Our Technology.
Your Vision.

CMIC
CONNECT

About us

CMC Connect is a FTSE listed provider with 30+ years experience in offering access to global markets via our multi-asset trading technology, through API connectivity or a white label solution.

Experience & expertise

We have a team of over 700 employees across 14 offices internationally, catering to a base of over 200,000 active retail clients* and 150+ institutional partners. We are regulated in multiple jurisdictions including the United Kingdom, Germany, Dubai, Australia and Singapore.

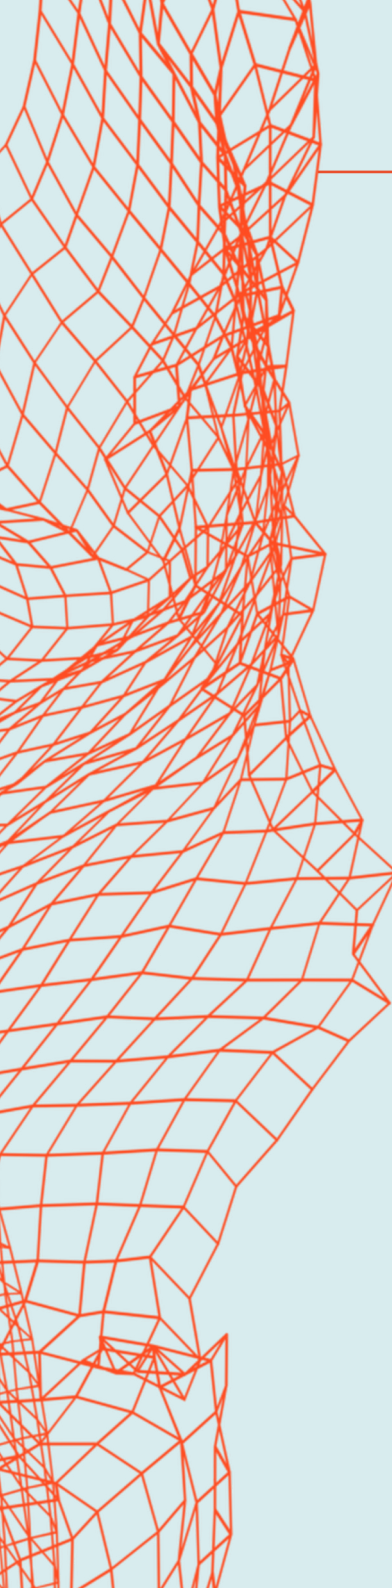

Technology

We have invested over £100 million into our technology as part of our commitment to providing a world class trading experience.

Consult & connect

Our local teams will work with you to understand your trading behaviour and support in implementation of our best practices. Our talented workforce combined with our decades of experience working with global institutions means we are well positioned to support your business.

*Active clients represent those individuals which have traded with or held CFD or spread bet positions or which traded on the Invest platform on at least one occasion during the financial year.

Our solutions

Liquidity

Cost-effective multi-asset liquidity.

Connectivity

Smooth data flow and transactions with market connectivity and APIs.

Trading technology

Award-winning* trading technology & back-office tools.

Professional services

Holistic support through a range of complementary services.

Reporting

Custom data delivery to meet regulatory, performance or risk requirements.

