Keynote session: Transformation and future potential of African cities

Powered by

The prestigious keynote session addresses the challenge of industry transformation and delivering cities of tomorrow in the African context. Not only does the keynote session focus on professional and academic engagement with ordinary people, small contractors, architects and underprivileged groups operating in Africa's built environment, but it also recognizes that transformation and empowerment are key to unlocking the future potential of the continent through metropolitan infrastructure and job creation construction industry both locally and across Africa.

09:30 Opening remarks

09:45 Provincial transformation initiatives

Jacob Mamabolo, Member of the Executive Council, Gauteng Department of Infrastructure Development, South Africa

10:15 Round table discussion: Transformation and future potential of African cities

- How government and community stakeholders can collaborate to empower SMMEs and other underprivileged groups
 - The role of both public and private sectors in infrastructure development and spatial transformation
 - The benefits of investing in alternative building materials and driving sustainability
 - Encouraging innovation within the city environment and defining the parameters of a smart city in the African context
