# EXECUTIVE SUMMARY

*The Baltimore City CoC 2026 Point-in-Time Count is an opportunity for the community to come together in support of people experiencing homelessness. It provides a snapshot of who is experiencing homelessness.*

The Baltimore City CoC 2026 Point-in-Time Count is an opportunity for the community to come together on a single night in January in support of our unsheltered neighbors. On January 25, 2026, the City of Baltimore shelter count was **1,595** clients experiencing sheltered homelessness. The unsheltered count is **188** per the 2025 PIT count, due to extreme weather conditions the 2026 unsheltered count was not conducted.

As you read this report, be reminded of the countless dedicated staff and advocates that work each day to make homelessness rare, brief, and non-recurring. In 2025, our community served **21,168** clients through street outreach, supportive services, emergency shelters and permanent housing. This includes **4,215** clients with permanent housing and **1,119** individuals and families who ended their homelessness over the past year and entered permanent housing. To view the full 2025 Annual Report visit our website at [www.baltimorecity.gov/homeless](http://www.baltimorecity.gov/homeless).

**The creation of permanent housing remains the primary goal of the City of Baltimore.** The PIT Count serves as the snapshot in time providing a consistent baseline measure of homelessness in the City of Baltimore. Because the PIT Count does not capture everyone who experiences homelessness throughout the year, Baltimore City uses data from the Homeless Management Information System (HMIS) to count individuals staying in City-funded and HMIS-participating shelters. For shelters not participating in HMIS, survey tools are used to ensure inclusion.

**Everyone has a role to play in ending homelessness and it will take a coordinated, city-wide effort to ensure that homelessness in Baltimore is rare, brief, and nonrecurring.** If you are interested in supporting this work, consider getting involved with the Baltimore City Continuum of Care (CoC). You can join a committee, become a member, volunteer your time, or contribute resources to help advance our shared mission. Visit the Mayor's Office of Homeless Services website to learn more about how to get involved, sign up for the CoC newsletter, or apply to become a member of the CoC.

IN 2025, OUR COMMUNITY SERVED **21,168** CLIENTS THROUGH SUPPORTIVE SERVICES, EMERGENCY SHELTERS, STREET OUTREACH AND PERMANENT HOUSING

THIS INCLUDES **4,215** CLIENTS WITH PERMANENT HOUSING AND **1,119** INDIVIDUALS AND FAMILIES WHO ENDED THEIR HOMELESSNESS OVER THE PAST YEAR AND ENTERED PERMANENT HOUSING

“

*I am proud to serve such a passionate community with a shared mission to make homelessness rare and brief. As we continue to navigate uncertainty with federal funding, we have stayed grounded in our values.*

**Ernestina Simmons, LCSW-C**

Executive Director of the Mayor's Office of Homeless Services

# WHY WE COUNT

*The PIT Count is a critical tool for understanding the scale and characteristics of homelessness, and for shaping policies and programs that affect our homeless neighbors at the federal, state, and local levels.*

The Point-in-Time (PIT) Count is a U.S. Department of Housing and Urban Development (HUD) mandated assessment that offers a snapshot of homelessness in a community, both sheltered and unsheltered on a single night during the last 10 days of January. The PIT Count is a critical tool for understanding the scale and characteristics of homelessness, and for shaping policies and programs that affect our homeless neighbors at the federal, state, and local levels.

**To be included in the PIT Count, individuals must meet HUD's definition of homelessness**, which may differ from definitions used by other agencies or systems. Under HUD guidelines, individuals or families are considered homeless if they lack a fixed, regular, and adequate nighttime residence, including:

- **Unsheltered individuals**, or those whose primary nighttime location is a public or private place not designed for or ordinarily used as regular sleeping accommodations such as cars, parks, abandoned buildings, transit stations, airports, or encampments.
- **Sheltered individuals**, or those residing in emergency shelters, transitional housing programs, or temporary accommodations paid for by public or charitable organizations.

