

USDA AMS Weekly Shell Egg Demand Indicator

(Calculated estimate of demand for shell eggs based on current production and on inventory clearance rate.)

September 17, 2025

The Shell Egg Demand Indicator for this week is -2.60, up 0.0 points from last week.

This Week:

Shell egg demand was unchanged following two weeks of active retail promotional activity at attractive pricing. Wholesale prices for negotiated trading of loose caged eggs are lower on mostly light to moderate demand for moderate to available offerings. Supplies vary and trading is moderate. Wholesale prices for formula trading of carton stock are lower on light to moderate demand and available offerings. Wholesale breaking stock prices are weak on light demand for light to moderate offerings and moderate supplies. Schedules are full-time with slow to moderate trading. The preliminary survey of retail outlets indicates a retreat for last week's active pace for conventional caged eggs but with a sharp drop in the average ad price.