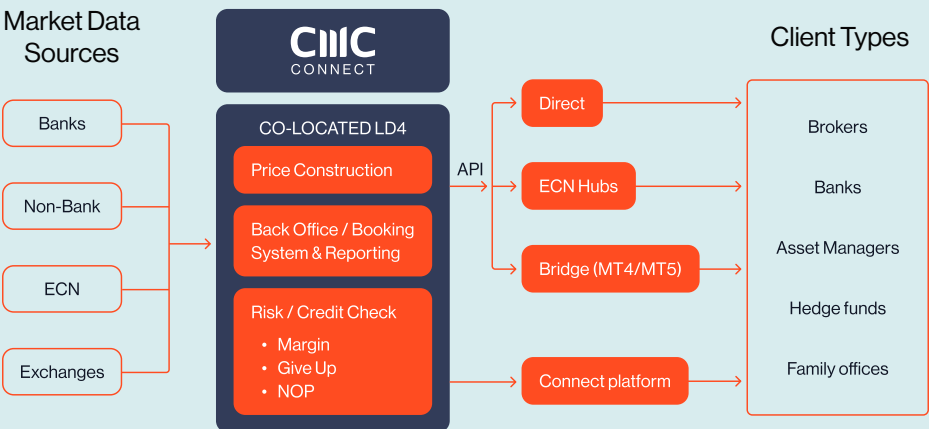

*Best Trading Technology Provider at the HedgeWeek European Awards 2022

Liquidity

We offer multi-asset liquidity provision, providing institutions with global market access across a range of asset classes with customised pricing and sophisticated risk management.

Tailored to your business needs

We work with our clients in order to construct prices and manage risk parameters in a bespoke manner, to best meet their commercial requirements. By including or excluding asset classes, we can help them provide the proposition they need.

Connectivity

The use of industrial grade components and cutting-edge in-house technology offers clients the flexibility to either link straight to CMC Connect via our Direct API, or routing via a third-party technology hub. CMC clients benefit from low latency achieved through our co-located London data centres.

Trade execution flow

Trade on over 14,000 instruments across multiple asset classes from one account through a single connection.

FX

As an FX global code signatory we offer access to G20 spot pairs and precious metals in a margined or GiveUp environment, as well as many additional CFD pairs. Liquidity and risk engines co-located in LD4.

CFDs on Shares

Access 10,000+ stocks from over 20 countries.

Indices, Commodities & Treasuries (CFD)

78 global indices, 128 commodities and 61 treasuries. Cash and forward variants available.

ETFs (CFD)

Trade a diverse range of sectors via 1,100+ ETFs.

Futures & options

Trade futures and options from 27 exchanges with Direct Electronic Access, provided by CMC. Available to institutional clients and professional individuals.

Cash Equities

Trade on over 5400 US stocks including 700+ ETFs with multi-currency capability.

Trading technology

Facilitating revenue potential through our white label solution or partnership program.

White label

Our bespoke white label solution allows regulated institutions to extract more value from their existing client base by providing a premium trading experience. Clients have the ability to tailor our platform to meet their bespoke requirements, from functionality to design and reporting. We host and manage the IT infrastructure, enabling clients to grow their business and increase revenue by freeing up resources to focus on core business functions.

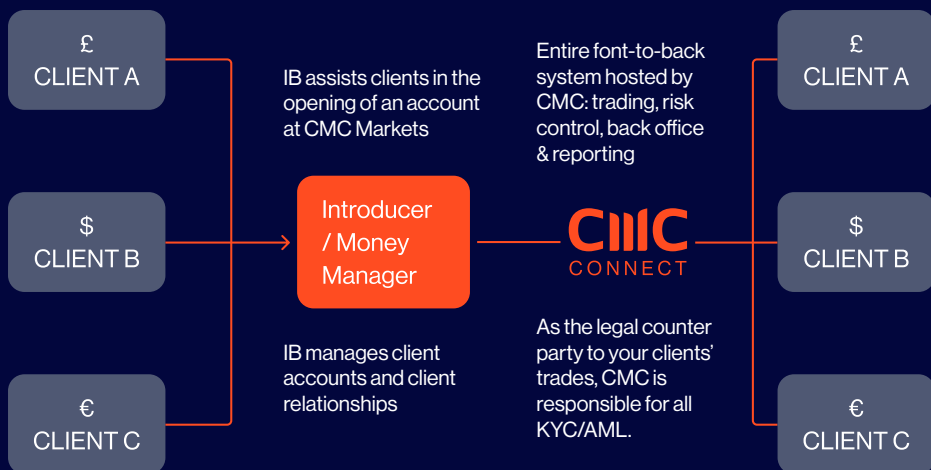

Introducing broker and money manager partnership program

Our partnership program is designed for regulated entities looking to introduce or trade on behalf of their client base. Whether you're a licensed investment firm operating a trading strategy for managed accounts, or a broker providing other added-value services, introduce your clients to our cost-effective, award-winning* derivative trading solution so you can concentrate on accelerating your business growth and market potential.

