(Senior) Advanced Analytics Specialist – Supply Chain

What you’ll do
The Senior Advanced Analytics Specialist is responsible for helping build our best-in-class Supply Chain Analytics. The ideal candidate has a demonstrated passion for working with data to creatively and tenaciously solve complex problems. Your ultimate goal is to use data to drive the right business outcomes and build strong relationships with the Technology and Supply Chain Operations teams you partner with.

What you’ll be working on
- **Analytics**: Work with large, messy, disparate datasets and conduct ad hoc “back of the envelope” analyses to quickly inform critical business decisions
- **Modeling**: Develop and improve upon our methodology for demand forecasting and inventory replenishment logic with some of the best data scientists in the industry
- **Strategy**: Design scalable workflows and tools to automate processes that would otherwise be manual and time-consuming

About You
You’re a risk taker, a dreamer that delivers, you have and can implement big ideas with a positive attitude. You pride yourself on being the first of your friends and colleagues to know what’s happening in the world and staying “in the know.” You have a passion for working with data to deliver actionable guidance and drive business performance. You want to be a part of one of the fastest growing eCommerce companies around where the only constant is change and you have these main skills:
- Experience with SQL and Excel - ability to manipulate large quantities of data to drive business decisions is a must
- Strong business acumen and scrappiness - you approach problems in a scientific manner but can also execute pragmatically
- Excellent analytical, organizational, and written/verbal communication skills

Qualifications
- Must be in or have completed final year of master’s program
- Strong GPA and commitment to academics
- 2-4+ years of full-time experience in a highly analytical and data intensive role at an operating business/startup and/or finance/consulting firm
- BA/BS degree in Economics/Mathematics/Statistics/another quantitative field or equivalent practical experience

Bonus points
- Hands-on experience with VBA, R, Python, Looker, Tableau or other data analysis/visualization tools is a plus

About Walmart eCommerce
Walmart eCommerce is reshaping eCommerce as we know it. Based in San Bruno, CA and Hoboken, NJ (just 10 min from Manhattan), we are a company on the relentless pursuit to build the greatest customer experience in the world. At Walmart, we believe in bold. That means taking risks, asking “why not”, looking where no one’s looked before and crushing it! Our engineers are utilizing and building world class technologies, to optimize the supply chain, remove unnecessary costs, sprinkle in some surprise and delight all while saving consumers every penny possible and we’re just getting started. At Walmart eCommerce, we have worked hard to build a culture that stresses the importance of learning and sharing knowledge. If you want to be part of the team that is disrupting the shopping norm and you’re capable of smashing the status quo, we have a hunch you’d have a great time here.
Product Manager - Search Product, Retail Core Engine

Position Description
In this role you drive product strategy and execution from inception through delivery for Online Grocery. You interact regularly with senior leaders and are responsible for delivering new initiatives and features that deliver value to the customer.

Company Summary
The Walmart eCommerce team is rapidly innovating to evolve and define the future state of shopping. As the world’s largest retailer, we are on a mission to help people save money and live better. With the help of some of the brightest minds in technology, merchandising, marketing, supply chain, talent and more, we are reimagining the intersection of digital and physical shopping to help achieve that mission.

Position Summary
Are you passionate about understanding what customers want and connecting them with the right products by building a world class Search engine? If so, the Search Product team is looking to hire a Product Manager that is passionate about delivering a great customer experience for Walmart Grocery. The Online Grocery Search is helping busy families nationwide to get their groceries online so that they can save time and money for things that matter most.

Minimum Qualifications
• Currently in the second year of a full MBA program with a Data Science, Science, Computer Science, Statistics, Operations Research orientation
