

Sump Pump Round Pop-Up Emitter

- Diverts and releases drainage water away from structures, erosion-prone landscapes and poor drainage areas
- The pop-up emitter can be used with any drainage system to divert water away from the problem area
- The special patented design allows the emitter to open with a negligible amount of pressure
- Since the emitter is closed during dry weather, debris and rodents cannot enter the drain pipes
- The pop-up emitter is opened by the hydrostatic pressure of water flowing through the drain pipe and as the flow diminishes the emitter closes
- Prevents damage from lawnmowers
