Baldur's Gate: Enhanced Edition
Baldur's Gate: Siege of Dragonspear
Baldur's Gate II: Enhanced Edition
INTRODUCTION

This document is a master list of the fixes, enhancements, and new features from the latest updates to Baldur’s Gate: Enhanced Edition, the Siege of Dragonspear expansion, and Baldur’s Gate II: Enhanced Edition. It will be updated with each new update to keep a growing record of everything we’ve done, starting with v2.0.

The document is split into sections for each update, then further broken down into the following subsections:

• Highlights: A detailed break-down of the update's most important fixes, enhancements, and new features.

• Engine Fixes: A complete list of the bug fixes that apply universally across all Enhanced Edition games in the Baldur’s Gate series.

• Bug Fixes: A complete list of the bug fixes that apply specifically to each game in the series.

At the end of this document you will also find a Modding Features section describing new scripting actions and triggers, new effect opcodes, and externalizations that can be used in your own creations.

A Note about Modding

Any time you apply an update to the game, any mods you may have installed will be cleared away to create a pristine installation. This may affect existing saved games; be sure to back up your installation and saved games before updating if you are using mods!

Beta Testing for Future Updates

You can access beta versions of future updates on Steam using the Betas feature in the Steam client. To access this feature, open the game’s Properties window in your Library, select the Betas tab, and choose the "Public Beta" option from the drop-down list. An update will begin to download if one is available.

Be aware that beta builds will inevitably have some bugs; that’s normal. If you find a bug in the beta build, we encourage you to submit a bug report for it on our official Redmine site. Be sure to include the following information:

• Steps to reproduce the issue locally

• A detailed, concise description of the behavior you observed

• A detailed, concise description of the behavior you expected to see

• Any additional notes that may help the development team when investigating the issue

• A .zip file containing your saved game, if appropriate

• A screenshot showing the issue, if appropriate

At any time you can opt out of the beta by selecting "NONE" from the drop-down in the Betas menu. You are under no obligation to participate in beta testing if you decide it’s not for you.

Beta Testing on Other Platforms

If you own the game through Beamdog, you can request access to the beta by contacting our support team at: support@beamdog.com

Be sure to include your Beamdog account’s email address if it’s different from the one you use to contact us. The support team will walk you through the process of installing the beta on your computer alongside the release version.

There is currently no beta testing option for GOG, the Mac App Store, or any of our mobile platforms.
v2.3 (June 8, 2016)

The biggest changes you will notice in the v2.3 update are to tooltips and localizations: tooltips now display a familiar stylized scroll motif, and non-English translations will no longer be stuck with placeholder text for the tutors in Candlekeep.

The full list of changes is provided below. We hope you enjoy the results.

**Engine Fixes**

- The XP bar will no longer flash blue on the Character Record screen when a level-up is available (23543)
- Crashes in the Steam version will now generate crash reports through the Steam client (23195)
- Tooltips will now display a more stylized scroll graphic (22885)
- The pause button will now be the same size when paused and unpaused (21882)
- Music will now play on the Throne of Bhaal end credits screen (21546)
- Item prices will no longer be cut off in the Buy/Sell screen in BGII:EE (20807)

**Bug Fixes - Baldur’s Gate: Enhanced Edition**

- An extraneous TLK table has been removed from the Turkish translation (23655)
- Turkish UI strings will no longer appear in English (23654)
- Story Mode protections will now apply to the Familiar as well as party members (23552)
- Aura of Despair description has been updated to be consistent with the Blackguard class description (23386)
- Tutor dialogue will no longer display the text "Placeholder" when the language isn't set to English (22183)

**Bug Fixes - Baldur's Gate: Siege of Dragonspear**

- M'Khiin will no longer repeat incorrect dialogue after the Goblin Raiders have been dealt with (23765)
- The achievement "In the Name of the Father" will now be obtainable (23764)
- Harpers Call will no longer reduce attribute scores below 1 (23722)
- Party members will now have full health when starting a new game with a pre-generated character (23642)
- BD7300 - Search map will no longer trap animals in impassable region (23558)
- Drow Runaways quest will now close if Shapur becomes hostile after having already encountered the teens (23472)
- Rasaad will no longer repeat his first rare selection sound when set by script (23420)
- Crusader Scouts will now attack the player if the guards are attacked (23393)
- Incorrect VO will no longer play for line said by Aun Argent (23374)
- Bence Duncan will now be visible in dialogue (23367)

**Tooltips**

When you hover the mouse cursor over a button or a creature, a scroll-like tooltip will appear with information about the object. Creatures will display their names and general health status, while buttons will display the name of the button's function.

As of v2.3, this scroll-shaped tooltip expands dynamically to fit the text no matter your configured font size.
- Line said by Bence Duncan will no longer play incorrect VO (23366)
- (Area) BD4000 - Wallgroups will now cover characters as expected (22792)
- Localized sound files will no longer play the wrong sound in the Beamdog build (22765)

**Bug Fixes - Baldur's Gate II: Enhanced Edition**

- The Shaman's spell "Spirit Fire" will no longer display an incorrect string when the doom effect is triggered (23777)
- Critical hit effect of the Shaman's Bear Spirit will no longer display an incorrect string (23778)
- Critical hit effect of the Shaman's Hound Spirit will no longer display an incorrect string (23774)
- Critical hit effect of the Shaman's Panther Spirit will no longer display an incorrect string (23773)
- Critical hit effect of the Shaman's Fox Spirit will no longer display an incorrect string (23772)
- [ToB] [Legacy of Bhaal] Jaheira will now be the correct level when summoned by the Fate Spirit (23762)
- Belghifet will now be referred to as a 'devil' not 'demon' (23753)
- (Area) BD0130 - Sarevok's secret chamber entrance will no longer be partly impassable (22237)
- PCs will now be able to shut down Voghiln's romance earlier (19876)
- It will no longer be possible to repeat Hoach Randymonk's "goodbye" dialog with Glint over and over (19476)

- [Linux] Game version will now display correctly (23740)
- Story Mode protections will now apply to the Familiar as well as party members (23723)
- Avengers will now have the correct Chain Lightning icon in their Priest book (23649)
- Harpers Call will no longer reduce attribute scores below 1 (23435)
- Water tiles will no longer be faulty in Sahuagin City (23430)
- Multiple castings of Aura of Despair will no longer stack (23362)
- Time to Slay achievement will now trigger in Throne of Bhaal (22612)
- Nalia will no longer hand over more than one payment (19886)
The v2.2 update is aimed at improving multiplayer stability, as well as addressing some player concerns about changes to the game’s graphics and interface. This update also adds native support for .lua files in the override folder, opening more doors for modders. All of this is in addition to the more than 200 bug fixes across Baldur’s Gate: Enhanced Edition, Siege of Dragonspear, and Baldur’s Gate II: Enhanced Edition.

The highlights are detailed below. We hope you enjoy the results.

**Highlights**

**Improved Multiplayer Stability**
Multiplayer connections should now be much more stable than before. Gather your party and venture forth!

**New Option: Allow Scrolling Out of Bounds**
Scrolling the viewing area past the edge of the map is now disabled by default. If you want to re-enable it you can turn this option on in Options > Graphics.

**New Option: Nearest Neighbor Scaling**
A number of players asked for an option to switch the scaling method back to "Nearest Neighbor", so we’ve added this option to the Options > Graphics screen.

**Character Record Update: Combat Stats Display**
The AC heading is now organized more intuitively and summarizes your character’s current AC modifiers at the top as well as the end of the section.

**Steam Achievements: Localization**
Our awesome volunteers have translated the Steam achievements for BG:EE into French and Polish, and for BG:EE in French, Polish, and Italian.
**Item Description Icons Fixed**

In the 2.0 update, the description icons for some items in BG:EE became corrupted. We spent a few days fixing the graphics so they’ll display correctly now.

**Throne of Bhaal: Loot Transition**

When characters die in the final encounter in the Shadows of Amn campaign, their gear will now transfer correctly to the Throne of Bhaal campaign instead of disappearing completely from the Realms.

**French: Voice Overs in BG:EE**

The original French voice overs have been added to BG:EE; just set the language to French and the game's sounds will change to French. (Only original content will be voiced; Enhanced Edition content will remain unvoiced.)

**Polish: Voice Overs in BG:EE (Update)**

The Polish translation features voice overs for original game content in BG:EE, but there was an issue with the voice overs being incomplete. We’ve remedied that issue, so the voice overs should now play everywhere that they’re supposed to.

**New Modding Feature: M_*_.lua**

The engine will now recognize and load additional M_*_.lua files, allowing modders to create small lua files and use them in game. For example, you can create a file called M_cport.lua that contains the following:

```
function addPortrait(name, gender)
    table.insert(portraits, {name, gender})
end

addPortrait('SCOTTL', 2)
addPortrait('SCOTT2L', 1)
```

Drop the file into your override folder, and the portraits SCOTTL and SCOTT2L will be added to the available portraits using the assigned genders (1 for male, 2 for female).

This means, among other things, you can package a lua file with your portrait pack and configure the display of custom portraits ahead of time, without worrying about breaking compatibility with future updates.

**Engine Fixes**

This update features a number of fixes and improvements to the Infinity Engine as a whole. The items in this list affect all Infinity Engine games when they’re updated.

Note that some of these fixes may be described as being specific to one game, but they represent changes to the engine's code that affects all games.

- There will now be an extra confirmation prompt before beginning the Dual-Class process, to inform the player that they cannot cancel the process once started (23436).
- Summoned monsters will no longer lose the Legacy of Bhaal bonus stats when loading the game (23289).
- 18 Strength will no longer be displayed as "18/0" (23284).
- Game will no longer crash if Create Party is accessed during Character Generation (23274).
- Localized UI files will no longer have outdated references (23199).
- Graphics Display Options will now have relevant descriptions (23197).
- The game will no longer crash when importing party members in single player (23194).
- Game will no longer crash when trying to save (22989).
- Switching from Mage level 8/9 spellbook page to Priest Scroll will no longer crash the game (22940).
- Canceling Dual-Class to thief will no longer allow unlimited skill points (22893).
- Going back during Dual-Class to thief will no longer allow unlimited skill points (22892).
• [Multiplayer] Starting a new game will no longer crash when using a language other than English (22852)

• [Multiplayer] Game will no longer crash on area transition or when saving (22843)

• Dual-Class characters will now have CRLFs between classes in character record screen (22776)

• Magical weapons will no longer appear in inventory when dealing with containers (22775)

• Saves with a "space" at the end will now appear in the list of available saves (22755)

• Inventory full comment will no longer replace the current dialog (22744)

• Tavern Rumors will no longer persist after loading a quicksave (22666)

• Gem Bags will no longer act as Bags of Holding in shops (22677)

• The Abilities pane at Character Creation will no longer be scrollable (22668)

• It will no longer be possible to duplicate or lose items when moving them in or out of containers (22634)

• Projectiles will no longer use the animation of the previous missile after switching weapons (22907)

• Characters will no longer become invisible again after exiting Stealth mode (22840)

• Clicking the up arrow for the text box will now scroll the text within the box (22857)

• The default combat log size will now allow for more text to show (22349)

• Half-elves will no longer have access to all mage specializations (22329)

• Handwritten Journal Entries will no longer be overwritten (22327)

• Class window does not scroll from scrollbar or cursor grab (22275)

• AC breakdown in inventory screen will no longer show over hit points (22263)

• [Multiplayer] Loading a saved game created before v2.0.62.2 will no longer crash (22191)

• [ToB] Newly created Druids will no longer be able to memorize more spells than they have spell slots available (21904)

• Auto-pause condition "Target Destroyed" will now work (21776)

• (Character Record) The Weapon Proficiencies and Fighting Styles headings will now appear on the Combat Stats tab (21699)

• (Character Record) Damage information will now be displayed separately for each of Main-Hand and Off-Hand weapons (21698)

• (Character Record) Number of Attacks will now be displayed as Attacks Per Round and will now be its own heading (21693)

• (Character Record) AC heading in the Combat Stats tab will now be organized intuitively (21692)

• (Character Record) "Combat Stats" tab will now show proficiency information and will be sorted according to importance (21699)

• Inactive class xp bar will no longer glow for Dual-Class characters (21588)

• Quick loot bar will no longer show items from a previous game after loading an auto-save (21529)

• Map markers will now be shown regardless of where Player1 is located (21506)

• Auto-Save slot will no longer have a portion of the world map in the thumbnail (21418)
- (Options) Displayed options will now have appropriate text descriptions (21250)
- Shamanic dance will now have the correct icon on the Record screen (20861)
- Alt-tabbing will no longer lead to extended zoom in/out levels (2067)
- Map marker labels will no longer obscure each other (20848)
- (Art) New status icon .bams will no longer appear displaced (20746)
- Dual-Class characters will no longer have level up glows for inactive classes (20620)
- [DirectX] The message "Your main character has been killed. You must restart the game." will now be shown if Charname dies (20711)
- There is now an option to change the scaling method on sprites to "Nearest Neighbor" in Options > Graphics (21770)

**Bug Fixes - Baldur's Gate: Enhanced Edition**

- Multiple castings of Aura of Despair will no longer stack (23333)
- Candlekeep tutor will no longer say there is a Done Quests button (23277)
- Skie recruitment dialog will no longer trigger spontaneously (22013)
- The Archer kit will no longer be able to wear Ankheg Plate Mail (22014)
- Save thumbnail will now be correctly placed when overwriting an old save game (22998)
- The achievement "Water, Water, Everywhere" will now correctly unlock (22997)
- Adoy's Enclave door will no longer spam text during fight against Ekandror (22966)
- [Polish] The localized voice-overs from vanilla BG will now be complete (22963)
- Neera's Quest will now give proper Journal entries (22849)
- Adoy's Enclave will now have consistent party entry and exit requirements (22848)
- Party AI tooltip will now have on and off states (22839)
- [Multiplayer] Storing the Coronation evidence in a scroll case will no longer restrict client dialogue to a fatal outcome (22831)
- Dorn, Neera, and Rasaad will now be able to have Morale Failures (22803)
- Frozen Fist will now do the correct amount of damage (22796)
- Blue lines will no longer appear around puddles in Gullykin map (22798)
- Laurel will now thank the player once twelve gibberlings have been killed (22753)
- There will now be no black lines on pools of water in Nashkel mine (22696)
- French voices will now be available in BG:EE (22670)
- Spider's Bane will now protect against Grease (22646)
- Baeloth will no longer gain excess castable spells per day on level up (22508)
- Candlekeep: corner of pool next to Gorion will no longer be darker than rest of pool (22593)

**Candlekeep’s Tutors**

The tutors in Candlekeep provide a wealth of useful information, offering insight into how to use your class’s special abilities as well as basic information about playing the game. Speak to each of the tutors in Candlekeep to learn what they have to offer.

