1/ Measure of the percent of the sample surface covered by the trash particles as determined by a video scanner; 12 indicates that trash particles cover 1.2 percent of the sample surface. Trash particles include extraneous matter such as grass, bark, etc. 2/ Measure of the relative uniformity of the length of fibers; if all fibers were the same length, uniformity index would equal 100. 3/ Tenderable for delivery on ICE No. 2 futures contracts. \* Less than 0.05 percent.

1/ Measure of the percent of the sample surface covered by the trash particles as determined by a video scanner; 12 indicates that trash particles cover 1.2 percent of the sample surface. Trash particles include extraneous matter such as grass, bark, etc. 2/ Measure of the relative uniformity of the length of fibers; if all fibers were the same length, uniformity index would equal 100. 3/ Tenderable for delivery on ICE No. 2 futures contracts. \* Less than 0.05 percent.
