Software Engineering Internship

Software Engineers create next generation software solutions to support business areas across the firm. Software Engineers work closely with business leaders to develop and deliver custom software solutions that optimize performance and efficiency. You’ll get to apply and hone your engineering skills in a structured program that allows you to work side-by-side with, and learn from, those who are thriving in this exciting and growing field.

Locations: Chicago, New York

YOUR OBJECTIVES

- Design, develop, test, and deploy elegant software solutions across the firm
- Partner with business leaders to define priorities and deliver custom solutions

YOUR SKILLS & TALENTS

- A deep passion for technology and software development
- Experience with some of the following: Distributed Computing, Natural Language Processing, Machine Learning, Platform Development, Networking, System Design, and/or Web Development
- Bachelor’s, Master’s or PhD degree in Computer Science or equivalent experience
- Strong written and verbal communications skills
- Proficiency within one or more programming languages including C, C++, Python, R, C# or JavaScript

Making Better Markets for a Better World

Citadel securities is an award-winning global market maker across a broad array of fixed income and equity products. Its unique set of capabilities and tools are designed to drive down the cost of transactions, helping to meet the liquidity needs of asset managers, banks, broker-dealers, hedge funds, government agencies, and public pension programs. Our firm is guided by its core values of championing honesty, rewarding excellence, continuously learning, solving problems together, and earning the win.