Tutors won’t tell you secret information, but heeding their advice may assist you in discovering secrets throughout the game. You’ll know the tutors by their light green robes. There are sixteen tutors in all.
**New Mage Book and Priest Scroll**

The v2.0 spellbooks for priests and wizards have received a significant overhaul. Instructions are printed on the right side of the screen and replaced with the full spell description when you click on a spell's name.

To add a spell to your list of memorized spell slots, click the Memorize button. You can also do this by clicking directly on the spell's icon. Your memorized spell slots are shown at the bottom of the screen; click on one to remove it from memorization.

Take note! You must still rest before you can cast your selected spells.

- Black Pits ending screen will no longer have missing UI (22280)
- Palin will no longer drop Peladan when he transforms (22261)
- The correct picture will now be used for the text screen when travelling to the mysterious island (22246)
- [Localization] Russian and Ukrainian credits strings will now be updated (22110)
- AR3700 will no longer be so far west on the world map (22065)
- Mage Book/Priest Scroll - there will now be borders for each spell slot (21981)
- Thief skills scrollbar will no longer scroll text over the UI (21426)
- The correct number of sirines will now spawn when resting in ar3600.are (21398)
- [French] Autosave and Quicksaves will no longer overwrite each other (21389)
- Description images will no longer be missing or broken (21122)
- New status icons will no longer be missing (20713)
- [UI][MP] Password Required dialog will no longer have layout issues (2016)
- [UI] Character Arbitration will no longer have art showing through transparency (2021)
- (Water) AR2100 - Overlay transparency will now be adjusted (2098)
- Rhyte’s Last Arrow +2 will now have the same properties in BG:EE and SoD (19960)
- Russian VO will now play when the language is set to Russian (11896)

**Bug Fixes - Siege of Dragonspear**

- Greater Wyverns and Green Dragons will now be immune to all types of poison (23332)
- The achievement Defender will no longer unlock after meeting Hephernaan (2327)
- Lucilla will now reward you if Autinn is killed (23074)
- There will no longer be invisible people standing in the way outside Dragonspear Castle (23038)
- The manuals have been edited (21792, 22392, 2250, 22607, 22658, 22657, 22784, 2290, 2290, 2292-23037)
- Wands of Magic Missile will no longer give the "Unaffected" message against a valid target (23092)
- Julann will now offer a reward once her quest is completed (22953)
- [Advanced AI no longer uses Defensive Stance while the Use Special Abilities setting is turned off (22951)
- Brielle and Vessanal will no longer behave as if they were unpetrified (22930)
- M’Khiin will now only be able to use Kruntur’s Armor after choice is made (22880)
- Neothelid animation will no longer twitch (22886)
- Neothelid animation will no longer reveal tooltip while hiding (22884)
- Neothelid animation will no longer have classic selection circle graphics issues (22883)
- Imported player generated characters will no longer have their own Story Mode settings enabled (22837)
• Velsharoon will now be referred to as “Lord of the Forsaken Crypt,” not "Lord of the Forsaken". (22834)
• Crests in Coalition Camp area will now be correct. (22830)
• Dynaheir will no longer be missing from Coast Way crossing if dead in an imported BG:EE save. (22829)
• Evermemory and Ring of Wizardry will no longer stack. (22826)
• Beljuril gems will now stack. (22825)
• Male and female Bridgefortians will no longer have Neera’s morale sound assigned. (22798)
• (Area) BD4000 - Wallgroups will now cover characters as expected. (22792)
• Achievement titles and descriptions will now be correct on Steam. (22791)
• Neothelid will now be immune to its own breath weapon. (22754)
• Crommus and Carline will no longer be affected by Turn Undead. (22752)
• BD_JOINXP variable will now be reset to 0 when joinable NPCs are spawned in SoD campaign. (22743)
• Hephernaan will no longer have Teleport Field memorized. (22725)
• Corwin’s Bwoosh barrel conversation will no longer repeat or create multiple map markers. (22693)
• Caelar’s sprite will no longer be shaded when she gives speech at inner gate. (22682)
• It will no longer be assumed that the player meets Halatathlaer before meeting Daeros. (22679)
• Casting Raise Dead from a scroll will now always work. (22676)
• Slime Sickness quest will now update if you put the Enchanted Seed in the Tree Trunk before giving the cure to the Poisoned Crusader. (22676)
• You will no longer get a journal entry for Glint’s quest if he has never been in the party. (22662)
• You will now get a journal entry after talking to Glint. (22661)
• Pick Pockets ability will no longer increase after level drain. (22648)
• [Windows] Male: commanding voice set idle line will now match text. (22628)
• You will now be able to tell Brother Deepvein that Semahl is dead. (22602)
• You will no longer get a journal entry if Semahl is killed by undead. (22596)
• You will no longer get two journal entries if you decide to kill Semahl. (22598)
• The achievement In the Name of the Father will no longer unlock. (22834)
• The achievement Family Secrets will now unlock. (22533)
• Obtaining information from Kava will no longer give a journal entry about speaking to Rend. (22529)
• String Cutter Achievement will no longer unlock until the correct enemy is killed. (22527)
• Baeloth will no longer have extra castable spells per day at level 7. (22509)
• M’Khiin will now have Infravision. (22492)

---

**Goblin Companion: M’Khiin**

Throughout your adventures, you will meet a variety of strange characters, and some of them may offer to join your party.

Perhaps the strangest of these characters is the goblin Shaman, M’Khiin. Save her from a life in the fighting pits, and she’ll be happy to summon spirit animals to your aid.

It just goes to show that, although most creatures you face want nothing more than to kill you and wear your entrails as a hat, not all of them do.
- There will now be a named auto-save after starting a new SoD game (22234)
- Party members in SoD will now have their correct rare selection sounds when set by script (22314)
- Caelar will now have her correct rare selection sounds (22315)
- You will now be able to tell Herod that Teleria has been dealt with (after she has left peacefully) (22279)
- You will now get a journal entry after talking to Teleria (22276)
- (Area) BD7230 - Open cage doors will no longer be difficult to click on (22233)
- Quest will now update when you drop the Barrel of Bwoosh! at the indicated spot (22209)
- Localized BG:EE content will no longer be missing from the SoD build (22165)
- Chapter labels will now be consistent in saves (22067)
- On Boareskyr Bridge, it is no longer possible to trigger the Well Spirit and the Bridge Vision at the same time (22056)
- Journal will now update after healing Poisoned Crusader (22033)
- Journal now updates properly when speaking to Keherrem after the Bridge Vision (21713)
- Forcing Wynan Hess hostile will now cause other Bridgefort NPCs to go hostile as well (21461)
- Graphical artifacts will no longer appear on screen edge while zooming or panning (21038)
- (Area) BD7300 - Characters will no longer stand below their foot circles at ground level (21028)
- Coast Ways Bridge will no longer have square artefacts (20600)
- Duplicate conversation about 7-Legged Spider with Voghiln has been removed (20815)
- You will no longer mention the Planetar Feather to Neera twice (20814)
- Will now get journal entries for turn-in of items along with count journal entry (20812)
- Will no longer get a journal quest saying you’ve turned in two items when you turn in three items (20809)
- Neera will now give the quest “Call of the Wild Mage” in Bridgefort even if she does not join party (20742)
- It is now clearer where to place the Barrel of Bwoosh! (20740)
- At Dragonspear Castle, Marshal Nederlok will now have state appropriate conversation (19832)
- “On the Roof” journal entry now triggers after speaking with DeLancie (19817)
- ‘Strunk’s Elementals’ journal entry now updates correctly if Strunk is attacked (19779)
- It should now be clearer how to use the Stone Dowsers (19774)
- Upon attacking Endless Watcher and bringing him below 50% health, Zhadroth will now appear and maze him (19730)
- General Stonehand will no longer repeat dialog and interjections (19677)
- Pritchard Gardnersonson's quest will now conclude properly (19671)
- (Area) BD6000 - Characters will no longer be able to float above chasms (19094)

**Journal: Quest Log**
The Journal screen can now be brought up from the gameplay screen or the Map screen without interrupting gameplay. Continue walking across large maps while reviewing your quest entries, or draft a longer journal entry while waiting for your dead foe's Entangle spell to wear off.

Because the Journal window now only occupies a small portion of the screen, you can also keep it open for reference while you explore a larger dungeon. When you’re ready to close it, simply click the X in the corner of the Journal window, or select the Gameplay button at the top of the left sidebar.
• (Area) BD7230 - Wallgroups will now cover characters as expected (19024)

• "Well, It's Heavy" achievement will now be obtained if you tell Ophyllis not to repay you (19012)

• (Area) BD6200 - Ambient sounds will no longer give the impression that it is daytime (18866)

• (Area) BD0101 - Search map and wallpolys at the Ducal Palace entrance will now be made identical to BD0010 (18808)

• (Area) BD0110 - Polys/search region for wall bit will now be refined (18800)

• Neothelid creature animation will now be refined (17929)

• Evil and neutral joinable NPCs will now be present at the coalition camp entrance before the battle (22704)

• It will now be possible to talk to Ferrusk after curing sick crusaders (23377)

• (Area) BD4000 - You will no longer be able to open the Dragonspear Castle wall like a door (22226)

• Localized sound files will no longer play the wrong sound in the Beamdog build (22768)

• WeiDU APPENDing to tooltip.2da will no longer crash the game (22499)

• Enhanced bard song will now affect the singing bard and will now function like other bard songs (22773)

• [Windows] Chain Contingency will no longer crash the game and will store level 8 spells (22300)

• Picking up the Wheel of Obliteration too early will no longer break the end of Rasaad's quest (23193)

• Game will no longer remain in cutsene after entering the Shadow realm (23189)

• BGII:EE will now install the BGII:EE manual rather than the BG:EE manual (23188)

• Characters killed in the final confrontation will no longer lose gear left on the ground (23662)

• Bodhi will no longer display "NO VALID REPLIES OR LINKS" when romancing Dorn (23017)

• The Monk abilities Stunning Blow and Quivering Palm will now have description icons (23005)

• ToB saves will no longer be accessible from the SoA part of the game (22943)

• 'Emphatic Manifestation' will no longer instantly die when walking in the area on LoB mode (22841)

• Frozen Fist will now do the correct amount of damage (22796)

• [Multiplayer] Game will no longer remain in cutsene if chapter 2 cutsene is skipped (22786)

• Camera will no longer pan away from Neera during her introductory cutsene (22608)

• Psionic Blast will now have a spell description (22127)

• "Permanently remove spell" text will no longer refer to the Journal (21932)

• The achievement Triple Cross will now unlock after Phaere is killed by the Demon (21362)

• Vittorio will now be in sight when the Gong quest dialogue occurs (21877)

• Water will no longer have tile edges (8449)

• [TBP2] Tartle and Brodle's finale OT lines will now be synced with their VOs (10943)

• The correct subtitles will now be displayed when Show Subtitles is enabled (10771)

• Door tiles will no longer be darker than the surrounding area (7556)

• Colored Selection Circles will now be disabled by default (18780)

Bug Fixes – Baldur's Gate II: Enhanced Edition

• Priest of Tyr Kit in Character Creation will no longer be described as an unskitted Cleric (21364)

• [Windows] Chain Contingency will no longer crash the game and will store level 8 spells (22300)

• Game will no longer remain in cutsene after entering the Shadow realm (23189)

• BGII:EE will now install the BGII:EE manual rather than the BG:EE manual (23188)

• Characters killed in the final confrontation will no longer lose gear left on the ground (23662)

• Bodhi will no longer display "NO VALID REPLIES OR LINKS" when romancing Dorn (23017)

• The Monk abilities Stunning Blow and Quivering Palm will now have description icons (23005)

• ToB saves will no longer be accessible from the SoA part of the game (22943)

• 'Emphatic Manifestation' will no longer instantly die when walking in the area on LoB mode (22841)

• Frozen Fist will now do the correct amount of damage (22796)

• [Multiplayer] Game will no longer remain in cutsene if chapter 2 cutsene is skipped (22786)
v2.1 (April 15, 2016)

The v2.1 update is aimed at fixing critical issues reported in the v2.0 release. We hope you enjoy the results.

**ENGINE FIXES**

This update features a number of fixes and improvements to the Infinity Engine as a whole. The items in this list affect all Infinity Engine games, which means that in addition to Baldur’s Gate: Enhanced Edition and Baldur’s Gate II: Enhanced Edition, these changes will also affect Icewind Dale: Enhanced Edition when it’s updated.

Note that some of these fixes may be described as being specific to one game, but they represent changes to the engine's code that affects all games.

