of economic and financial data, including valuation of companies, and assets, securities and financial instruments, tax and transfer pricing issues, cost-effectiveness analyses, market analyses, and evaluation of mergers and acquisitions. Analysis Group also helps organizations create strategies for growth by analyzing market dynamics and organizational capabilities, enhancing innovation in current products and services, and identifying new market opportunities. Please visit our website at [www.analysisgroup.com](http://www.analysisgroup.com) for more information.

This is an entry-level position for candidates with research experience who have a bachelor’s or master’s degree in economics, finance, statistics, computer science, engineering, data science, or related subjects. Analysts can expect to work on multiple projects at a time across multiple practice areas and industries. Responsibilities and work experiences may include:

- Analyzing economic, financial, and healthcare data using spreadsheets, algorithms and statistical and/or general purpose programming (e.g., SAS, Stata, R, Python, VBA, C/C++, and other programs)
- Analyzing data using statistical methods and analytical tools including econometric estimation of models
- Examining market and industry behavior through targeted research
- Reviewing and summarizing analyst reports and client documents
- Understanding and interpreting statistical and general purpose programming code
- Participating in meetings with academic experts and case team members
- Assisting in the preparation of expert reports and other client deliverables

Analysis Group fosters a progressive and academically oriented work environment, with an emphasis on teamwork and collaboration across diverse areas of expertise. We seek candidates with an interest in applying quantitative methods to real-world research problems, strong interpersonal and communication skills, a commitment to teamwork and collaborative problem solving, and aspiration for continuous learning and professional development. Analysts often move on to top graduate programs for an MBA, JD, or Ph.D. after their tenure with Analysis Group; some return to the firm as Associates after graduate school.
