Preface	ix
Acknowledgments	xi
1 Introduction	1
1.1 Why are these soil specifications needed?	1
1.2 Lessons from failed project examples to demonstrate why we need this handbook	2
1.3 The function of this handbook	4
1.4 Who will use this handbook?	5
1.5 Key benefits	5
1.6 Structure of this handbook	6
1.7 How to use this handbook to drive your project	6
1.8 Traps for unwary players (the most common landscape soil problems)	7
1.9 Due diligence and responsibilities	10
2 Design development process and the soil approach	11
2.1 Project initiation	11
2.2 Site soil analysis	11
2.3 Landscape balance (prioritising project factors)	13
2.4 Landscape objectives	13
2.5 Influence of soil on design	14
2.6 Soil choice versus design	15
2.7 Specification case study 1: ‘Woo-la-ra’ Sydney Olympic Park (SOP), NSW, Australia	15
2.8 Specification case study 2: Barangaroo, Sydney City former Port, NSW	17
2.9 Specification case study 3: One Central Park, Broadway, Sydney	24
3 Understanding soils for landscape development	31
3.1 Understanding and investigating site soils	31
3.2 Natural soils	31
3.3 Disturbed and urban soils	34
3.4 Soil contamination	34
3.5 Site soil survey	35
3.6 Sampling and analysis	36
3.7 Reporting on soil conditions	37
3.8 The soil approach method	38
3.9 Bringing the soil approach and design together	38
3.10 Identification of ‘fit for purpose’	40
3.11 Stripping and recovery plan	40
3.12 Amelioration and improvement	41
4 Creating landscape soils	43
4.1 The soil approach	43

4.2	Choosing the profile form for Part I of the soil specifications	43
4.3	Specifying a two layered profile (or an A/C profile)	45
4.4	Specifying a three layered profile (or an A/B/C profile)	46
4.5	Specifying soil depths	48
4.6	Specifying drainage types	48
4.7	Specifying soil volumes	50
4.8	Choosing the Part III Product Specifications	53
4.9	Mulches	54
4.10	Specifications for mulch	55
4.11	Creating artificial and specialist growing media	56
5	Guidance to using the soil performance specifications	59
5.1	Using the templates	59
5.2	Structure	59
5.3	Scope	60
5.4	Variation	60
5.5	Test methods	61
5.6	How to construct your soil specification	63
6	The performance specifications	65
	The performance specifications XXX	65
	Part I Site investigation/analysis	66
	Specification A1. Site soil investigation and characterisation	67
	Specification A2. Site subgrade investigation and characterisation	69
	Part IIB Preparatory soil works	70
	Specification B1: Stripping and stockpiling	71
	Specification B2. Site subgrade preparation	72
	Specification B3. Imported subsoil	73
	Specification B4: Soil schedules (profiles, volumes and depths)	75
	Schedule of soil horizon depths	76
	Tree rooting volumes table	78
	Part IIIC. Soils for turf and lawns	79
	Specification C1: Passive amenity turf	80
	Specification C2: Active high-traffic turf	82
	Specification C3: Sports field turf	84
	Part IIID. Soils for gardens and mass planting	86
	Specification D1: Mass planting soil	87
	Specification D2: Garden bed planting soil	90
	Specification D3: Display bed soil	93
	Specification D4: Advanced tree and vault subsoils	96
	PART IIIE. On slab media	99
	Specification E1: On slab soil media 'A' horizon	100
	Specification E2: On slab soil media 'B' horizon	103
	Specification E3: Low-density container and green roof	106
	Part IIIF. Specialist soils	109
	Specification F1: Structural support soil (SSS)	110
	Specification F2: Raingardens and stormwater filtration soils	113
	Specification F3: Wetland soils	116
	11 Part IVG. Validation specifications	118
	Specification G1: Quality assurance and control	119
	Specification G2: Hold points	122

Bibliography	123
Appendix A: Technical	127
Appendix B: Forms and templates	133
Appendix C: Soil rooting volumes	147
Glossary of industry terms	161
End Notes	171
Index	xxx