- Loading a saved game in multiplayer will no longer crash when cloud save is enabled (22720)
- Multiplayer clients will no longer lose control and interface at the start of a new game (22718)
- Legacy of Bhaal mode will no longer reset to Insane when a client joins a multiplayer game (22717)
- Cancelling a Dual-Class action will no longer remove weapon proficiencies (22697)
- Using the latin char “ñ” on name of saved games will no longer crash the game if using Steam Cloud Saves (22669)
- Game will no longer crash if the selected portrait is too big (22633)
- Casting sequencers will now show a description of how they work (22609)
- [SoD only] Characters who have surrendered will no longer grant additional XP if killed (22591)
- Drinks tab in Candlekeep Inn will no longer show a string number instead of the inn’s name (22536)
- Dialog popups in multiplayer will no longer get stuck on the screen (22496)
- The Contingency screen will now display the correct information text (22489)
- The Ready to Play check box will now be visible for all characters in multiplayer (22488)
- Cleric spells can now be used in contingencies (22487)
- Playing on the Legacy of Bhaal difficulty setting is now visible in the Options > Gameplay menu (22448)
- In multiplayer, Character AI choices should be remembered after a load (22335)
- Playing on the Legacy of Bhaal difficulty setting should be visible in the Options -> Gameplay menu (22332)
- Mage specializations now use the correct race restrictions (22305)
- Maze and Imprisonment spells will no longer remove proficiency bonuses (22298)
- Multiplayer clients will no longer require several attempts to connect to a host session (22294)
- Multiplayer clients will no longer get a popup that erases the entire when closed (22290)
- The game will no longer crash in the Gorion cutscene when using the 1.3 beta on steam (22245)

**GOING BACK...**

Feeling nostalgic? On Steam, there’s a way to experience an older version of the game via the Betas tab of the game’s properties window. Simply select the v1.3 beta option and wait for the download to finish.

Be aware that reverting to v1.3 means you won’t gain the benefits of all the fixes and enhancements in the latest version of the game, as well as the Siege of Dragonspear expansion, which requires v2.0 or later in order to run.

Also be aware that saved games started or loaded with v2.0 may not work with v1.3, because they will be relying on code changes that didn’t exist in v1.3.

This option is currently only available through Steam. Enjoy a taste of Baldur’s Gate history!
Quick Weapons and Off-Hand Items

Fighters have four quick weapon slots that they can fill with whatever weapons they like. Other classes have fewer slots, but any character with more than one weapon slot can fill those slots with any weapon they can use.

All characters also possess an off-hand slot, which can be used to equip either a shield or a one-handed melee weapon. If the character’s currently selected main-hand weapon is a weapon that cannot use the off-hand item, that item will remain out of use until the character equips a main-hand weapon that supports it.

This behavior is new as of v2.0. Previously, if you wanted to switch between a Longbow and a Sword-and-Shield combination, you had to juggle your equipment through the Inventory screen. Now you can do it directly in gameplay, even in the middle of combat!

- It is no longer possible to cast arcane spells from quick slots while wearing armor (22241)
- Multiplayer clients should now be able to connect with higher latency (22200)
- The game will no longer crash on save in multiplayer with Cloud saves enabled (22199)
- Multiplayer host will no longer crash when casting Find Familiar (22173)
- Multiplayer clients will no longer pause on area transitions after the host is killed and reloads (22169)
- Multiplayer new characters will now correctly start at level 1 in the Baldur's Gate campaign (22151)
- The Character Record screen in BGII:EE has been updated to match the new layout in BG:EE (22153)
- It is now possible to load an old Enhanced Edition save game from 1.2 or earlier (22147)
- Legacy of Bhaal setting will now be correctly saved (22146)
- The game will no longer crash when you go back to the Options menu from importing a save (22520)
- Difficulty sliders will now be positioned correctly (22005)
- The Export Filename label will now display correctly (22009)
- Legacy of Bhaal stats will no longer be reset to normal for creatures when loading a save (21987)
- Proficiencies will no longer be ignored for the off-hand weapon if you have a weapon with both a ranged and melee function in the main hand (21865)
- Changes to the game’s options will now persist when there are non ASCII characters in the data path (21672)
- Story Mode and Nightmare mode will no longer activate and deactivate randomly (21651)
- Pressing Alt + F4 while game is loading will no longer cause on-screen ugliness (21509)
- Music will now play correctly in all areas and menus on Mac (20197)

Bug Fixes - Baldur's Gate: Enhanced Edition

- AI Selection UI background will now fit displayed content (22263)
- Story Mode no longer grants the "Godlike" achievement on Steam (22281)
- Polish sound sets for player characters will now play correctly (22238)
- The Wand of Paralyzation, Wand of Spell Striking, and Wand of Cursing will now correctly cause neutral targets to become hostile (22285)
- Ukrainian translation credits are now displayed in Ukrainian (22347)
- Rugged Leather +2 can no longer be worn with magical protection items (22361)
- The Shield spell and Shield Amulet now protect against Wands of Magic Missile (22474)
- Cenk "Skysect" Aslan has been added to the list of Turkish translators. Thank you, Cenk! (22486)
- Mods that add kits no longer break because of 25ST-WEAP.2da (22694)
Bug Fixes - Siege of Dragonspear

- The in-game text that describes supported languages has been improved (22608)
- Innate healing abilities will no longer be used on distant allies during combat (22609)
- The map markers in Dead Man's Pass have been moved to their correct locations (22606)
- Wraiths now have the correct undead traits (22668)
- The game will no longer freeze in cut scene mode if Ashatiel spawns on a skull trap and dies (22674)
- The second Essence of Clarity in the Lich Outpost will now drop even on lower difficulties (22634)
- The assigned NPC scripts in PARTYAI.2da are now consistent between BG:EE and SoD (22631)
- Korlasz's defenders will now turn hostile if she is attacked or killed before starting dialogue (22624)
- Aura effects employed by enemies will now be used at the correct range (22622)
- An imported Dorn will no longer play "Leader" sound when fatigued (22621)
- The switch in BD4600 will now use the correct search map and polygon (22665)
- The Druid class description now clarifies that they are allowed to wear non-metallic armor and shields (22538)
- Shar-Teel will no longer remain in the party after Chapter 7 (22526)
- Minsc's fourth rare selection sound from BG:EE has been restored (22525)
- Chapter 9 cutscene will no longer be broken by the arrival of Tsolak's messenger (22523)
- Glint will no longer rejoin the party immediately after being kicked out (22504)
- Andrus Gath will no longer be summoned if rats are killed (22498)
- M'Khiin and Baeloth will now be present in Coastway Crossing (22497)
- Neera's quest will now finish once she is given five items when she is not in the party (22354)
- M'Khiin will no longer repeat the wrong dialogue in the Underground River map (22331)
- Monsters in wilderness areas will now respawn less frequently (22340)
- Concentration checks when a spellcaster takes damage will now use the original Baldur's Gate behavior (22338)
- Archer opponents will no longer attempt to run away while entangled (22334)
- Coldhearth will now properly use Spell Shield (22331)
- Longbow on the small table at the Warrens' entrance will no longer get stuck in the player's inventory (22329)
- Neera's quest items will no longer disappear if dropped on the ground (22284)
- Familiars will no longer prevent the player from getting out of bed (22281)
- Only one Nobleman now appears in the Elfsong Tavern (22278)

Familiar Conversation

If you're a wizard or a ranger with the Beast Master kit, you can summon a permanent companion using the Find Familiar spell. While this companion isn't as sturdy as your other party members, having a familiar gives you a healthy boost to your own Hit Points, as well as someone to talk to when times get rough.

As of the v2.0 update, you can also ask your familiar for advice in Baldur's Gate: Enhanced Edition and the Siege of Dragonspear expansion, just like you could always do in Baldur's Gate II: Enhanced Edition.

You can also stow your familiar in your backpack. This is an excellent way to keep your familiar out of danger, which is important; if your familiar dies, you will permanently lose one point of Constitution!
• Khalid and Neera will no longer be killed by the Spellstone at the Bridgefort (22274)
• Story mode will no longer grant the "Godlike" achievement on Steam (22284)
• Indoor rats and bats will no longer have tooltips (22250)
• Story Mode no longer allows party members to move or attack while Shadowstep is active (22248)
• Kael and Umar will no longer drop drowcraft items (22247)
• Korlasz will now recast her defensive spells if the party rests her area (22242)
• Corwin's voiceover has been cut to match the line, "Are you ready to leave the city?" (22244)
• Coldhearth will now say the correct line if the player talks to him after having completed his quest when Edwin is in the party (22228)
• Coldhearth will now give the Dread Hammer +2 as a reward even if Edwin interjects (22198)
• Dauston will no longer appear both inside and outside of the Flaming Fist compound (22132)
• The Sandthief's Ring on Safana will no longer be consumed after one use (22174)
• Dragonspear Castle's area art has been updated (22156)
• The player can no longer get trapped behind the door to Fanegonorom's room (22145)
• Glint will now say the correct romance lines (22102)
• Haer'Dalis will now receive a second proficiency point in Long Swords if he has at least 1.2 million experience points (22243)
• Story Mode will no longer grant the "Godlike" achievement on Steam (22252)
• The 1.3 beta option will no longer cause the game to crash when starting a new game (22302)
• The Shield spell and Shield Amulet now protect against the Wand of Magic Missile (22475)
• The Comet spell will now cause the expected effect as described in the spell description (22490)
• Magic Golems can now be killed in Story Mode (22660)

**Bug Fixes - Baldur's Gate II: Enhanced Edition**

• Corwin will now say the correct romance lines (22101)
• Kael and Umar will no longer appear twice in the ogre camp (22055)
• You should not see English strings in the BG:EE campaign if the language is not English (22046)
• The player can no longer walk on top of tents in Dragonspear Castle (22035)
• Glint's romance will now end correctly at the appropriate time (22004)
• Petrified companions will now be restored after finishing Korlasz's tomb (21970)
• Cinematic movies will no longer have numbers displayed at the very end (21819)
• Thieves Cache quest now works correctly (21760)
• The party stash now has map markers in all camp areas (20758)
• M'Khiin will now speak in the spider cave (20361)
• Exiting from "reform party" will no longer cause the "reform party" window to remain forever (20349)
• Local Area Network description now displays its entire text (20290)
• Character Record will now display the active weapon style bonuses (19728)
• Mods that add kits no longer break because of 25ST-WEAP2-da (22694)

• The Priest of Tyr kit now receives a Holy Symbol of Tyr at level 25 (22343)
• Italian localization has been added and can now be selected from the Language screen (22330)
• The Daystar weapon is now treated as a +4 weapon when wielded against evil creatures (22496)
**v2.0 (March 31, 2016)**

The v2.0 update includes a number of new features and enhancements that may require some explanation. We’ll do our best to explain all of them below so that you can get right to enjoying them as quickly as possible. Unless otherwise noted, the changes in this section affect both Baldur’s Gate: Enhanced Edition and Baldur’s Gate II: Enhanced Edition. We hope you enjoy the results.

**User Interface**

**Fan Design: Character Record**

Special thanks goes to forum user 00zim00, who designed the layout we’re currently using for the Character Record screen in Baldur’s Gate: Enhanced Edition. This screen will likely change in future updates, but the version you see now is the result of weeks of beta testing and discussion with members of our community. Excellent work, 00zim00!

**Area Map Background**

On the local area map screen, players can now toggle an option to display a turquoise overlay showing the walkable parts of the current area, which can help when navigating dark dungeon corridors. By default this option is disabled; if you find that you want it enabled by default when you open the map screen, you can change this setting from Options > Graphics.

**Journal Pop-Up Messages**

When the player’s journal is updated, a window now appears at the top of the screen with the new entry’s text. Selecting the text in the window will bring up the Journal screen where the full entry can be read. You can disable this feature from Options > Gameplay > Feedback.

**Health Bars**

When in combat, creatures now display an approximation of their current health visually with a colorized bar above their heads: green for allies and red for enemies. You can disable this feature from Options > Graphics.
Character Options

Shaman
A Shaman is a holy person, though not necessarily one that would be called civilized. The Shaman's power derives from nature, like the Druid's, but is more spiritual than primal. Nowhere is this more evident than in their ability to summon powerful spirits to do their bidding. A being of two worlds, Shamans value balance over dominance.

The Shaman is an entirely new base class that combines the druid's spell list with the sorcerer's style of casting spells from a pool instead of preparing each spell separately. The Shaman also has the innate ability to summon spirits at will.

Priest of Tyr
Tyr is the deity of law and justice and is primarily concerned with the punishment of wrongdoers and the general furthering of law and good in the world. The belief in justice through (benevolent) force, or at least armed vigilance, is the reason for Tyr's existence.

The Priest of Tyr is a Cleric kit that is being brought over from Icewind Dale: Enhanced Edition.

Create Party
When starting a new game, players can now opt to create up to six characters to take with them. This functionality previously existed through the Multiplayer menus, but now players can create a party of player-created characters within Single Player as well.

New Portraits
Four new portraits have been added to the available list during character creation. Two of these portraits are half-orcs, and the other two are designed specifically to be used by Shaman characters—but of course, you can use them on any of your new or existing characters.

Expanded Color Selection
The available color options for Hair, Skin, and Clothing have been greatly expanded to give every player as many realistic options as possible for their character's appearance.

Advanced AI
New characters now come enabled with advanced scripting that makes intelligent tactical decisions without the need for micromanagement. This behavior can be fine-tuned by toggling options that appear on the Scripts screen (accessed from Character Record > Customize > Script during play).

Balance Updates

Weapon Proficiencies
In Baldur's Gate II: Enhanced Edition, it used to be possible to create a new character with more weapon proficiencies assigned to a single weapon than would be allowed through the course of normal adventuring. This has been rectified. (Modders can change this behavior; see the section titled Modding Features.)

