7.0 Illegal Connections to the Collection System

There were no illegal connections identified during the reporting period.

8.0 Sanitary Discharges of Unknown Origin (SDUO)

A summary of all confirmed SDUOs is provided in Attachment 5.

9.0 MCD Compliance Issues

Paragraph 8 Section b(i): Elimination of Sanitary Sewer Overflow Structures

On August 7, 2024, DPW submitted to EPA and MDE a time extension request to eliminate SSO Structures 67, 72, 152 and 154. The requested deadline is July 31, 2030. On January 28, 2025, DPW submitted to EPA and MDE notice of potential delay for closure of the structures due to potential equipment procurement delays associated with the Stony Run Pump Station and future capital improvements in collaboration with Baltimore County.

Paragraph 9 Section b(i)

On December 15, 2025, the City submitted to EPA and MDE the revised Phase II Plan, which proposed a completion deadline of December 31, 2046. The proposed deadline balances MCD compliance with customer affordability and adopting an adaptive utility management approach. Further discussion with EPA and MDE may be needed to extend the deadline.

Paragraph 13 Section a(i)(a): 7-Year Comprehensive Inspection and Cleaning

On October 10, 2024, the City requested an extension for inspection and/or cleaning if necessary of all sewers larger than eight-inch diameter from the MCD deadline of October 9, 2024 to January 31, 2025. On January 23, 2025, the City requested an extension to complete this work to July 31, 2025. On April 9, 2025, the City informed EPA and MDE of the completion of the 7-year comprehensive inspection and cleaning program. In their June 26, 2025 letter to the City, MDE stated that the 7-year inspection and cleaning cycle is not complete and directed the City to submit a formal time of performance extension. In their August 14, 2025 letter, the City explained that some sewers could not be inspected or cleaned due to various field conditions; however work was attempted at all locations. In their November 7, 2025 letter, the City submitted a time of performance extension request to complete this work by July 31, 2026.

¹ For any SDUO confirmed as originating from the collection system, footnote the SDUO with the date the written SSO report was submitted to MDE.

² For sites that have not yet been resolved, "Estimated Volume (Gal)" is readjusted each quarter to reflect the elapse of time and any recent field information (flow, NH3, TKN) that may have been collected for a given site.

³ For all active sites the City ultimately plans to calculate flows using TKN – per guidelines for the approved protocol by EPA; flows calculated utilizing TKN or ammonia concentrations.

⁴ Volume is calculated based on the SDUO Quantification Protocol dated November 12, 2010, and submitted by the City to the U.S. EPA on November 18, 2010.