- Neutrally branded platform with native mobile app
- Streamlined online client application process
- Ability to trade on your clients behalf via our broker GUI

*Best Trading Technology Provider at the HedgeWeek European Awards 2022

Full-service solution

To complement our trading platform interface, we offer our clients access to a range of systems in order to give you complete control and transparency over your end-users, from on-boarding through to funding and regulatory reporting.

Money Manager Platform

Trade your strategy utilising CMC's proprietary block trading tool (Trade Splitter).

Partner Portal

Our partner analytics tool provides you with commercial data as well as insight into client trading behaviour and emerging trends.

CMC Vision

Real-time position keeping and risk management dashboard.

Nucleus

Service your end clients through Nucleus, our broker facilitation tool. Functions include client creation, funding and administration.

Reporting

Whether it's for regulatory reporting, performance analysis or risk auditing, our service delivers your data when and how you require it.

Performance/management information

We can provide trade drop copy via FIX protocol, end of day files via SFTP and corporate action data.

Utilise our partner portal

Our partner analytics tool provides you with commercial data as well as insight into client trading behaviour and emerging trends.

Fulfil your regulatory requirements

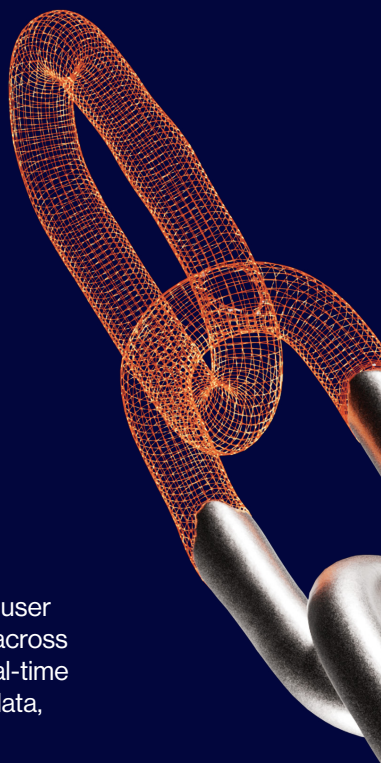

We help you meet your MiFID and EMIR regulatory requirements including delegated EMIR reporting and other bespoke requests.

CMC Vision

We provide clients with access to CMC Vision, our graphic user interface (GUI) for position keeping and risk management across account or client structure. We offer the ability to create real-time client statements and monitor exposure through position data, cash availability and margin requirements.

Hedge fund administration

Integrate real-time account data via CMC Vision with reconciled end of day files for improved clarity and confidence in your positions.

Professional services

In addition to our technology and liquidity solutions we are able to support your business through a range of complementary services.

Decades of industry experience

Utilise the best practices which we have developed and optimised over our 30+ years in business.

Access our experts

Our quantitative analysis team will meet with you in order to understand your trading behaviour and business needs.

Ongoing commitment

We want to be with you as your business develops which is why we are continually innovating the range of products and services we offer.

Pre-trade – Liquidity optimisation

Our team of analysts will work with you via your account manager to ensure you receive the best possible commercial terms by looking at your unique approach, including times of the day you are trading and any specific events you are trading around.

Post-trade – Trade cost analysis

We provide full post-trade transparency allowing counterparties to compare performance across multiple LPs.

- TCA provided by a 3rd party to ensure an unbiased insight into each execution
- Minimised market impact and trading costs
- Dedicated account manager will review and discuss your monthly reports, highlighting any suggested optimisations
- Ongoing analysis of type of flow received from our clients