Poison Weapon
The Poison Weapon ability of the Assassin and Blackguard kits has been updated to only apply to each creature no more than once per round, although successful applications on subsequent rounds will continue to stack. The duration and damage of the poison effect now also scales with the character's level.

The ability description, along with the kit descriptions for the Assassin and Blackguard, have been updated in-game to reflect these changes.
Enchanted Weapon
The Enchanted Weapon spell, instead of creating a magical weapon that the caster can wield, now alters the target creature's currently equipped weapon to increase its effective enchantment level to +3. The spell's description has been updated to reflect this change.

Cloak of Fear
The Cloak of Fear spell no longer causes targets to drop inventory items on the ground, in order to avoid situations where a player might lose an item without realizing it until it's too late.

Stupefier +1
The Stupefier +1, which was stupifyingly overpowered, has been modified to cause its stunning effect less often, and now offers a saving throw to resist the effect. The stun effect's duration has also been reduced.

Bard Song
Bard songs in Baldur's Gate: Enhanced Edition now protect targets from fear effects in addition to improving morale, just like they do in Baldur's Gate II: Enhanced Edition.

Stupefier +1
In addition, deafened creatures are no longer affected by bard songs, and activating a bard song will now end a bard's invisibility. Multiple bard songs of the same type no longer stack their effects.

Sun Soulray
The Sun Soulray ability of the Sun Soul Monk kit now affects only a single target, instead of a cone-shaped area.

Ioun Stones
Ioun Stones now universally have a weight of 0, and no longer protect the wearer from critical hits.

Throwing Daggers
Throwing Daggers now universally have a weight of 0.

Gameplay Difficulty

Story Mode
With Story Mode, the player's characters cannot be killed in combat and are gifted with Strength scores of 25. This difficulty mode is designed to facilitate a stress-free experience for those players who are not interested in plumbing the tactical depths of Infinity Engine combat.

Legacy of Bhaal
With Legacy of Bhaal, the creatures that are faced in combat will be given additional hit points, deal more damage, and generally be scarier. This difficulty option is designed for seasoned veterans who are looking for truly unethical levels of challenge.

Description Updates

Wizard Slayer
The Wizard Slayer kit has always caused 25% spell failure on successful attacks, but this was mistakenly documented as 10%. The error has been corrected in the kit description.
Mage Specialists
Specialist mages have always received a +2 bonus (and bestowed a -2 penalty on enemy creatures) on saving throws to resist spells of their chosen school. Additionally, specialist mages have always received a +15% chance to learn spells from their chosen school, and a -15% chance to learn spells from all other schools. These features are now correctly reported in the description for each kit.

Graphics
v2.0 adds a number of graphical enhancements, described below. With the exception of the Infravision change, all of these changes can be toggled on or off from Options > Graphics.

Greyscale on Pause
When the game is paused, the area is now set to display in greyscale, giving the player greater contrast when examining the battlefield. By default this feature is enabled. You can disable it at any time from Options > Graphics.

Sprite Outlines
Sprites now display a dark outline to make them stand out from the area's background more clearly. By default this feature is enabled. You can disable the highlighting and sprite outlines from Options > Graphics.

Sprite Highlighting
Additionally, hovering the mouse cursor over a creature highlights its sprite and outline in blue, making it easier to tell which creature the player is targeting with spells and attacks. Note that in order to use the Sprite Highlighting option, Sprite Outlines must be enabled.

Infravision
In areas of limited lighting, characters with infravision now view living creatures with increasingly intense red overlays. Additionally, the red from infravision now displays based on the current lighting on the creature being viewed, rather than the creature with infravision.
STEAM

ACHIEVEMENTS
The Steam platform now features achievements for both Baldur’s Gate: Enhanced Edition and Baldur’s Gate II: Enhanced Edition. Our goal was to create achievements that offer new or interesting challenges on how to play the game, as well as to reward players’ innate desire to explore the world’s farthest reaches.

CLOUD Saves
Cloud saves are now supported on the Steam platform. By default this feature is enabled. You can disable it at any time from Options > Gameplay.

ENGINE Fixes
The v2.0 update features many fixes and improvements to the Infinity Engine as a whole. The fixes and enhancements in this list affect all Infinity Engine games, which means that in addition to Baldur’s Gate: Enhanced Edition and Baldur’s Gate II: Enhanced Edition, these changes will also affect Icewind Dale: Enhanced Edition when it’s next updated.

- Metal weapons will no longer risk breaking once the iron crisis has been resolved (BG:EE) (19766)
- Party members won’t all comment at once on every reputation change (18983)
- Opcode 232 (Cast Spell On Condition) now supports spell states as conditions (17472)
- Ability scores that receive a bonus are now tinted green instead of red on the Record screen (12178)
- The ‘Find Traps’ opcode now respects the ‘Trap Undetectable’ flag on doors (10648)
- Opcode 144 can now disable access to the inventory screen when param2 is set to 15 (17209)
- Opcode 145 (Disable Spellcasting Abilities) can now be used without receiving a feedback message (17058)
- Players may now equip an off-hand weapon while a ranged weapon is present in a quick weapon slot (16944)
- Players can now equip a weapon or shield in the off-hand slot regardless of what weapons are in the quick weapon slots (12362)
- Maximum spell level and maximum known spells are both now listed on the Record screen (15923)
- Full break-downs of AC, THAC0, HP, and Damage can now be viewed by holding the Tab key while hovering the mouse over the relevant stat on the Inventory screen (16499)
- The Mage Spellbook and Priest Scroll UI screens have been completely redesigned (14408)
- Variables in-game can now be set from baldur.lua using SetPrivateProfileString('Global','Variable-Name','1') (12864)
- Players can now advance dialogue (as if pressing Continue or End Dialogue) by pressing the spacebar on a keyboard (12281)

IRON Weapons and the Iron Crisis
If your characters wield iron weapons, you’d better pack a few spares. There’s a plague of brittle iron making its way across the Sword Coast, and contaminated weapons have a tendency to break at the worst possible moment.

If you want to stop your weapons breaking, you’ll have to get to the bottom of the iron crisis. Once you solve the mystery of the brittle iron, the plague affecting everyone’s weapons (and presumably other iron items not needed by adventurers) will eventually end.

(In practical terms, nonmagical weapons made of metal will stop breaking once you complete Chapter 5.)
• When an item is selected on the Inventory screen, the portrait of the character best suited to that item will now be highlighted in yellow (12315)
• AI Scripts now prefer the weapon a character is most proficient with (10441)
• Improved spawn method (9491)
• ForceRandomEncounter(“”) now clears the queue of forced encounters (17688)
• All language names are now displayed alphabetically (12399)
• Movies are now listed in chronological order on the Movies screen (11793)
• Deleting a character from the first party slot during party creation no longer causes issues with duplicated characters (17702)
• Black Blade of Disaster now correctly sets long sword proficiency to grandmastery for the duration of the spell (17695)
• Constitution of 20+ will no longer result in injured characters being healed when loading a save (16070)
• Party members no longer make random selection sounds if their banters fail to initiate (16053)
• Spell Trap now correctly refreshes 9th level spells (15837)
• Wild Surge 13 (which polymorphs the caster into a wolf) now correctly changes the character’s paperdoll on the Inventory screen (15314)
• Having a familiar no longer prevents dialogues from starting (12604)
• Monks imported from BG:EE now arrive in BGII:EE with the correct AC bonus (12089)
• Increased APR from magical projectiles now ends correctly when they are depleted (11061)
• Bonus spells from the Staff of Arundel are no longer lost when the quick weapon slot is selected while the game is paused (10734)
• Project Image now correctly respects party summoning limits (9923)
• AttackOneRound() now makes the correct number of attacks based on the creature’s attacks per round (8581)
• Party members no longer disappear when the party is moved en masse to a new area (such as the Pocket Plane in Throne of Bhaal) (15557)
• Water and lava overlays now render correctly on Android devices (10969)
• Interface elements in fullscreen mode will no longer become unresponsive on Windows operating systems when the display scaling is set to 150% (10500)
• Dual-Classing a Berserker into a Mage no longer crashes the game or produces a blank spellbook (19944)
• Importing a character with the Cavalier kit no longer results in duplicated damage resistances (13154)
• Splitting stacks on the Inventory screen now works correctly when placing the second stack (8504)
• [Multiplayer] Logging out at Character Arbitration will no longer crash the game (18936)
• [Multiplayer] The game will no longer freeze after speaking to Mendas (18917)
• [Multiplayer] Game will no longer freeze if a client presses ENTER during Gorion’s cutscene (18911)
• The game will no longer crash when creating a full party in ToB (18772)

High Constitution and Regeneration
If your character has a Constitution score of 20 or higher, they will actually regenerate hit points gradually just by standing around.
This means you can leave Athkatla at dawn, arrive in the Umar Hills at nightfall, and recover all your lost health from your fight with the Twisted Rune along the way.
Most characters don’t ever reach a Constitution of 20. For those that do, it’s as close to immortality as anyone can get without having the blood of a god in them.
• [Tutorial] Game Crash - BG:EE Tutorial will no longer crash just before Belt Teleports you to your final test/battle (18468)
• The game will no longer crash when traveling to Adoy's enclave (18397)
• [Mac] The game will no longer rash to desktop after upgrading to OSX El Capitan 10.11.1 (17903)
• Game will no longer crash when loading a save where an injured enemy is leaving the area (11131)
• Zoom level will no longer change based off your screen size (19140)
• Enemies will no longer get stuck when attacking party members (11101)
• Savegames are now sorted by date (18866)
• Party members will no longer say their reputation reaction when killing an enemy (18710)
• Polymorphing into a zombie will no longer block movement (18709)
• [Mac OS X] Screen will no longer attempt to scroll (and shake while doing so) in a non-scrollable area (18649)
• Poison resistances will now stack (18610)
• Cook's special dumplings will now have a drawing as part of the description (18478)
• Polymorph Other is now dispellable (18470)
• Backing out of a level-up will now remove the additional hit points (18433)
• Good-aligned Blackguards will no longer turn into Fallen Blackguards based on low reputation (18368)
• Overhead text no longer displays for too long (18624)
• Characters with inactive thief levels are no longer able to steal (17263)
• Freeing a barbarian character from Imprisonment will no longer double his physical resistances (13179)
• Opening music tags are now played (12377)
• Combat music will now play closing tags (12376)
• [Localization] Russian VO will now play when the language is set to Russian (11898)
• Containers and unique items will no longer duplicate if characters are destroyed (11086)

Bug Fixes - Baldur's Gate: Enhanced Edition

• Recruited BG:EE NPCs now appear with experience close to the player's total (16104)
• Game Difficulty text will now accurately represent the features of the difficulty stages (20314)
• Nessie now mentions Dorn as a notable character in the Friendly Arm Inn (1912)
• The dialogue of Familiars are now expanded (18451)
• The player's default AI script is now assigned at the start of the game (19135)
• Candlekeep tutors now have additional dialogue that better helps new players understand the gameplay mechanics (18964)
• Summoned creatures no longer turn hostile if attacked (18454)
• (Item) Dusty Rose Ioun Stone unidentified description is no longer “Ioun Stone” (1997)
• (Item) Hide Armor is no longer usable by the Avenger kit (18706)
• Call Lightning graphics will now work (18723)
• Lightning Bolt projectile will now work (18724)
• Find Traps button is now renamed to Find Traps/Detect Illusion (18405)
• In Candlekeep, Jondalar and Erik are now protected from death/chunking (18481)
• (Container, Store, Item) Selling items from within a container will no longer partially hide the “sell” button in a store interface (18659)

- Thralls of Azothet will no longer look like Balors \((18428)\)
- Tiax and Dorn’s banter will now work as designed \((20708)\)
- Trolls will no longer save vs. fire arrows while knocked down \((18384)\)
- Vampiric Touch damage effect will now match the description \((18540)\)
- Waterfalls in Adoy’s Enclave are no longer pixelated \((2063)\)
- You are no longer able to walk into the bear cage in OH2000 before opening it \((6323)\)
- You are now able to access Taecom’s shop even if you insult him when selling an ankheg shell \((5758)\)
- Davaeorn’s death cutscene now triggers correctly in all cases \((6930)\)
- Throwing axes no longer apply the wielder’s strength bonus to THAC0 when when used at range \((18177)\)
- Trolls in the Black Pits are no longer unkillable \((18145)\)
- Snow may now occur in the Cloud Peaks \((18115)\)
- The loot pile in front of the cave entrance in the Cloud Peaks is now accessible \((18090)\)
- Beruel’s Retort +1 and Golden Axe +1 are no longer usable by Beast Masters \((18087)\)
- The Stalker version of the Haste spell is no longer affected by magic resistance \((18052)\)

**Summoning Monsters**

The Monster Summoning spells in Baldur’s Gate: Enhanced Edition, prior to v2.0, conjured the same low-level monsters that they did in the game’s original 1998 release. Baldur’s Gate II: Enhanced Edition upgrades the monsters to be competitive enough to warrant the use of high-level spells.

This is because there were no summoning limits in the original Baldur’s Gate. You could have an army of kobolds running through the Nashkel Mines. In Baldur’s Gate II, the developers implemented a six-creature limit on summons, which allowed them to make the monsters stronger.

