Notes from the Superintendent

Projected class sizes for 26-27 are just that projected. They are a placeholder before each school's staff works with their school principal on possible multi-age adjustments and configuration ideas. Multi-age classrooms are to be considered in reducing class size as a tool to increase student engagement between grade levels. RSU 9 will be moving forward with class size modeling that looks at continuous multi-age options so as to reduce year-to-year teacher movement and increased student continuity. The Cushing, Academy Hill, and Cape Code Hill School's staff are asked to work with their principals on possible restructuring configurations to optimize class sizes.