This report outlines the key findings from the 2026 Point-in-Time (PIT) Count and the Housing Inventory Count (HIC) conducted by the Baltimore City Continuum of Care (CoC). PIT data is submitted to HUD and included in the Annual Homeless Assessment Report (AHAR) to Congress, published each December. This data helps to evaluate the impact of HUD-funded programs and inform future funding and policy decisions. Locally, Baltimore's CoC uses the PIT findings to assess system performance, direct resources, and identify critical service gaps in the homeless response system.

IN 2026, THE  
BALTIMORE CITY  
PIT COUNT WAS  
CONDUCTED ON THE  
NIGHT OF  
**JANUARY 25, 2026**

FOR THE 2026 PIT  
COUNT, THE CITY  
IDENTIFIED AND  
SURVEYED SHELTERED  
INDIVIDUALS

DUE TO  
EXTREME WEATHER  
CONDITIONS, THE  
2026 UNSHELTERED  
COUNT WAS **NOT  
CONDUCTED**

# KEY TERMS & DEFINITIONS

The following terms are defined for the purposes of this report and reflect how data is collected and reported to HUD. These definitions may differ slightly from those found in HUD regulations or the HEARTH Act.

## **Adults**

People aged 18 or older.

## **Children**

People under the age of 18.

## **Continuums of Care (CoC)**

Local planning bodies responsible for coordinating the full range of homelessness services in a defined geographic area, such as a city, county, region, or state.

## **Disability**

A physical, mental, or emotional impairment (including substance use disorder, PTSD, or brain injury) expected to be long-term or indefinite, which substantially limits an individual's ability to live independently and may improve with appropriate housing. It also includes developmental disabilities (as defined by the Developmental Disabilities Assistance and Bill of Rights Act of 2000) and HIV/AIDS or related conditions.

## **Emergency Shelter (ES)**

A facility with the primary purpose of providing temporary housing to people experiencing homelessness.

## **Experiencing Homelessness**

Describes people who lack a fixed, regular, and adequate nighttime residence.

## **Families Experiencing Chronic Homelessness**

Households with children where the head of household has a disability and has either been continuously homeless for a duration exceeding one year or has had at least four episodes of homelessness in the last three years totaling at least 12 months.

## **Family Households**

Households made up of at least one adult (18 or older) and one child (under 18) experiencing homelessness together.

## **Homeless Management Information System (HMIS)**

A local information technology system used by CoCs to collect client-level data on people experiencing homelessness and their use of housing and services.

## **Housing Inventory Count (HIC)**

An annual inventory conducted by CoCs that details the number and type of beds and units available for people experiencing homelessness or transitioning into permanent housing.

## **Individual**

A person experiencing homelessness who is not part of a family with children. This includes single adults, unaccompanied children, or groups of adults/ children not accompanied by a parent or guardian.

## **Individual Experiencing Chronic Homelessness**

An individual with a disability who has been continuously homeless for at least one year or has had four or more episodes of homelessness in the past three years, totaling at least 12 months.

## **Multiple Races/Multi-Racial**

Refers to people who identify as belonging to more than one racial category.

## **Other Permanent Housing (OPH)**

Housing for formerly homeless individuals or families that does not require a documented disability for entry and may or may not include supportive services.

## **Parenting Children**

Youth under age 18 who are parents of one or more children (also under age 18) and are staying with those children without the presence of an adult over age 18.

## **Parenting Child Household**

A household composed of at least one parenting child and their dependent children, without an adult over age 18 present.

## **Parenting Youth**

People under age 25 who are parents or legal guardians of one or more children under age 18 and who are staying with those children, with no one over age 24 in the household.

## **Parenting Youth Household**

A household composed of at least one parenting youth and their dependent children, without an adult over age 24 present.

## **People in Families with Children**

People experiencing homelessness as part of a household that includes at least one adult (age 18 or older) and one child (under age 18).

### **Point-in-Time (PIT) Count**

An unduplicated, two-night count of both sheltered and unsheltered people experiencing homelessness, conducted annually by CoCs during the last 10 days in January.