As of v2.0, the monsters summoned by the various summoning spells are now identical to their BGII:EE counterparts.
- Jaheira now knows the Harper’s Call spell and can cast it when she gains access to the appropriate level of spells (18047)
- Monk’s Quivering Palm ability now only works with fist attacks (18046)
- Throwing daggers should get strength bonus to damage and not get strength bonus to THAC0 (17898)
- The Stalker kit’s Minor Spell Deflection no longer displays Spell Turning icons (17541)
- The Berserk ability now prevents combat log text from appearing with regard to effects to which the berserk character is immune (17391)
- Summoned lesser fire elementals now have 64hp (17106)
- Medium fire elementals now have a strength of 20 (17106)
- Scrolls of Animate Dead, Cone of Cold, and Ice Storm are now sold in Sorcerous Sundries (16971)
- Tiax’s Summon Ghast ability and description now match (16409)
- Faldorn’s Summon Dread Wolf ability and description now match (16408)
- Aec’Letec’s physical attack no longer causes unconsciousness (16099)
- Aec’Letec now has proper immunities (16098)
- Aldeth will no longer betray the protagonist after exposing Sarevok (16056)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Yeslick’s Dispel Magic ability now dispels based on caster level (16035)
- Branwen’s Spiritual Hammer now correctly reaches an enchantment level of +2 at level 7 instead of at level 6 (16024)
- Beast Master’s Animal Summoning I ability now lasts 3 turns (15996)
- Dorn now correctly initiates his plot dialogue even if he has the Silence status (15990)
- Rescuing Branwen but refusing her service no longer results in an open journal quest (15989)
- “A Farmer’s Tales” journal entry is no longer listed as a quest (15988)
- Hulrik no longer asks for help if the xvarts have already been killed (15987)
- “Xvart Raids” journal entry is no longer listed as a quest (15986)
- Tutorial: Imoen now comes with a weapon she is proficient with (15983)
- Tutorial: kobolds’ short swords no longer break (15981)
- Gamaz now correctly delivers a final speech before dying (15978)
- Safanano longer experiences stuttering if she loots the pirate treasure on her own (15977)
- Kivan now intercepts the correct line when in the same party as Dorn (15975)
- Kivan no longer has spell slots before his Ranger levels would allow them (15975)
- Incorrect voice overs no longer play during Dynaheir’s dialogue (15959)
• Harrower +1 now correctly applies its +3 damage vs. undead creatures (14283)
• Rasaad’s quest now correctly starts when he is first encountered (11802)
• Berserk now correctly protects against Stun effects (11798)
• Dark Moon Monks now correctly start with +10% Detect Illusion instead of +24% (11797)
• Inquisitor’s Dispel Magic now has level-appropriate effects at character levels 1-5 (11821)
• Creatures, spells, and other resources will no longer display the bizarre line “Someone disturbs me?! I have no time to talk with you, . Don’t take it personally. I’m just a very busy man.” (11041)
• The weapon given to the player character in the Tutorial is now guaranteed to be usable by that character (10741)
• Demon Knight will now correctly defend himself when under the effects of Silence (10749)
• Teven no longer remains neutral if the the rest of the Bandit Camp has become hostile (10730)
• The Dryad of Cloud Peaks quest will now close properly if the dryad is killed (10738)
• “Prism the Sculptor” journal quest now closes properly when returning the emeralds to Oublek (10736)
• Quayle no longer has illegal Necromancy spells in his spellbook; the offending spells have been replaced with Chromatic Orb and Deafness (10733)
• Kissiq now gives a proper journal entry about a talking chicken rather than a quest entry (10732)
• Miner Kylee’s information will no longer be listed as a quest entry (10729)
• Bounty Hunter Special Snare ability now slows the target instead of casting Otiluke’s Resilient Sphere at levels 1-7 (10728)
• Tutorial, dialogue referring to the Hint button now correctly describes its location in the UI (10091)
• Avengers now correctly gain Improved Invisibility at level 7 (10009)
• Familiars no longer trigger reputation based encounters (7847)
• On Android devices, pressing the Return key on a bluetooth keyboard will now correctly confirm the user’s multiplayer password and attempt to join the selected game (7846)
• Shapeshifts Natural Form ability from the Relair’s Mistake cloak will now correctly wear off when the effect ends (7740)
• Wild surge 83 now correctly mimics the effects of Polymorph Other (7746)
• The player can no longer speak to Daer Ragh multiple times (7639)
• Neera will no longer be silent after enemies have been dealt with (7603)
• RESTINN and RESTDUNG movies are no longer missing from the Movies list (7564)
• PCs under AI control will no longer stop moving for no reason (7528)
• Monk’s stunning blow will now correctly only work on fist attacks (7204)
• The legacy CLERIC2 script can now cast Cure Medium Wounds (6494)
• Haste and Offensive Spin no longer stack (6492)

**Opposition Schools**

Illusionists can’t learn or cast Necromancy spells. That’s why you’ll never see Quayle (a Cleric/Illusionist) casting spells like Horror or Larloc’s Minor Drain. The level of focus required to specialize in a school of magic means that a specialist mage sacrifices some versatility.

Each specialist mage has a different opposition school; spells from that school are completely inaccessible to a specialist. But the differences don’t stop there. Learning spells from your specialized school is 15% easier, while learning spells from any other school is 15% harder. Your saving throws against spells from your specialized school also grant you a +2 bonus, while any spell you cast bestow a -2 penalty to the saving throws of the target.
• Getting level-drained no longer causes invalid string references to appear in the combat log (6468)
• Dragon Disciple Breath Attack ability will now correctly hit everyone in the cone area (6302)
• Kryll will no longer cast Mirror Image on herself, since she is a Necromancer; instead, she will cast Horror (6295)
• Blackguard Aura of Despair ability will no longer affect every single enemy in the entire area (6223)
• Lord Binky the Buffoon will no longer ignore the rest of the party if the protagonist is invisible or using Stealth (6189)
• Ring of Free Action will no longer block the ‘Stunned’ string from appearing in the combat log (6885)
• ‘The Mysterious Island’ journal entries will now correctly post to journal (4199)
• Sun Soulay will now work correctly when cast on targets at the edge of the visual range (3424)
• A human wizard wielding a quarterstaff will no longer display missing frames while attacking (2872)
• Hafiz the gnome will no longer be addressed as a dwarf by the player (16061)
• Gnome NPCs now use the correct animations for their race (16060)
• Journal entries about Oublek offering bounties will now only be created when it is appropriate (16059)
• Combat log text that describes the entrance to the Tomb (in the Valley of the Tombs area) now displays even if the player is traveling alone (16049)
• Combat log text that describes the entrance to the Tomb (in the Valley of the Tombs area) no longer displays as though it were being spoken by a member of the party (16048)
• There will now only ever be one copy of Gorion’s scroll, even if the player pick-pockets Gorion in Candlekeep (15985)
• Info text above the signpost in the Beregost Temple area no longer displays off to the left of the signpost itself (15974)
• Safana's innate Charm Person ability now has a unique description (1799)
• Charm Animal ability and description now match (11519)
• The Captive Audience item’s behavior now matches its description (11112)
• Initiating dialogue with Safana while she is in the party will no longer result in a repeated banter between her and Dorn (11111)
• Polymorph effects from wild surges no longer result in a blank paper doll (11109)
• The abandoned house in SE Baldur’s Gate now displays its info text entirely on-screen (6758)
• Bassilus's zombies now make zombie sounds when they speak (998)
• Female Dark Moon Monks no longer play male voice-overs during their dialogue (2133)
• Zombies now have their own paper doll (18773)

**Bug Fixes – Baldur's Gate II: Enhanced Edition**

- Blocking Phaere's exit will no longer lock the game in cut scene mode (11581)
- Having Death Ward active will no longer cause Irenicus dialogue to loop (15974)
- Dorn will no longer stutter if the protagonist has a romance with both him and with Hexxat (11118)
- Saemon Havarian will now appear next to the pirate ship after leaving the Vulgar Monkey Inn (11158)
- Neera’s quests will no longer prevent travel to the Throne of Bhaal (11141)
- Rasaad will no longer stutter if the protagonist has a romance with both him and with Hexxat (11085)
- Lich with Phreyra will no longer be invincible (11084)
- Response to Dorn in Lunia will no longer have No valid replies or links (11090)
- Garfunkel will now die after his final speech (11062)
- Dorn will no longer step forward with the Divine Blade before he has acquired it (10639)
- Hardiness from the Wish spell will no longer stack with the Hardiness HLA (18069)
- Monk's Quivering Palm and Stunning Blow abilities will now only work on fist attacks (18037, 18036)
- Dark Justice +5 will now apply its extra damage the same way as similar weapons (18038)
**Ammunition and Ranged Weapons**

If you’re lucky enough to find one, a ranged weapon that supplies its own ammunition is a great way to have magical ammunition ready at all times.

If not, you’ll want to keep some magical ammunition available for tougher fights. Some enemies can only be harmed by magical weapons, and a magical longbow doesn’t bestow its enchantment on ordinary ammunition for purposes of bypassing monster defenses.

The Sling of Seeking +1 is a fine example of a sling that provides its own +1 bullets, and it can be purchased at the Copper Coronet in the Shadows of Arm campaign.

- Story Mode will now prevent the relevant feedback messages from appearing in the combat log (17900)
- Keldorn will no longer be busy when he returns from reporting his wife to the courts (17994)
- Arenthis and Kamir will now defend themselves if attacked (17866)
- Sun Soulray will now only affect one target (17863)
- Dorn will now initiate dialogue at Resurrection Gorge (OH5100) (17831)
- Aldun Forgecaster will now have incorrect dying/death sounds (17823)
- Deva animations will no longer be translucent (17716)
- Hexxat’s Domination ability and description will now match (17491)
- Mazzy’s Haste ability will no longer use the description of the wizard spell (17463)
- Mazzy’s Lay On Hands ability will now use the description of Cure Light Wounds (17462)
- Mazzy’s Strength ability will no longer use the description of the wizard spell (17396)
- Berserk will now disable strings for 2 turns (17392)
- Berserk will now protect against the feedback effects of stun (17390)
- Bracers and gauntlets will now have the correct unidentified name, unidentified description, and ground icon (17387)
- Drow Scimitar +3 will now be usable by Thieves, Mage/Thieves, and Monks (17377)
- Reaching Ring will no longer be usable by Monks (17370)
- Storm Ring and Dawn Ring will now be usable by Wizard Slayers (17369)

- Heartwood Ring will no longer be usable by Wizard Slayers (17353)
- Silver Sword will now be usable by Beast Masters (17352)
- Serpent Shaft poison effect and description will now match (17351)
- Staff of Thunder and Lightning +2 visual stun effect will now be subject to saving throw (17290)
- Ixil’s Spike +6 pinning damage will now occur each round for 3 rounds (17288)
- Flail of Ages +1 will no longer be usable by Beast Masters (17287)
- Edwin’s will now have the correct Tired sound and text once Degarden dispels his female form (17285)
- Dark Moon Monk’s Vampiric Touch will now deal the correct amount of damage at level 10 (17279)
- Thugs attacking Renfeld will now give XP when killed (17278)
- Devas will now regenerate health (17277)
- Defensive Spin ability will now match the description (17275)
- Improved Chaos Shield spell and description will now match (17271)
- Fallorain’s Plate +1 will no longer be a generic plate mail +1 and will now be unique in the game (17270)
- 12HD Earth Elementals will now have consistent stats (17264)
- Mage stronghold apprenti will no longer fail to leave once their tasks are done (17246)
- Ranged weapons with unlimited ammunition will now clearly state the launcher bonuses are included as part of the combat abilities (17074)
• [Hexxat] Claw of the Black Leopard journal entry will now remain until the claw is returned (16301)
• Walls around the Radiant Heart internal doors will now have consistent lighting (16488)
• [ToB, Rasaad] Rasaad's journey quest will now appear in Done Quests if his romance is active (16464)
• [ToB, Neera] Completing the Eight Staves quest will now remove the corresponding journal entry (16392)
• Minsc will no longer repeat his selection sounds after leaving berserk (16256)
• Darksteel Shield +4 will now grant a +1 AC bonus vs. missile attacks (16236)
• Character generation will now enforce weapon proficiency rules (16195)
• Mage in the secret illithid lair will now attack when the party is spotted (16148)
• White Dragon Scale will now be usable by Stalkers, as intended by BioWare (16125)
• EightNearest references will now be EighthNearest (16101)
• Import script will now get broken if a save is made while it is running (16099)
• [ToB] Illasera will now cast additional spells (16071)
• Shapeshifter werewolf will now use correct weapon icon (16060)
• Fflar's Scabbard will now have a description image (16068)
• Burich will now be immune to poison (16059)
• Summoned black bears will now attack enemies on sight (16058)
• Summoned bears and panthers will no longer move towards each other (16054)
• Beast Master's Animal Summoning I will now last 3 turns (15997)
• Kamir, Arenthis and Risa will no longer disappear if their quest is active (15733)
• [Rasaad] Heretic Temple skylight will no longer grant XP and a journal note if the temple has been entered through the door (15430)
• [Rasaad] Heretic Temple exterior staircases will no longer be accessible from the sides (15428)
• Sphere of Chaos effects will now be blocked by Magic Resistance (15423)
• Caster level 10 Sunfire will no longer be blocked by Minor Globe of Invulnerability (15422)
• It will now be possible to stake Dace if he has been destroyed without being spoken to (15421)
• Paladin stronghold barony quest will now check if the farmers have been killed (13237)
• Corgeig will now only provide an XP reward once Nalia is freed (13014)
• Standard Attack AI script will no longer cancel requested actions (12580)
• Good Deva will now be able to cast Chaos (12308)
• Party members raised by Mass Raise Dead will now gain additional healing (12232)
• [Multiplayer] Malaaq will no longer remain in the starting area if a party of 6 is used (12211)
• Thief Scout script will no longer target non-hostiles (12149)

The Sword of Chaos

In the opening dungeon for the Shadows of Amn campaign, you can find a genie who offers you the powerful Sword of Chaos +2. Although it's no weapon your character has ever wielded, it is well worth the task of freeing the genie in order to obtain it.

