Family Fire Safety Preparation

Each person in your family can help with fire safety preparation! Our checklist has tips for kids, adults, and for running a fire drill.

For the Kids

- Check for smoke alarms on each floor, in each bedroom, and outside each sleeping area.
- Do you know what sound a smoke alarm makes?
- Do you know what to do if the alarm goes off?
- Make sure none of the exits are blocked by furniture, toys, or clutter.
- Do you know your address?
- Make sure you know where your family meeting spot is if there is a fire at your house.

For the Adults

- Make sure the batteries are working in all smoke alarms.
- Think about installing interconnected smoke alarms so if one goes off, they all go off.
- Test the smoke alarms at least once a month.
- Create a home fire escape plan that includes two exits from each room.
- Practice your fire escape plan with your whole family at least twice a year.

Fire Drill!

- Call the family together to practice a fire drill.
- Explain that when the smoke alarm goes off, everyone should leave the house and go to your outside meeting place.
- Have everyone go to a different room and wait. Set off the alarm after a few minutes and watch how everyone reacts.
- When everyone is at the meeting place, have each person explain what they did when the alarm went off.
- Go over any questions and do the drill at least one more time.
