

USDA AMS Weekly Shell Egg Demand Indicator

(Calculated estimate of demand for shell eggs based on current production and on inventory clearance rate.)

September 10, 2025

The Shell Egg Demand Indicator for this week is -2.60, up 3.0 points from last week.

This Week:

Shell egg demand continued to improve in the post-Labor Day period on continued attractive retail promotional activity. Wholesale prices for negotiated trading of loose caged eggs are firm on moderate to good demand for moderate to available offerings. Supplies and trading are moderate. Wholesale prices for formula trading of carton stock are steady on moderate demand and offerings. Wholesale breaking stock prices remain unchanged on light demand for light to moderate offerings and moderate supplies. Schedules are full-time with slow to moderate trading. The preliminary survey of retail outlets indicates a significant increase in feature activity for conventional caged eggs at a lower average ad price. A significant promotion of white-shelled cage-free shell eggs at much lower average ad prices breaking across a large portion of the country at slightly higher average ad pricing than last week.