Not feeling the need to rescue meddlesome genies today? You can also find a weapon appropriate for your character's proficiencies in the room with the Sewer Golem.

If your importing your character from Baldur's Gate: Enhanced Edition or the Siege of Dragonspear campaign, the weapon you find near the Sewer Golem may even be one you were carrying with you when you were captured. Otherwise, an appropriate +2 weapon will be selected based on your class and proficiencies.
• Chaos Shield spells will no longer stack (12142)
• Kangaxx will no longer be invincible in normal form (12110)
• Herath will now respond correctly when asked why the PCs will now take up arms against the Twofold Trust. (12105)
• Cloak of the Sewers mustard jelly form will now use same stats as Polymorph Self (12056)
• Pregenerated Fighter/Clerics will now have a class description on the character selection screen (12031)
• Mazzy will no longer talk constantly when fatigued and Valygar is in the party (11818)
• Charname will no longer claim that the Copper Coronet is not a public setting (11804)
• Hexxat will now respond correctly to line 97187 (11749)
• Druid Earth Elemental shape will now be able to move consistently (11739)
• Cleric / Thief will now be able to hide in shadows via the thief controlled script (11731)
• Hexxat will now say the correct line and send the PCs home if she is kicked out in Korkoran’s tomb (11727)
• Characters wearing the Night Walker boots will now be immune to Web and Grease (11627).
• SoA cat familiar will now travel at the same speed as party members (11615)
• Unconscious targets will no longer wake up when attacked (11613)
• Bard songs of the same type will no longer stack (11573)
• Krotan’s Skullcrusher +2 will now injure stone golems (11543)
• Xachrimos voiceover will now match his text responses (11469)
• Fil will now have the correct voiceover lines to match the text dialogue (11497)
• Nalia will now be able to cast a level 6 spell if she joins the party as a level 12 mage (11494)
• Neera’s staff will now be identified (11492)
• Aerie will no longer have studded leather armour in a quickslot (11490)
• Charname will now have the correct responses to Algoroth’s “welcome” in Deepstone’s crystal chamber (11498)
• Stalker Minor Spell Deflection will now protect against spells of up to 7th level (11385)
• There will no longer be a duplicate response to Cuddy if strength and charisma are both > 13 (11321)
• Charname will no longer repeat Hexxat’s line when kicking her from the party in ToB (11350)
• Stalker Minor Spell Deflection will no longer show Spell Turning icons (11177)
• (Black Pits II) Avenger spells will no longer be removed upon arrival to the Black Pits (11168)
• (Black Pits II) If they have the quest, players will now be able to buy a Salve of Senile Serenity the first time they speak to Bellowgulp (11165)
• (Black Pits II) The Salve of Senile Serenity will no longer be sellable for more than it costs to make (11164)

Bard Song
Bards sing songs that make their allies braver, rendering them immune to fear effects for as long as the Bard is singing.
In the Siege of Dragonspear campaign, you can find a magical hat that will make your Bard’s song last longer, allowing her to cast a spell or two before resuming her song. Note that the Bard’s song doesn’t stack with itself; if you have two Bards of the same type both singing, your party will only benefit from the stronger song.
A Bard and a Skald, on the other hand, can stack their songs together, because they have different effects.
• Hexxat will now say line 87005 after Charnname says line 87104 (11162)
• Charnname will now have the correct responses when Hexxat offers to distract her (11162)
• Hexxat will now respond correctly when Charnname flirts with her (11158)
• Hexxat will now respond correctly when Charnname calls her “a means to an end.” (11157)
• Polymorph other will now transform targets to squirrels permanently (11140)
• Throwing axes and throwing hammers will now add strength bonus to damage when ranged (11137)
• The Slayer Change ability will no longer be available until after Irenicus flees Spellhold (11136)
• Viconia will no longer stop responding after being told a game is being played (11115)
• [Rasaad] Tears of Selune encounter will no longer trigger if he is dead (11110)
• Saving and reloading as Nalia is kidnapped will no longer see her remain nearby (11106)
• Druid Elemental Summoning HLA will now produce 16hd elementals with correct stats (11089)
• Tenser’s Transformation will now apply the correct THAC0 bonus at levels 19 and 20 (11081)
• Dorn will now lose his Blackguard status & abilities if his patron is retributioned (11078)
• Viconia’s level 13 incarnations will now have 7 level 3 spell slots (11079)
• Characters will no longer be able to walk through the closed door to the noble djinn (11063)
• Stone harp within the Palace in Suldanasellar will now be displayed correctly (11063)
• Rasaad’s final ToB lovetalk will now fire and not contain an infinite loop (11036)
• Meems will now have appropriate dialogue after the conclusion of Rasaad’s quest (11034)
• Deepstone's front face will no longer shift to the left when you open its doors (11033)
• Charnname will no longer have two “And...?” responses (11031)
• [Rasaad Romance] The order of responses 97765 and 97766 will now be switched (11023)
• [Rasaad Romance] The “meditation is for monks” reply will no longer be available to Charnname if she is a monk. (11022)
• (Black Pits II) Load/quit options will now be presented after a game over (11006)
• The player will no longer be able to mention Resurrection Gorge before they visit it (10999)
• There will no longer be a duplicate response when speaking to the guard outside the heretic temple (10998)
• The Vagrant Blades will now walk away instead of vanishing where they stand (10996)
• Clara’s death scene will no longer be interrupted by a talk about Dragomir’s death (10995)
• Hexxat will now have Dragomir’s cloak before Edwin tries to touch it in ToB (10976)
• Hexxat will now have Dragomir’s cloak before Edwin asks to see it in SoA (10975)
• [BP2] Completing a Black Pits II combat will no longer see multiple Dispel Effects strings (10974)
• [BP2] Brodle will no longer voice “performers’ lounge” after the rebellion subplot (10960)
• (Black Pits II) Gladiators will no longer have inappropriate lines when spoken to during the finale.

• (Black Pits II) Charname will no longer be called a villain when they have not said anything villainous.

• (Black Pits II) The “perplexing problem” response in Stannel’s dialogue will no longer disappear prematurely.

• (Black Pits II) The 4th and 5th responses will no longer be missing from Stannel’s dialogue after the water weird fight.

• (Black Pits II) Brodle will now give items to Player1.

• (Black Pits II) Cloak of the Lich’s effects will now match its description.

• (Black Pits II) Players will no longer be able to ask Brodle to help plot a rebellion after they agree to help him plot a rebellion.

• (Black Pits II) The Salve of Senile Serenity will no longer be equippable.

• (Black Pits II) Gezzthemin will no longer ask the PC for a drink he hasn’t told them about.

• (Black Pits II) Tarle will no longer ask the PCs whether they want to fight a previous battle before they’ve fought their first battle.

• (Black Pits II) Journal entry 95946 will no longer be added prematurely.

• (Black Pits II) Rat poison will now have a proper description.

• (Black Pits II) Entering the banquet hall before the “dinner bell” cutscene will no longer lead to strange dialogue.

• It will no longer be possible to escape the Irenicus dungeon from the furnace room.

• Assign Keys screen will now contain a full list of Mage and/or Priest spells.

• The Winged is now visible in the BPII Feast cutscene when playing solo.

• Remove Fear will no longer temporarily increase thieves Detect Traps ability score.

• Charname will no longer say she’ll “do what [she] can” when Hexxat points out Charname could easily kill her.

• Dorn will no longer attack Charname for saying they could use a sandwich.

• [Dorn][ToB] Planetar of Justice will no longer duplicate lines.

• Black Blade of Disaster will now have the appearance of a Long Sword.

• Corthal Family Armor ground icon will now match the equipped appearance.

• The Woodland Staff will now produce a Barkskin visual effect when equipped.

• Chest in Vicross' estate will no longer appear as a body in the inventory bar.

• Charm Animal ability and description will now match.

• Joolon will no longer speak when casting Cloak of Fear.

• Nahal’s Reckless Dweomer will now have consistent casting time and description of casting time.
• Trademeet statues will no longer be affected by dispel magic (11102)
• Coran's cabin will now have the same gather party requirements to leave as to enter (11079)
• Bala's Axe will no longer say it is lowering magic resistance when you hit an enemy with it (11074)
• Lizard man halberds will no longer fail to display (fix included) (11032)
• Del will now appear after speaking to Sansuki (10962)
• Vampire will no longer initiate dialog with someone in a building (10888)
• War Hammer The Brick +2 will now have Thrown and Melee tooltips (10651)
• All the quests from Aran Linvail will now be closed when travelling to Brynmlaw (10227)
• Firkraag Himself journal entry will now close when he is killed (10223)
• Game will no longer crash when playing movies after selecting a language (20494)
• The game will no longer crash when the messagebox covers the entire screen (18839)
• The game will no longer crash after leaving the options screen (19957)
• Dragomir will now drop his cloak even if turned to stone (19402)
• Ust Natha will no longer remain sealed if the Matron Mother is not present (18669)
• (Item) Armor heavier than leather will no longer be usable by Avengers (18682)
• AR2901 will no longer tell you to gather your party when you are solo (18720)
• Aura of Despair will now display a portrait icon on the affected creatures (19727)
• BGII:EE will now start with the new D&D and Be amendog splash movies (18879)
• BGII:EE stores that purchase helmets will now also purchase hat type items (18419)
• Black Pits 2 introductory cutscene can now be skipped (18095)
• Bolts from Wand of Lightning will no longer change direction after hitting targets (19975)
• Boon of Lathander will now have the correct duration prior to level 10 (17224)
• Bow of Arvoreen +2 will no longer use the ground icon of a longbow (19976)
• Button tooltips will now be correct (18588)
• Characters will no longer be able to start conversations while Time Stop is in effect (18123)
• Create a background for the scrolling menu in stores (16626)
• Create description icons (B suffix) for innate abilities (1828)
• Dire Charm visual effect will no longer have a +3 saving throw bonus (18221)
• Dorn will now use the correct pronoun for Azothet when Bodhi tries to take him (19713)
• Edwin will now fire the correct banter when wounded (20378)
• Ending Slayer Change will no longer set magic damage resistance to 100 for 40 seconds (18336)
• Fallorain's Plate +1 minimum strength will now be 11 (18478)
• Habib will now be worth XP (18554)
• Implement standardized creature animation speeds in BGII:EE (18910)
• Innate non-magical abilities like Barbarian Rage will no longer be disrupted by damage (19820)
• Items and spells that cause fear will no longer force creatures to drop their weapons (18687)
• Items called "Poison" will no longer use the name of the priest spell (19981)
• Jan's Create Bruiser Mates description will no longer be blank (17464)
• Knocked down trolls will now be detectable via scripts (18288)
• Mask of Strohm will now reveal the guardian when the wearer is in sight of it (18169)
• Mazzy's Lay On Hands ability will no longer use the icon of Cure Light Wounds (18479)
• Monks will now be immune to the effects of disease (17211)
• Myconids will now use the proper race entry (19132)
• Neera's Staff +1 will now do fire damage as designed (18608)
• New status icons will no longer be missing (18746)
• Party NPCs now have unique scripts (18821)
• Ox-Tail Belt will no longer use the strref of Duke Belt as unidentified name (20146)
• PCs will now be immune to death resulting from Charisma loss in Story Mode (18744)
• PCs will now be immune to death resulting from Constitution loss in Story Mode (18823)
• PCs will now be immune to death resulting from Dexterity loss in Story Mode (18743)
• PCs will now be immune to death resulting from Intelligence drain in Story Mode (18737)
• PCs will now be immune to death resulting from Strength drain in Story Mode (18738)
• Phreya will no longer be invincible if Hexxat is killed (18396)
• Polymorph Self’s Ogre form will no longer keep changing clothing color (18721)
• Portraits will no longer look blurry if Scale UI is turned on (BG2) (20130)
• Priest script PRIEST5 will no longer make characters cast Draw Upon Holy Might on their enemies (20199)
• Psionic Life Drain will no longer result in an uninjured caster losing hp from their new maximum (19973)
• Quasit familiars will now be able to cast Blur successfully (18722)
• Quayle will no longer have Necromancy Spells in his spellbook (18471)
• Quit Game confirmation screen - Art Update (BG2) (19798)
• Restore Sarevok’s sword to the genie (18739)
• Slices need to be repainted (2002)
• SoA critical path cutscenes will now be skippable (18423)
• SoA dream cutscenes will now be skippable (18894)
• SoD Party AI adjustments will now be ported to BGII:EE (19964)
• Spectral Brand +5 will now have a speed factor of zero (18126)
• Spell icons in the spell selection screen will now be aligned with the background art (18389)
• Spirit Form will now use the correct name, description and icons (18551)
• Spirit Ward will now provide a bonus to saves vs. enchantment spells (18376)
• Spiritual Clarity will now remove the visual effects of Myconid spores (18800)
• Spook will no longer be castable from outside of your characters line of sight (20208)
• Summoned Nymphs will no longer disregard the player’s commands (18264)
• The Acclamation spell will now have proper icons (18857)
• The chapter button in the TBP2 journal will now be labeled correctly (20126)
• The correct text will now be displayed in the weapon proficiencies screen (18399)
• The correct text will now be displayed on the sound set selection screen (20334)
• The description text on the Party AI screen will now be properly centered (BGII:EE) (19128)
• The Headband of the Devout now has a unique inventory and description icon (17838)
• The name input field at character generation will now be centered (20336)

Skipping Cutscenes
The cutscenes in the Baldur’s Gate series may be masterful collections of voice-overs, text, and stunning effects. After your fifty-eighth run through the series, sometimes you want to skip ahead to the gameplay.
As of v2.0, every plot-critical cutscene in Baldur’s Gate: Enhanced Edition, the Siege of Dragonspear expansion, and Baldur’s Gate II: Enhanced Edition can be skipped by pressing the Esc key on your keyboard.
• The North Forest will now be visible on the world-map (18328)
• The Quick Loot boxes will now be evenly spaced (18587)
• The Sleeper +2 item type will now be morning star (20128)
• The Sleeper Morningstar now has a proper inventory and description icon (17568)
• The Sleeper Morningstar will no longer look like a flail on the game screen toolbar (11088)
• There will now be a delay between Hexxat’s prompts to leave Nan Quan Chi’s tomb (18289)
• Trolls will no longer produce a spell sound effect when knocked down (18106)
• Trolls will no longer save vs. fire arrows while knocked down (18385)
• Variables in Keldorn’s personal quest will now set consistently (17877)
• Watchers Keep Challenge Rooms will no longer be inaccessible (11786)
• Wilson will now move at the same pace as non-monk party members (18136)
• Wizard Slayer miscast magic description will now match the effect (11585)
• World Map will no longer show the names of locations which are not visible (18405)
• XLEVEL.2DA will now contain proper values (18667)
• Zone of Sweet Air will now remove Writhing Fog (18275)
• Creatures with DOOM_GUARD and DOOM_GUARD_LARGER animations will no longer produce sounds (18137)
• Flail of Ages +4 will now use the correct icon on the Game Screen (11499)
• Quick Spell and Cast Spell icons for Energy Blades will no longer use the Black Blade of Disaster icon (11087)
• Sarevok’s Sword will now have unique inventory and description icons (18280)
• The Wild Forest will now become accessible when leaving Watchers Keep (18704)
Modding Features

This section details some new effects that you can use in your own mod creations. To make use of these new features, you’ll need either Near Infinity or DLCTEP.

