1	Introduction	1
2	Australia's subtropical rainforests – the plant context	11
	Colour plates	19
3	The invertebrates – the 'other 99 per cent' of subtropical rainforest biodiversity	73
	The role of invertebrates in subtropical rainforest ecosystems	73
	Pollination in Australia's subtropical rainforests and the pollinator function of insects	80
4	Invertebrate taxa of Australian subtropical rainforests	87
	PLATYHELMINTHES (flatworms, land planarians)	87
	Temnocephalida (flatworms)	87
	Tricladida (land planarians)	88
	NEMERTEA (ribbon worms)	89
	NEMATODA (round worms)	89
	ANNELIDA (earthworms, leeches)	89
	Oligochaeta (earthworms)	90
	Hirudinea (leeches)	91
	CHELICERATA (spiders, scorpions, harvestmen, mites, ticks, pseudoscorpions, whip spiders)	92
	ARACHNIDA (spiders)	92
	Araneomorphae ('true' spiders)	92
	Mygalomorphae (trap-door and funnel-web spiders)	98
	SCHIZOMIDA (whip spiders)	101
	SCORPIONIDA (scorpions)	101
	PSEUDOSCORPIONIDA (pseudoscorpions)	102
	OPILIONES (harvestmen)	102
	ACARINA (mites, ticks)	103
	CRUSTACEA (amphipods, isopods, syncarids, crayfish, shrimp and related groups)	108
	PERACARIDA (amphipods, isopods)	108
	SYNCARIDA	108
	DECAPODA (crayfish, shrimp, freshwater prawns)	109
	UNIRAMIA (peripatus, centipedes, millipedes, springtails, insects and related groups)	110
	ONYCHOPHORA (peripatus, velvet worms)	110
	CHILOPODA (centipedes)	111
	DIPLOPODA (millipedes)	111
	COLLEMBOLA (springtails)	112
	PROTURA	113

DIPLURA (two-pronged bristletails)	113
INSECTA ('true' insects)	114
ARCHAEOGNATHA (bristletails)	114
EPHEMEROPTERA (mayflies)	114
ODONATA (dragonflies, damselflies)	115
Zygoptera (damselflies)	116
Anisoptera ('true' dragonflies)	117
PLECOPTERA (stoneflies)	118
BLATTODEA (cockroaches, termites)	119
Blattaria (cockroaches)	119
Isoptera (termites)	121
MANTODEA (praying mantids, mantises)	123
DERMAPTERA (earwigs)	124
ORTHOPTERA (grasshoppers, katydids, crickets)	124
PHASMATODEA (stick insects)	127
EMBIOPTERA (web-spinners, embiids)	128
PSOCOPTERA (psocids, book lice)	128
PHTHIRAPTERA (lice)	129
HEMIPTERA (true bugs, leafhoppers, cicadas, mealybugs, lerps)	130
THYSANOPTERA (thrips)	142
MEGALOPTERA (alder flies)	143
NEUROPTERA (lacewings, ant-lions)	144
COLEOPTERA (beetles)	146
MECOPTERA (scorpion flies)	201
SIPHONAPTERA (fleas)	202
DIPTERA (flies, midges, mosquitoes)	203
TRICHOPTERA (caddis flies)	238
LEPIDOPTERA (moths and butterflies)	239
Glossata (Hesperoidea and Papilionoidea) (butterflies)	241
Glossata (part – remaining superfamilies), Aglossata and Zeugloptera (moths)	246
HYMENOPTERA (wasps, bees, ants, sawflies)	255
Symphyta (sawflies)	256
Apocrita (Aculeata – Apiformes) (bees)	258
Apocrita (Aculeata and Parasitica) (wasps)	263
Apocrita (ants)	272
<b>MOLLUSCA</b> (land and freshwater snails, slugs)	276
Terrestrial fauna	278
Freshwater fauna	286
