

Schedules & Processes

ALWAYS ON HAND TO KEEP THE PROJECT ON TASK

At **BC Stone Homes**, we know how excited you are to see your dream home come to life. Our Centralized Scheduling makes this process more efficient—and transparent. We have a scheduler who monitors the daily progress of every home we build. That includes yours.

Each task on the calendar has a call notification that signals our scheduler before completion. As the calls come in, the scheduler confirms them. The builder is now free to focus on quality control. This cuts down on down time. Most builders wait to schedule a task until

a day or two before, where wasted days add up to weeks or months.

BC Stone Homes helps prevent this with reliable, maintained schedules our vendors can trust.

We keep you informed on construction progress as phases are scheduled.

BC Stone Homes keeps everything moving. Through our proactive schedules and processes, you'll be ready to move into your home that much sooner.
