Re: Fogo de Chão Washington D.C

Dear Joe:

Now that the dust has settled and Fogo de Chão has successfully opened I would like to personally thank you and your staff for the assistance and guidance you provided during preconstruction, construction and closeout stages of the project. I can honestly say without your help we never could have achieved our aggressive construction schedule of four months.

I never imagined International Contractors would work in a city with more bureaucracy and review boards than the City of Chicago until this project. Your advice was accurate and timely and critical in communicating our goals, objectives and timelines to the sub-contractors and vendors on this fast tracked project.

Your firms can do attitude extended from the top down. An unexpected pleasure were the inspectors who worked with us, sometimes making return trips later in the day, to ensure we were in compliance and could move onto the next phase of work.

On behalf of Jim, Bob and myself we appreciated you taking our numerous phone calls. The next time we come to Washington D.C. Restaurant Consultants, Inc will be the first consultant we contact to be on our team!

Sincerely,

Bruce Bronge
President