New Opcodes

Opcodes are the lifeblood of spells and items. Any time a resource in the game causes an effect on a creature, it uses an opcode.

Saving Throw vs. School (346)

Applies a selective modifier to the target’s saving throws against a specific spell school (i.e. Necromancy).

Parameter 1: Statistic Modifier
Parameter 2: Type
0 Cumulative Modifier
1 Flat Value Modifier

MSpecial: School
0 No School
1 Abjuration
2 Conjuration
3 Divination
4 Enchantment
5 Illusion
6 Invocation
7 Necromancy
8 Transmutation
9 Generalist
10 Wild magic

Notes from the Developers: This effect doesn’t have an irreversible permanent mode (it always sticks to the target until removal). Make sure you don’t create excessive effects.

Make Unselectable (365)

This opcode renders the creature unselectable, making it impossible for the player to give it orders even if it is green circled.

Parameter 1: Disable Conversation
0 Disables the “talk” option for the target
1 Does not disable the “talk” option for the target

Parameter 2: Disable AI
0 Disables the target’s normal AI
1 Does not disable the target’s normal AI

MSpecial: Determine selection circle
0 Target’s selection circle will be purple
1 Target’s selection circle will be green

Enchantment Bonus (344)

This effect changes the enchantment level of the target’s attacks to the value of the ‘Enchantment’ field. The affected creatures are determined by the usual IDS targeting method.

Parameter 1: IDS Entry
Parameter 2: IDS File
0 EA.IDS
0 General.IDS
0 Race.IDS
0 Class.IDS
0 Specific.IDS
0 Gender.IDS
0 Alignment.IDS
9+ not used

Parameter 3: Hand
0 Current Weapon
1 Main hand
2 Offhand
3 Both

Parameter 4: Item Type
0 All weapons
1 Specific item type

MSpecial: Enchantment (The new enchantment level)

Notes from the Developers: This opcode allows us to handle weapons like the Bastard Sword +1/+3 vs. Shapeshifters properly, by setting an on-equip effect for the sword that affects its Enchantment when attacking creatures of a specific type. It also allows us to modify the Enchant Weapon spell to affect any weapons the target is wielding, instead of creating a single weapon that may or may not match the target’s proficiencies.

New Triggers

Triggers are used in scripts to detect elements of a creature. The trigger itself will not do anything, but it will tell a script whether or not to execute additional actions based on the trigger. All of the triggers in this section are included in TRIGGER.IDS.

ModalStateObject()

ModalStateObject(Object*, Modal)

IDS Entry: 0x40f1

Trigger: Returns true if the specified creature is currently using the specified modal state, such as Stealth or Shaman Dance
**CLASSLEVEL()**

*ClassLevel(O:Object*,I:Category*CLASSCAT*,I:Value*)*

**IDS Entry:** 0x40FD, 0x40FE, 0x40FF

**Trigger:** Returns true if the specified creature's level in the specified class category (rogue, warrior, wizard, priest) is equal to the specified value

**Note from the Developers:** Class categories are listed in CLASSCAT.IDS.

**HAVEKNOWNSPELL()**

*HaveKnownSpell(I:Spell*Spell)*

**IDS Entry:** 0x4102, 0x4102

**Trigger:** Returns true if the current creature knows the specified spell

**ISFORCEDRANDOMENCOUNTERACTIVE()**

*IsForcedRandomEncounterActive(S:Area*)*

**IDS Entry:** 0x40FB

**Effect:** Returns true if the specified area has been set to force a random encounter but the random encounter has not yet triggered.

**ORIGINALCLASS()**

*OriginalClass(O:Object*,I:Class*CLASS)*

**IDS Entry:** 0x40EA

**Trigger:** Returns true if the specified creature's inactive class is the specified class

**Note from the Developers:** This trigger is specifically designed for Dual-Class characters. Single-class or multi-class characters will not return true for this trigger. OriginalClass(0) will always return true if the current creature is Dual-Class.

**SECRETDOORDETECTED()**

*SecretDoorDetected(O:Object*,I:Open*BOOLEAN)*

**IDS Entry:** 0x4100

**Trigger:** Returns true if the specified door has been flagged as detected (TRUE) or has not been so flagged (FALSE)

**Note from the Developers:** Normal doors will not be flagged as "detected" because they are not secret. This trigger should only be used for secret doors.

**IMMUNITOSPELLLEVEL()**

*ImmuneToSpellLevel(O:Object*,I:Level*)*

**IDS Entry:** 0x40F9

**Trigger:** Returns true if the specified creature is immune to spells of the specified level.

**STORYMODEON()**

*StoryModeOn()*

**IDS Entry:** 0x40FA

**Trigger:** Returns true if Story Mode is enabled

**NEW ACTIONS**

Actions are performed by scripts. Each of the actions in this section are included in ACTIONS.IDS.

**SETGLOBALTIMERRANDOM()**

*SetGlobalTimerRandom(S:Name*,S:Area*,I:Min*GTimes*,I:Max*GTimes)*

**IDS Entry:** 377

**Effect:** Sets a random timer between a minimum and maximum value

**Note from the Developers:** I:Min*GTimes sets a minimum length for the timer; I:Max*GTimes sets a maximum length. Thus, SetGlobalTimerRandom("GLOBAL","KILLPARTY",four_hours,five_hours) will trigger the global variable KILLPARTY sometime between four and five hours from now.

**RESETPLAYERAI()**

*ResetPlayerAI()*

**IDS Entry:** 409

**Effect:** Resets the current NPC's AI to the script set in PARTYAI.2da

**MOVEOBJECTOFFSET()**

*MoveToObjectOffset(O:Target*,P:Offset*)*

**IDS Entry:** 386

**Effect:** Moves the current creature to the target's coordinates, offset by the provided X and Y amounts

**ZOOMLOCK()**

*ZoomLock(I:Lock*BOOLEAN)*

**IDS Entry:** 412

**Effect:** Resets the zoom level to default and prevents the player from changing the zoom level when set to TRUE; unlocks the zoom level when set to FALSE

**RANDOMWALKTIME()**

*RandomWalkTime(I:Time)*

**IDS Entry:** 410

**Effect:** The current creature will walk randomly until they have changed directions the specified number of times
RandomWalkContinuous()
RandomWalkContinuousTime(I:Time*)
IDS Entry: 411
Effect: The current creature will walk randomly until they have changed directions the specified number of times.

DisplayStringHeadNoLog()
DisplayStringHeadNoLog(O:Object*,I:StrRef*)
IDS Entry: 388
Effect: Displays the specified string as tooltip text over the specified object, without printing that string to the combat log.

DisplayStringPointLog()
DisplayStringPointLog(I:Strref*,P:Location*)
IDS Entry: 408
Effect: Displays the specified string as tooltip text over the specified X,Y coordinates, and also prints the string to the combat log.

Externalizations
Externalizations refer to gameplay mechanics or engine behaviors that were previously hidden from mod access, but that are now available to be modified using the existing modding tools. Most of these externalizations are tied to 2da files.

Pick Pocket Reactions
The reaction an NPC will have to the player picking the NPC's pocket is now determined a value set in PPBEHAVE.2da. By default, the following features are enabled (setting a value to 0 will disable the listed feature).

TURN_HOSTILE Sends the AttackedBy() trigger on a failed attempt
REPORT_FAILURE Sends the PickPocketFailed() trigger on a failed attempt
BREAK_INVISIBILITY Even a successful attempt will break the thief's stealth and invisibility

Notes from the Developers: This is inspired by a feature from ToBEx.

Spellcasting Failure
The way that spellcasters fail after taking damage has been externalized to CONCENTR.2da. By default, any damage a spellcaster takes will cause them to fail their spellcasting.

CHECK_MODE
0 Any damage
1 (1d20 + luck) vs. (spell level + damage taken)
2 (1d20 + Concentration) vs. (15 + spell level)

Note from the Developers: This is inspired by a feature from ToBEx. Be aware that Baldur's Gate games have no Concentration skill; using that option will use a basic 1d20+luck formula for the caster's check.

Status Icons
Status icons, the small graphics that appear on the Character Record screen to denote effects like Stunned, Charmed, or Fatigued, have been externalized to STATDESC.2da and can now support any spell icon.

Note from the Developers: There is a new column in STATDESC.2da, BAM_FILE. If that column is empty or has **** as a value, it will be ignored by all opcodes that use the file for setting icons. However, if that icon has a proper string (i.e. SPWI417C for enchanted weapon) then that BAM will be scaled down to display as an icon on the character's portrait.

Save Game Name
The names of the saves generated by the Save-Game() action have been externalized to SAVENAME.2da.

SLOTNAME The string that will be used for the save's name
START The save slot's index (this should usually be the same as the number in the first column)
COUNT The number of rotating saves that will be used for the listed save

Note from the Developers: This feature allows us to create a rotating stock of four Quick Saves. You can increase or decrease the number of rotating Quick Saves by modifying the number in the "Count" column.

Bard Song
The effects of the default bard song ability have been externalized to BARDSONG.spl. You can make changes to this spell to alter the bard song's default effects.

Note from the Developers: This is inspired by a feature from ToBEx.
The New UI System

If you're reading this section, it's because you want to know how the new UI system works and how you can make use of it to create your own UI layouts. Happily, the UI system created for v2.0 of the Infinity Engine is a lot more friendly to modification than the old system of CHU files. What you'll need:

- A good text editor (I recommend Sublime Text)
- A keyboard with working F5 and F11 keys
- A desire to create stunning UI layouts

It also doesn't hurt to familiarize yourself with the Lua programming language, but it's not absolutely necessary. (If you want to know more about the Lua programming language, Google is your friend.)

It's very important to save and back up your work often. There may be occasional hiccups that can corrupt your UI.menu, which can ruin hours of hard work if you're not careful.

In each of the following section, we'll start with the basics, and then provide a short tutorial on how to do something specific.

UI Edit Mode and F11

First, find the file “baldur.lua” in the directory where your saved games are located, and open it with your trusty text editor.

Add the following line to the top of this file, and save it:

```
SetPrivateProfileString('Program Options','UI Edit Mode','1')
```

This will allow you to do three things:

- First, it will let you enter “Edit Mode” on the game's user interface by pressing F11 on your keyboard. With Edit Mode, you can drag objects around the screen and place them exactly where you want them to live. Press F11 again to leave Edit Mode and save your changes.

- Second, it will let you preview changes you make to UI.menu without having to restart the game, by pressing F5.

- Finally, if you hover over an element and press the Tab key, you'll see exactly what line in UI.menu defines that element. This is profoundly helpful when making changes that require you to change the code, and we'll be using it extensively in the other two sections.

Your changes are saved to UI.menu, which will be copied to your override folder in the game's installation directory. If at any point you decide you want to get rid of all your changes and return to the game's default menu layouts, just rename UI.menu to something else or delete it altogether. Don't do this while the game is running. If you rename or delete UI.menu while the game is running and press F5, the game will crash because it's looking for the changes to a file that no longer exists.

If all you want to do is move buttons around on the screen, Edit Mode is all you need to get started.
Tutorial: UI Edit Mode

See those yellow rectangles? Each one of them represents a UI element that you can resize and move. To start, hover the mouse over the Quit Game button until its entire rectangle is blue, and click and drag it up about a quarter of an inch.

Moving screen elements is as simple as clicking and dragging. Some smaller elements, though, may need to be enlarged before they can be moved. If you try hovering over the version number, for instance, you’ll notice that no matter where you put your mouse, you can’t get the entire rectangle to be blue.

So before we move it, we’ll need to make it bigger. Hover over the top edge of the version number’s rectangle until that top edge turns blue, then drag it up just a bit.

Now when you hover over the rectangle you should be able to find the “sweet spot”. Move it down to the space below the Quit Game button.

You can also make text boxes smaller, and the text will wrap itself automatically. Let’s move the information text from the top right into the space above the Quit Game button.

