Current National Drought Summary (August 12, 2025)

Intensifying short-term rainfall shortages led to expanding and intensifying dryness and drought over much of the Lower Mississippi Valley, Ohio Valley, Tennessee Valley, Northeast, and parts of the Deep South, southern Plains, central Arizona, and the central Rockies. Meanwhile, a second consecutive week with moderate to heavy precipitation led to areas of improvement in the South Atlantic States from the Carolinas through Florida, across northern reaches of the Rockies and Plains, and over parts of the central Great Plains. The heaviest amounts (8 to 11 inches) doused areas in southeast Wisconsin from central Washington and Ozaukee Counties southward through much of north and central Waukesha and Milwaukee Counties. Meanwhile, 6 to 8 inches were dropped on a broader section of southeast Wisconsin as well as a few patches across southeast South Dakota, the Carolinas Piedmont and adjacent southern Appalachians, the coastal Carolinas, north-central Florida, the central Florida Peninsula, and interior southeast Florida.
