Summary Information

Repository	Barnes Foundation Archives
Creator	Wherry, Edgar Theodore, 1885-1982
Title	Edgar Theodore Wherry Papers
Date	1907-1977
Extent	2.5 Linear feet
Language	English
Abstract	This collection consists of correspondence, writings, and research, written and collected by Dr. Edgar Theodore Wherry, geologist, botanist, assistant curator of mineralogy at the U.S. National Museum, crystallographer for the U.S. Department of Agriculture, University of Pennsylvania professor, and instructor at the Arboretum School of the Barnes Foundation.

Preferred Citation

[Description of item], [date]. Edgar Theodore Wherry Papers, Barnes Foundation Archives, Philadelphia, PA. Reprinted with permission.

Biographical Note

Edgar Theodore Wherry was born on September 10, 1885, in Philadelphia, Pennsylvania. After graduating from the Friends Central School in 1902, he received a scholarship to the University of Pennsylvania, where he earned a Bachelor's Degree in Chemistry in 1906 and a Ph.D. in Geology-Mineralogy in 1909.

He taught for five years as an assistant professor in the Geological Department of Lehigh University. In 1913, he became the assistant curator of mineralogy at the U.S. National Museum in Washington, D.C. During his time in Washington, he began working with the Wild Flower Preservation Society and taught himself the principles of botany. He started exploring theories of soil chemistry in relation to plant growth.

Dr. Wherry's work with ferns and their "relationship to their geological-chemical environment" became the topic of many of his publications, and the focus of his membership and subsequent presidency of the American Fern Society from 1934 to 1938. Wherry published three key guides to the ferns of North America: *Guide to Eastern Ferns* in 1937, *The Fern Guide* in 1961, and *The Southern Fern Guide* in 1964.

Wherry was a professor of botany at the University of Pennsylvania from 1930-1955, and in 1932 he was appointed ecologist to the Morris Arboretum. He also taught soil science, plant physiology, plant ecology, and taxonomy at the Arboretum School of the Barnes Foundation from 1941 to 1950, and again from 1953 to 1957.

He is credited with discovering the mineral Wherryite, as well as several plants, including *Asplenium xtrudellii*, *Microgramma heterophylla*, *Sarracenia oreophila*, and *Sarracenia jonesii*. Plants named in honor of Dr. Wherry include *Tiarella wherryi*, *Spilene wherryi*, and *Dryopteris wherryi*.

Wherry was awarded professor emeritus status upon his retirement from University of Pennsylvania in 1955. He was also awarded the Mary Soper Pope Medal by the Cranbrook Institute of Science in 1964 for his achievements in plant research.

Dr. Wherry worked closely with many botanical organizations, such as the Bowmanes Hill State Wild Flower Preserve, the American Rock Garden Society, the Delaware Valley Chapter of the American Rock Garden Society, and the Delaware Valley Fern Society.

Scope and Content

This collection ranges in date from 1907 to 1977, and consists of correspondence, writings, photographs, and journal reprints written and collected by Dr. Edgar Theodore Wherry

The correspondence series consists primarily of letters to Dr. Wherry and includes correspondence with botanists, students, departments of botany, and herbaria from 1955-1975. Subjects include the collection and identification of various plant specimens, including phlox.

The writings series includes drafts of articles, a glossary of terms, and identification keys created by Dr. Wherry and others. Drafts are generally corrected typescript or carbon copies, and notes are generally in manuscript. Some writings are in the form of clippings from journals, and some in complete journal issues. Subjects include phlox, ferns, shale-barrens, and wild flowers.

The reprints series includes journal articles collected by Dr. Wherry for research, a biography of Dr. Wherry, his doctoral thesis, and reprints identified as "give aways." Subjects include, ferns, phlox, polemoniaceae, shale-barrens, rock gardens.

Three photographs are collected in the photograph series. The miscellaneous series contains a geological map of Pennsylvania.

Administrative Information

Publication Information

Barnes Foundation Archives 2010

Access Restrictions

This collection is open for research to qualified researchers by appointment only. Please contact the Archives and Library Department for information on access and research.

Use Restrictions

Edgar Theodore Wherry Papers are the physical property of The Barnes Foundation Archives. The Foundation holds literary rights only for material created by staff of the Foundation and material given to the Foundation with such rights specifically assigned. For all other material, literary rights, including copyright, belong to the authors or their legal heirs and assigns. Researchers are responsible for determining the identity of rights holders and obtaining their permission for publication and for other purposes where stated.

Acquisition Information

These records were housed in storage in the Arboretum House of the Barnes Foundation prior to processing.

Woods, Carroll E., Jr. "Some Floristic Relationships Between the Southern Appalachians and Western North America." Reprinted from The Distributional History of the Biota of the Southern Appalachians, Part II: Flora, pp. 331-404, 1971 1.0 Folder

Envelopes originally containing reprints n.d. 15.0 Folders

Series IV. Photographs 1970-1973 3.0 Folders

Series V. Miscellaneous

Arrangement

Arranged alphabetically by title.

Field with trees in background n.d. 1.0 Folder

Phlox bryoides 1970 1.0 Folder

General note

Includes handwritten note, "Phlox bryoides, broad-blade fern Banner Co., NEBR CA.Borr, 1970."

Three men walking 1973 1.0 Folder

Series V. Miscellaneous n.d. 1.0 Folder

Geologic Map of Pennsylvania 1960 1.0 Folder