Whoops! This text box is too big for the space and it looks bad. Luckily, we can resize it. Just click on the left edge of the rectangle and drag it in until it fits in the space.

Any element can be moved or resized. Be aware, though, that shrinking or enlarging graphic elements like buttons and screen backgrounds won’t shrink or enlarge the graphics themselves. Think of it like cropping an image: changing the size of the rectangle’s frame changes the viewable area of the image, but doesn’t alter the image itself.

Press F11 again, and you’ll leave Edit Mode. Check out that handiwork!

To Recap:

• Press F11 to enter or leave Edit Mode
• Hover over an element until its entire rectangle turns blue, then click and drag it to move it around on the screen
• Hover over a rectangle’s edge until it turns green, then click and drag it to resize the element’s frame

Changing Game Fonts

Let’s say you really like Comic Sans. Like, love it. When you write a paper for school, you write it in Comic Sans. When you create a poster, you use Comic Sans. Wouldn’t it be great if you could see Comic Sans in Baldur’s Gate, too?

In this section, I’ll be showing you how to change the fonts that are used in-game, and how to make sure they’re displayed correctly and legibly.

For this, you’ll need a copy of Near Infinity, because you’re going to be exporting BGEE.lua to your override folder. Install Near Infinity and set it up according to argent77’s instructions. Once it’s set up and running, find the folder called LUA and expand it. Click on the file “BGEE.lua” and then, in the panel on the right, click “Save” to save a
working copy of this file to your override. Now close Near Infinity, and open BGEE.lua using your favorite text editor. (You can do everything in this section from Near Infinity instead, but we'll be using that text editor a lot and it's important to be able to make changes quickly.)

With the text editor open, find the following line:

```lua
fontcolors = {}
```

When you first open the file, this will be somewhere around line 648.

Everything for the next 150 lines or so pertains to the fonts that are used in-game. The first section dictates the colors:

```lua
fontcolors['1'] = 'FFCAE2E9' -- title
fontcolors['2'] = 'FFCAE2E9' -- title highlight
fontcolors['3'] = 'FFCAE2E9' -- subtitle
fontcolors['4'] = 'FFEEFFFF' -- subtitle highlight
fontcolors['5'] = 'FF000000' -- parchment
fontcolors['6'] = 'FFEEFFFF' -- parchment highlight
fontcolors['7'] = 'FF000000' -- alternate parchment
fontcolors['8'] = 'FF102526' -- alternate parchment highlight
fontcolors['9'] = 'FFCDD6D9' -- semitrans dark background
fontcolors['A'] = 'FFFDE6E9' -- semitrans dark background highlight
fontcolors['B'] = 'FFCECECE'
fontcolors['C'] = 'FFC8F0C8' -- Minty update color
fontcolors['D'] = 'FF96C8FF' -- orangy subtitle color
fontcolors['R'] = 'FF0000FF' -- red
fontcolors['G'] = 'FF00FF00' -- green
fontcolors['M'] = 'FF000080' -- parchment red
fontcolors['$'] = 'FF82E6FF' -- gold yellow/orange
```

Change the color for a given code using ARGB codes.

The single-character “code” (ex. fontcolors['M']) is used to call the listed color in the various styles, which are described in the next section. Here's an example:

```lua
button =
{
    color = 'B',
    font = 'STONESML',
    point = 10,
    valign = 'center',
    halign = 'center',
    upper = 1,
    pad = {8,8,8,8},
    useFontZoom = 0,
},
```

This block contains all of the information about this style; when you use the "normal" style in UI.menu, this is the style you're using.

Some terms:

- “color” selects the fontcolor defined in the previous section. You can also set an 8-character hex code directly, but for consistency it's better to change your colors in the fontcolors section.

- “font” selects the specific font that will be used. You can use one of the game's existing fonts, or you can copy a TTF file into your override folder and use that one. Be aware, though, that the file name must be eight characters or less; if your font has a longer name, you'll need to shorten its file name before it will be recognized here.

- “point” determines the default size of the style. If you've ever used a word processor, the size you use for text is exactly the same as the size used here. If you decide to use a font that looks smaller or large, you may want to
adjust this “point” size accordingly.

- “align” determines vertical alignment for the text within the frame. “top” will align it to the top; “bottom” will align it to the bottom; “center” will center it within the frame.

- “halign” determines the horizontal alignment for the text within the frame. “left” will align it to the left side of the frame; “right” will align it to the right side; “center” will align it to the middle.

- “upper” determines whether the text will be displayed in all upper-case letters (1) or not (0). If you don’t include an entry for this field, it will default to 0.

- “pad” assigns padding to the borders of the text frame, ensuring that the text will always be a specific number of pixels from each edge. This field is listed as a series of four numbers, which refer (respectively) to the frame’s left, top, right, and bottom edges.

- “useFontZoom” is what determines whether or not this style will resize itself based on the user’s Font Size settings. If this field is set to 0, this style will always appear at the defined point-size, regardless of the user’s Font Size settings (which is important if you’re putting text on a button, but less important for item descriptions).

If all you want to do is swap out an existing font for a new one, of course, you don’t need to open BGEE.lua at all; just copy the desired font to your override folder, and rename it “NORMAL” or “STONESML”, or any of the other fonts that you see defined in the “styles” block.

**Tutorial: Changing Fonts**

In this tutorial, we’ll be changing all of the game’s fonts to Comic Sans. Before we begin, you will want to grab a copy of your Comic Sans font. This font comes installed on most computers, and you can find it in your Font Book (Mac) or Fonts library (Windows). If you need help finding your fonts, Google is your friend.

Once you’ve found Comic Sans, make sure you have it as a .ttf file; .otf and .ttc won’t be recognized by the game’s engine. (You can use any font you like, but Comic Sans is a visually distinct font that will also be a little goofy to see in game.)

Copy the Comic Sans ttf file to your override folder. Now, rename it to something that’s eight letters long. I’ll be using COMIC.ttf for ease of reference. It should be sitting happily right next to BGEE.lua.

Now, open BGEE.lua (you saved a copy to your override already, and find the “styles” block.

Within this block, every time you see a line beginning with font =, change the text in the single-quotes to COMIC. The full line should look like this:

```lua
font = 'COMIC',
```

Comic Sans is a smaller font; because of this, you may want to increase the point-size on some of the styles that are used as set-pieces.

When you're done, save BGEE.lua and launch the game. Voila! Everything’s in Comic Sans!

**To Recap:**

- Modify BGEE.lua when you want to make specific changes to one or more text styles.

- Use override files to test the visual appearance of fonts and see them in game.

**Note from Dee:** It is better to make changes using BGEE.lua once you know how you want your fonts to appear; you can more clearly define how the game’s text appears, and you’ll save yourself a lot of copying of the same font file as well.
The Basics of UI.menu

Up until now we've been swimming in the shallow end of the pool. Now it's time to get out the hard hats and the adult-size crayons and start making things do magic. If you haven't chosen your text editor by now, go do that now. Trust me, it will make your life a lot simpler to have things highlighted for you, and with keyboard shortcuts to handle commenting.

Again, I recommend Sublime Text, and that's the tool I'm using, but there's a wealth of excellent text editors out there. Find one you like, and that you'll be comfortable using for a long time.

If you kept the copy of UI.menu that was created back when we were moving things around the main menu, go ahead and open that up with your text editor. If you can, set that text editor as the default program for this file; if you're serious about UI modding, you'll be opening this file a lot. A lot.

Sublime Text lets me change the language, which allows the editor to highlight syntax in a way that makes it easy to spot things I need. If your editor doesn't have this feature and syntax highlighting is important to you, find a tool that has it. I'm setting my language to "Lua", and setting .Menu files to always use this language. (If you do work with other .menu files that aren't related to Baldur's Gate, don't do that last part; otherwise, it will make your life easier in the long run to have this set as a default.)

Now that you've got UI.menu open, you'll see what looks like a horrible, horrible mess. Like something that Cthulhu might have spat up in the sink and said "Ew, gross, what's that" (except in the mind-disintegrating language that Cthulhu speaks, rather than English).

If you're familiar with Lua or other programming languages, you've already begun to figure out what it all means. For the uninitiated, what you're seeing is code.

Don't worry. We're going to be very safe about this.

With this file still open, launch Baldur's Gate: Enhanced Edition, and on that first menu screen, press F11. Hover the mouse over the Tutorial button and press the Tab key on your keyboard.

You'll see a tooltip appear with the following text:

```
Type: Button
Line: 7160
Pos: 50, 306
Size: 300x44
```

"Type: Button" means that this element is in a block with the "button" type. Pos defines the x,y coordinates of the element's top-left corner, and Size defines the element's pixel width and height (respectively) on the screen.

The "Line" entry means that when you open UI.menu, this element is defined on or around line 7160. So let's go take a look.

Open up UI.menu, and find line 7160. If your text editor doesn't show you line numbers, find a text editor that does and use that instead.

You'll see that 7160 is in the middle of a block that looks like this:

```
button
{
  bam 'STARTMBT'
  sequence 6
  area 50 306 300 44
  align center center
  text style "button"
  text "TUTORIAL_BUTTON"
  action
      startEngine:OnTutorialButtonClick()
}
```
This block defines everything about that Tutorial button, from the graphic that's used for its background (the “bam” entry) to what happens when you click on it (the “startEngine:OnTutorialButtonClick()” block). Any changes you make to that block will be reflected in the corresponding element in game.

In fact, you can see the change you’ve made right away without having to restart the game! Just press F5 from in-game, and the screen will refresh to read the changes you made to UI.menu. You may need to switch back and forth between screens to see everything populate, but that's a lot faster than having to shut down the game between previews.

**Using Lua in UI.menu**

UI.menu supports Lua code. The very first thing you see when you open UI.menu is a block of Lua:

```
--reload language
if(uiTranslationFile) then
    Infinity_DoFile("L_" .. uiTranslationFile)
else
    Infinity_DoFile("L_en_us")
end
listMetaInfo = {}
```

Everything inside the ` symbols is Lua. I won't tell you what it means, because I don't know what it means, and the goal of this guide is to give you the basics so you don't get yourself into trouble. If you already know how Lua works, you can probably figure it out anyway.

Before you make changes to an existing copy of UI.menu, be sure to back up your copy so you don't lose any of your work. Making changes to UI.menu while the game is running can cause corruption in the file.

**Tutorial: The Auto-Roller**

So you know how it goes. You're up late, you want to play the game, and you get to the Abilities screen in character creation. Here we go again, you think, as you settle into the process of methodically rerolling your ability scores. Wouldn't it be great if you didn't have to sit there for an hour and a half waiting for that 85 to show up?

Let's see if we can make that dream come true.

So you're on the Abilities screen in character creation. Hit F11, and mouse-over the Reroll button. Take note of the line number, and open UI.menu. Find that line, and you'll see something like this:

```
button
{
    area 368 628 142 40
    bam GUIOSTSM
    sequence 0
    text "REROLL_BUTTON"
    text style "button"
    action "createCharScreen:OnAbilityReRollButtonClick()"
}
```

That line at the end—action "createCharScreen:OnAbilityReRollButtonClick()"—is Lua, calling to the game's engine to use a specific action that the engine already understands. In this case, the action will reroll the ability scores once.
Well, we don't want to reroll once. We want to reroll as many times as it takes to get a total of 92. Luckily, the Total you see on the screen gives us exactly what we need. Find this block:

```lua
label
{
  area 362 568 50 54
  text lua "chargen.totalRoll"
  text style "normal"
  text align center center
}
```

The displayed text for that field is driven, again, by a Lua variable—chargen.totalRoll.

If you're familiar with the basic principles of Lua, you know that you can set a “while” condition to repeat an action until the specified condition is no longer true. So we can say, in plain English:

While the total roll is not equal to 85, reroll.

Now, all we have to do is convert that into language that the engine will understand:

```
"while" is how we start the command
"the total roll" we now know to be chargen.totalRoll
"is not equal to" in Lua is written as "~="
"85" is our target number
"reroll" we know to be createCharScreen:OnAbilityReRollButtonClick()
```

Put that all together, and we get:

```lua
while chargen.totalRoll ~= 85 do
  createCharScreen:OnAbilityReRollButtonClick()
end
```

Now, copy the block for the Reroll button, and paste it right beneath the existing button. Comment out the first copy so we have it saved for later, and now replace the contents of the action " " with our new block of code. The new button's action should look like this:

```lua
action "
  while chargen.totalRoll ~= 85 do
    createCharScreen:OnAbilityReRollButtonClick()
  end"
```

Save that, and return to the game and press F5. Press the Reroll button, and voila! Nothing but 85 totals.

Now, I've done a little tinkering of my own beyond what you see above. See if you can figure out how I did it, using nothing but the following screenshot to guide you:

**To Recap:**
- You can enter Lua code in UI.menu as long as you surround it with ` symbols
- You can call a Lua variable to generate a piece of text for a label using the text lua field
- You can script a button to perform a block of Lua code using the action field

That's all you need to know to start exploring the new UI system. Good luck!
Disclaimer: As with any major change to a piece of software, the application of the update described here may result in unexpected changes to existing saves, especially on modded copies of the game. As part of the update process, any mods you have applied will be cleared. If you don’t wish to lose your mods, back up your installation before applying this update.

What? Oh, I see. If it’s not filled with a half-dozen zingers and tongue-in-cheek references to Elminster then it’s not worth reading, is it? Well WAKE UP AND SMELL THE TECHNOJARGON, President Fancy-Pants! Not all disclaimers are sunshine and irony! I swear, the next time I see some upstart trying to sell me some trumped up disclaimer about turnip paste and goblin wigs, I’ll make them EAT those wigs, and the horse they rode in on! And that’s a promise! Put THAT in your release notes!
