

## USDA AMS Weekly Shell Egg Demand Indicator

(Calculated estimate of demand for shell eggs based on current production and on inventory clearance rate.)

December 24, 2025

**The Shell Egg Demand Indicator for this week is -2.60, up 5.8 points from last week.**

### This Week:

Demand for shell eggs into Christmas week improved as consumers hurried to finalize their holiday baking needs. Wholesale prices for negotiated trading of loose caged eggs are lower with a lower undertone as demand for carton stock is mixed and that for loose eggs is light to moderate. Offerings and supplies are moderate to available and trading is slow. Wholesale prices for formula trading of carton stock are lower on reduced demand for adequate offerings. Wholesale breaking stock prices are lower on light to very light demand for moderate to available offerings and supplies. Schedules vary and trading is slow. The preliminary survey of retail outlets indicates continued limited featuring of caged eggs with a preference for cage-free types. The average ad price is unchanged on the limited test.