### **Permanent Supportive Housing (PSH)**

Long-term housing assistance combined with supportive services for people who were homeless at program entry and have a qualifying disability. PSH is funded by HUD's Continuum of Care Program.

### **Rapid Re-Housing (RRH)**

A short-term housing intervention that provides temporary rental assistance and services to help people quickly exit homelessness and achieve permanent housing stability.

### **Safe Havens (SH)**

Low-barrier, short-term housing programs for individuals with severe mental illness. These programs provide private or semi-private accommodations and are limited to 25 individuals per facility.

### **Sheltered Homelessness**

Refers to people staying in emergency shelters, transitional housing programs, or safe havens.

### **Transitional Housing (TH)**

Temporary housing with supportive services, typically lasting up to 24 months, intended to help individuals and families transition to permanent housing.

### **Unaccompanied Youth/Children (Under age 18)**

Individuals under age 18 who are not accompanied by a parent or guardian and are not part of a family household.

### **Unaccompanied Youth (ages 18–24)**

Young adults who are not accompanied by a parent or guardian and are not part of a family with children during their experience of homelessness.

### **Unsheltered Homelessness**

Refers to people whose primary nighttime location is a place not meant for human habitation such as vehicles, parks, abandoned buildings, transit stations, or encampments.

### **Veteran**

Any individual who has served on active duty in the United States armed forces, including Reserve and National Guard members who were activated. Must have a discharge status other than dishonorable.

### **Youth**

People who are between the ages of 18-24. May also include anyone under the age of 24.

