

## USDA AMS Weekly Shell Egg Demand Indicator

(Calculated estimate of demand for shell eggs based on current production and on inventory clearance rate.)

October 8, 2025

**The Shell Egg Demand Indicator for this week is -8.20, up 6.5 points from last week.**

### This Week:

Shell egg demand recovered some of last week's decline but remains below average. Wholesale prices for negotiated trading of loose caged eggs are lower on increasing demand for tightening offerings. Supplies vary on slow to moderate trading. Wholesale prices for formula trading of carton stock are steady on improved demand for moderate offerings. Wholesale breaking stock prices are unchanged light to moderate demand for moderate to available offerings and moderate to heavy supplies. Schedules are full to extended with slow to moderate trading. The preliminary survey of retail outlets indicates a sharp increase in feature activity for conventional caged eggs with a decline in the average ad price to close to \$2.00 per dozen.
