Medical & Support Services

January 1, 2012

Dear Clients, Family Members and Caregivers:

On behalf of the team at InnerWisdom, Inc., I am happy to announce the addition of new medical and support services that complement the traditional mental health programs that we have provided for 24 years, taking a holistic approach to the treatment of mental disorders.

We are committed to providing our clients a broad range of health and other services. We know untreated medical and social problems causes stress that interferes with treatment and slows recovery. This stress can be prevented if the approach to treatment focuses on all aspects of care.

We have gathered a group of healthcare providers and social service agencies at our facility. All services - diagnosis, treatment and follow-up - are provided on site, eliminating inconvenient appointments and transportation, and assuring that all treatment complements the primary treatment plan. This specialized approach reflects our innovative commitment to excellence.

Our healthcare partners are individually licensed and certified by insurance providers. Our support service organizations are well known in the community. Our mental health treatment and therapeutic services continue to be outstanding. Services include:

- 7 day-a-week Partial Hospital Program (PHP)
- Intensive Outpatient Program (IOP)