# OVERALL FINDINGS

# 1,783

**People counted as experiencing Homelessness in Baltimore City on a single night in January 2026**

## OF THE 1,783 PEOPLE COUNTED:

**77%** identify as Black or African American

**20%** are Chronically Homeless

**9%** are Veterans

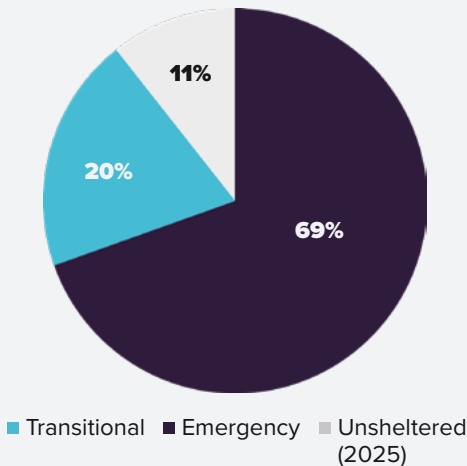

**5%** are Youth (18-24)

**12%** are Households with at least one child (0-17)

## OVERALL SHELTER STATUS

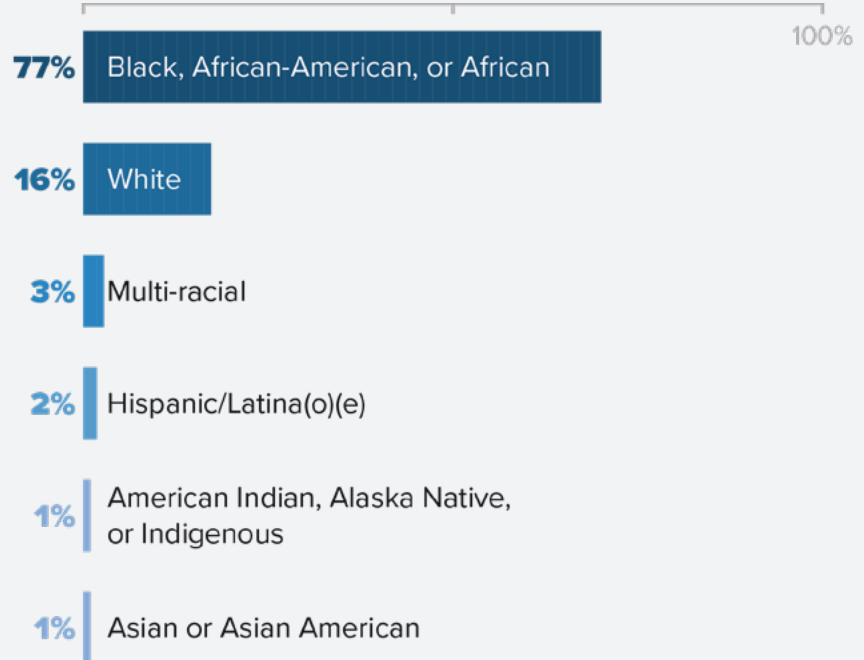

**69%** of people stayed in Emergency Shelters

**20%** of people stayed in Transitional Housing

**11%** of people counted as Unsheltered (2025)

## OVERALL RACE AND ETHNICITY

## IMPROVING OUR METHODOLOGY

While there is not a methodology that can capture the number of people experiencing homelessness with complete accuracy, Baltimore City aimed to make the 2026 PIT Count as comprehensive as possible.

It is important to note that a number of variables, including people experiencing homelessness in locations inaccessible to canvassing teams can affect final numbers. Nevertheless, the PIT Count provides vital snapshot information about the needs, current gaps, and inequities in our homeless services system.

Building from lessons learned in prior years, some of the changes made include:

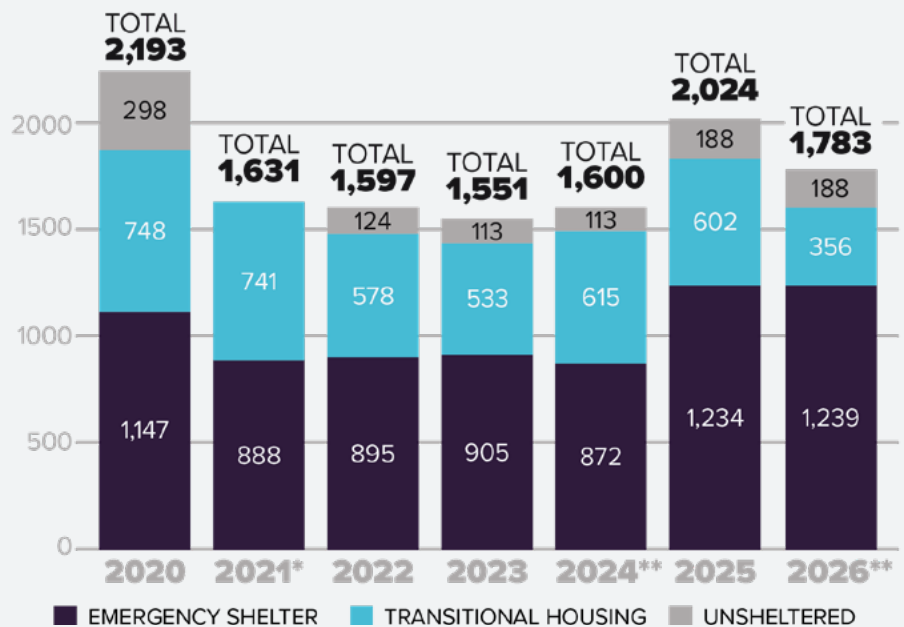

- **Conducting a standard, two-night unsheltered count.** (In 2026, data for unsheltered individuals experiencing homelessness was not collected, so the current data was a HUD estimation based on calculations from 2025.)
- **2026 was not a HUD mandated unsheltered count year;** to learn more about the HUD Point-In-Time visit: [www.hudexchange.info/programs/hdx/pit-hic/#2026-pit-count-and-hic-guidance](http://www.hudexchange.info/programs/hdx/pit-hic/#2026-pit-count-and-hic-guidance)

# SHELTERED PIT TRENDS

*Between 2025 and 2026, the number of people counted as experiencing homelessness declined by 12%.*

The city has made significant investments in both permanent housing and to increase our emergency shelters capacity in response to the housing crises that continues to impact Baltimore City's residents. These resources served as an opportunity for us to invest in people experiencing homelessness by providing emergency shelter that provides an environment that offers dignity, privacy, accessibility, and a safe environment. This includes their most basic needs which includes food, clothing, and shelter while also providing them with the long-term supports they need.

