Preface	vii
About the authors	ix
Acknowledgements	xi
Dangerous invertebrates	1
Invertebrate threats	5
Personal protection measures	8
Sponges (Phylum Porifera)	19
Coelenterates (Phylum Cnidaria: jellyfish, sea anemones, sea fans, corals)	20
Bryozoans (Phylum Bryozoa)	30
Echinoderms (Phylum Echinodermata: sea stars, brittle stars, sea urchins, sea cucumbers)	31
Segmented worms (Phylum Annelida: leeches, polychaetes)	34
Molluscs (Phylum Mollusca: cephalopods, cone shells, sea butterflies, sea slugs, snails)	38
Spiders (Order Araneae)	45
Scorpions (Order Scorpiones)	59
Mites and chiggers (Subclass Acari)	67
Ticks (Subclass Acari)	75
Centipedes and millipedes (Classes Chilopoda and Diplopoda)	92
Crustacea	95

Lice (Order Phthiraptera) 96

Cockroaches (Order Blattodea) 98

True bugs (Order Hemiptera) 100

Ants, bees, wasps and hornets (Order Hymenoptera) 107

Moths (Order Lepidoptera) 122

Beetles (Order Coleoptera) 126

Flies (Order Diptera) 129

Fleas (Order Siphonaptera) 156

Selected references 163

Web-based sources of hazardous invertebrate references and information 166

Glossary 167

Appendix 1. United States Environmental Protection Agency registered repellent efficacy and use assessments 171

Appendix 2. United States Environmental Protection Agency registered repellent safety data and safety assessments 174

Appendix 3. Some United States Environmental Protection Agency registered commercial insect repellent product information 177

Appendix 4. Likely human allergens in botanical repellents 178

Appendix 5. Personal health summary example 179

Appendix 6. Medically important and venomous invertebrates of the world 182

Appendix 7. Common vector-borne diseases, their vectors, distribution, symptoms, vaccines and chemoprophylaxis 196
