BAYLOR HEAD COACH KIM MULKEY

On the speed of this Baylor team...
"We want to run every chance we can. We have athletes. When you get a rebound, even I’ll let a post player take it and go if you see the opportunity. I just love pushing the ball up the floor. Nobody wants to play if you walk it up the floor all night, and so we had a lot, a lot of transition baskets.”

On turnovers...
"I talked to Juicy and Chloe. We had 11 at the half and they had 8. Now I’m going to be fair to those guys. They’ve been doing good and their playing a new position, but some of their turnovers the defense did not create. I think with Juicy especially, hers were being passive. She was looking to pass first. When she goes past that foul line she needs to look to score. With Chole, I think she got stripped a time there, and she got a couple kids...they just got tangled up there. But I’m not going to get on those kids to hard because they are learning a new position.”

On what to change with free throw shooting...
"It’s not anything that I’m going to go correct a shot by any means. I think some of it is mental. I think you miss one and you start doubting yourself, so it’s not like we didn’t shoot a lot yesterday. Well, we’ll keep shooting them. Got to get better from the foul line.”

BAYLOR SENIOR CENTER KALANI BROWN

On having to defend further away from the basket...
"I’m just trying to remember what we worked on in practice, and just carrying it over. I know defending on the perimeter has been a little difficult for me, you know moving my feet and stuff, but I’ve gotten better.”

On the upcoming game at Arizona State...
"I think it is going to be good for us because we need that type of atmosphere, so we can get our freshmen ready for that big stage. So just throwing at them early, throwing at us period is a great challenge. So I think it is good for us to have a tough non-conference schedule, because it can get us ready for down the road.”

BAYLOR FRESHMAN FORWARD NALYSSA SMITH

On what it takes to avoid fouling...
"It’s more of like moving my feet, and stop going for blocks or reaching and stuff like that. So just working on moving my feet and staying with my defender.”

On comfort level playing in the college game at this point...
"I’m very comfortable. I feel like I am adjusting well to this and just keep going up from here.”