In 2025, this includes the acquisition of a hotel that has been converted to non-congregate emergency shelter.

## EMERGENCY SHELTER VS. TRANSITIONAL HOUSING

Emergency Shelters (ES) provide people experiencing an episode of homelessness with a safe, low-barrier, and temporary refuge as well as supportive services needed to quickly regain housing stability. Transitional Housing (TH) provides people experiencing homelessness with shelter and supportive services for up to two years with the goal of moving them into independent living. Transitional Housing programs are usually dedicated to specific populations, such as veterans, youth, or individuals with substance use disorders. In Baltimore City, the local CoC, State, and Federal governments fund Transitional Housing for veterans and youth.

\*AN UNSHELTERED COUNT WAS NOT CONDUCTED IN 2021 DUE TO THE COVID19 PANDEMIC  
 \*\*AN UNSHELTERED COUNT WAS NOT CONDUCTED IN 2024 OR 2026; A HUD ESTIMATE WAS USED FOR CALCULATIONS

# FINDINGS IN DETAIL

*Homelessness continues to disproportionately affect Black Baltimoreans. This disparity underscores the ongoing racial inequities present in the data regarding who experiences homelessness.*

## RACE AND ETHNICITY

Homelessness continues to disproportionately affect Black Baltimoreans. According to U.S. Census Bureau estimates, approximately **59%** of Baltimore City’s population identifies as Black or African American, and **27%** identifies as White. However, on the night of the 2026 PIT Count, **77%** of people experiencing homelessness identified as Black or African American, and **16%** identified as White. This disparity underscores the ongoing racial inequities present in the data regarding who experiences homelessness.

As in previous years, the 2026 PIT Count shows that homelessness in Baltimore City continues to disproportionately impact adults, particularly those between the ages of 35 and 64. This is in contrast to Baltimore’s general population, which skews younger overall. According to the most recent U.S. Census Bureau estimates, the city’s median age is approximately 36 years.

In emergency shelters, individuals aged 35–64 made up over **50%** of those counted. The largest subgroups were 55–64 (**19%**), followed by 35–44 (**18%**) and 45–54 (**15%**)

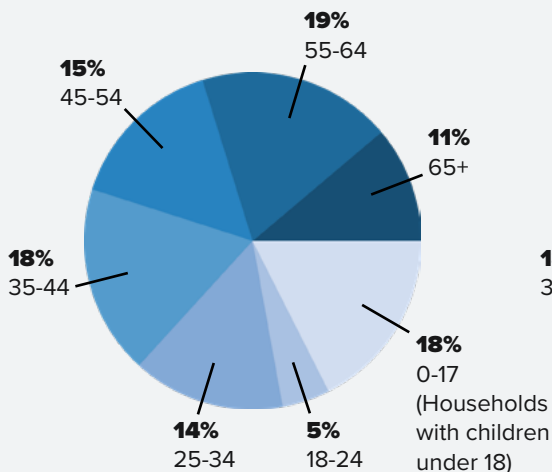

In transitional housing, the age distribution was similar with under 18 also being one of the largest groups. The numbers showed that individuals aged 55–64, 35-44, and households that included youth under 18 made up **18% each** of the transitional housing population (**total 54%**). Followed by 45-54 aged (**17%**).

Compared to the city’s overall demographics, individuals experiencing homelessness tend to be older, particularly in sheltered settings. These findings highlight the urgent need for age-appropriate strategies, supportive services, and permanent housing options that meet the needs of middle-aged and older adults experiencing prolonged housing instability.

U.S. Census Quick Facts Baltimore City: [www.census.gov/quickfacts/fact/table/baltimorecitymaryland/PST045224](http://www.census.gov/quickfacts/fact/table/baltimorecitymaryland/PST045224)

## AGE DEMOGRAPHICS BREAKDOWN

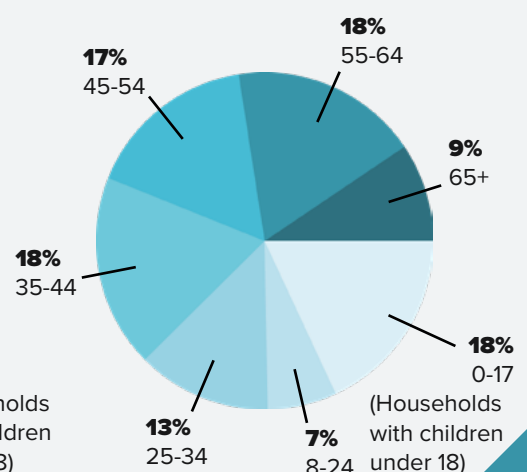

OVERALL

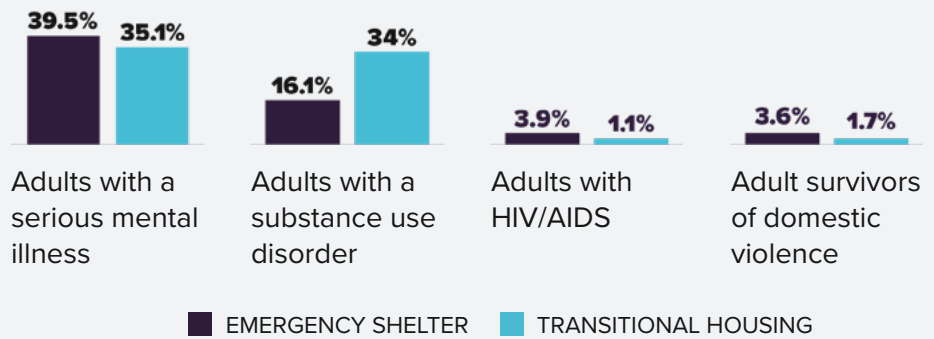

EMERGENCY SHELTER

TRANSITIONAL SHELTER

# HOMELESS ADULTS WITH HEALTH AND/OR SAFETY CONCERNS

Over **600 (39%)** of sheltered adults self-reported living with a serious mental illness, while over **300 (20%)** self-reported having a substance use disorder.

While less than **2%** of all Baltimore residents are living with diagnosed HIV, the rates among people counted experiencing homelessness still exceed the estimated prevalence in Baltimore's general population with **3.9%** in emergency shelters reportedly living with HIV/AIDS and **1.1%** in transitional housing.

**The City continues to address these needs through the Housing Opportunities for Persons With AIDS (HOPWA) program, a federally funded initiative that provided stable housing and supportive services to 704 clients through the HOPWA program in 2025.**

For sheltered individuals in 2026, **3.6%** of adults in emergency shelters and **1.7%** in transitional housing identified as survivors of domestic violence. These numbers may be underestimated due to safety concerns and underreporting by survivors.

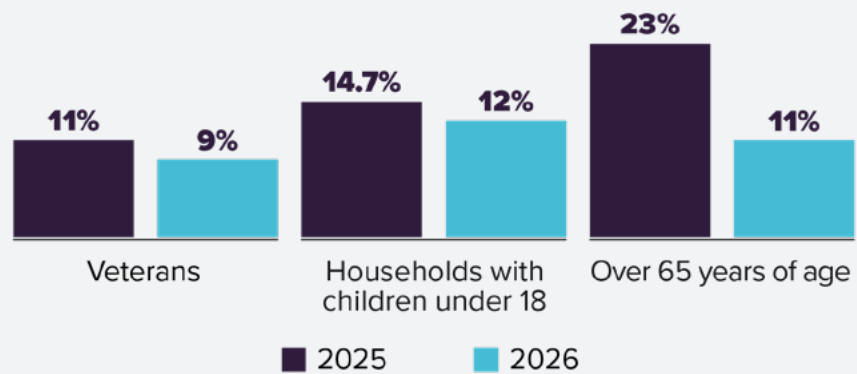

## SPECIAL POPULATIONS: CHRONICALLY HOMELESS, VETERANS, AND YOUTH

HUD defines Chronic Homelessness as having a disabling condition and 12 months of continuous homelessness, either consecutively in the past year or over four episodes in the past three years. HUD also states that anyone who entered Transitional Housing (TH) as a chronically homeless individual loses that status after living in TH for seven days. Chronic households are prioritized for subsidized housing resources, such as Permanent Supportive Housing (PSH) and Rapid Re-Housing (RRH). In 2026, **316 (20%)** of the clients in our homeless response system were considered chronically homeless which is a **7% increase** from 2025.

In 2026, Veterans accounted for **9%** of the total homeless population. Title 38 of the Code of Federal Regulations defines a veteran as “a person who served in the active military, naval, or air service and who was discharged or released under conditions other than dishonorable.” This represents a **2% decrease from 2025**.

In this report, Youth are defined as accompanied minors and young adults under the age of 24 who lack a fixed, regular, and adequate nighttime residence. This definition is consistent with HUD’s Youth Homelessness Demonstration Program (YHDP). Youth made up **355 (22%)** of the total homeless population during the 2026 count. **It is important to note that there are challenges to accurately counting this population, as youth may be transient, couch-surfing, or actively avoiding engagement due to stigma or safety concerns.**

### SPECIAL POPULATIONS DECREASE FROM 2025—2026

## PARENTING WHILE HOMELESS

**12%** of households experiencing homelessness indicated that they were a part of a household that has at least one adult and one child. **This is a decrease by 2.7% from 2025.**

**18%** of our homeless population are children under the age of 18 experiencing homelessness with a parent/guardian.

## AGING WHILE EXPERIENCING HOMELESSNESS

**11%** of our homeless population are seniors over the age of 65 years of age. **This is a decrease by 12% in 2025.**

# BEYOND THE COUNT

**While the PIT Count offers a valuable annual snapshot of homelessness in Baltimore, it captures only a single night.** To truly understand and respond to the dynamic nature of homelessness, the Baltimore City Continuum of Care (CoC) relies on year-round data sources and system improvements. The Homeless Management Information System (HMIS) provides a fuller picture by tracking individuals in City-funded and HMIS-participating shelters. For shelters not using HMIS, targeted survey tools are deployed to ensure inclusion. Together, these methods allow Baltimore to supplement the PIT Count with a more accurate and comprehensive measure of need.

Baltimore is also deepening its work through **Built for Zero**, a national movement of communities working to measurably end homelessness. This collaboration has transformed how we coordinate care: case conferencing and by-name lists allow the system to track inflow, outflow, and the duration of homelessness in real time. These practices move us beyond static counts and toward an agile system that can quickly respond to changes in need, prioritize the most vulnerable, and shorten the length of time people remain homeless.

At the same time, the City is making unprecedented investments in housing infrastructure. Through the Housing Accelerator Fund (HAF) program a collaboration initiative between MOHS and the Baltimore City Department of Housing & Community Development (DCHD), in 2025 there was a joint Notice of Funding Opportunity (NOFO) released for both ARPA-Housing Accelerator and HUD-HOME ARPA funds.

As of December 31, 2025, the Baltimore City Board of Estimates (BOE) has approved 12 permanent supportive housing (PSH) contracts. These approvals provide the necessary funding to create **83** total PSH units, which include 71 HAF projects and 12 HOME-ARPA funded units.

In short, Beyond the Count is about more than a single number. It reflects Baltimore's ongoing shift from crisis response toward long-term, systemic solutions. By combining data-driven approaches, national best practices, and historic investments in housing, the CoC is building the foundation for a system where homelessness is not only rare and brief but truly non-recurring.
